

Bronchitis

"Granny" Chamberlain
"There is no disease that should cause more anxiety in the home than Bronchitis, for if neglected in the earlier stages it often becomes chronic and may even prove fatal. Chamberlain's Cough Remedy is the medicine for this disease, and if given in regular doses will relieve the cough, ease the pain, remove the difficulty in breathing and produce a free and easy expectoration, thus reducing the inflammation. Old people, and those who have weak lungs, cannot be too careful in guarding against this disease."

Chamberlain's Cough Remedy

strengthens the throat and lungs and makes them less susceptible to changes of the atmosphere. In fact, the use of Chamberlain's Cough Remedy will prevent an attack of Bronchitis becoming chronic."

Yours for Health -- Granny Chamberlain

BAXTER NAME IS DEFENDED

BY NEW YORK'S ASSISTANT DISTRICT ATTORNEY, MEMBER OF THE BOARD OF TRUSTEES.

Family of Dead Man Resent Former Publications — Miss Alice Baxter, Former Hot Springs Girl, Sends Letter and Asks Publication.

A letter with enclosure was received in early April from Miss Alice M. Baxter, well known actress and former Hot Springs girl who requested relatives here to have it published. This has been under consideration and has been decided it would be but just to the name of the dead man, who cannot speak in his own defense, and whose widow, four little children, aged father and mother, sisters and brothers desire to clear his name of any stigma enemies would have placed upon it. The deceased was to have prosecuted the case which was on the spring docket, but was called by the death angel before that time, expiring from hemorrhage of the brain, brought about by worry over the false slander, so his family assert.

An extract from the letter from Miss Baxter to her relatives here, says: "I am enclosing a copy of a letter the District Attorney of New York wrote to Dorothy when George died. His suit against the New York World for the false statements printed about him was on the spring calendar, but we are told now that his estate cannot prosecute a libel case. So, his name must go undefended. Such an unjust law—that a man's name can't be cleared of scandal after death—especially when that scandal killed him! That we know. So, the enclosed letter from Mr. Thompkins is the only evidence we have now to show that they were false. I am sending you a copy so you can show it to anyone whom you think may remember the article in the Hot Springs paper printed. Perhaps they would be glad to print this letter (Thompkins). It was written for publication. And the New York papers will publish it."

The Enclosed Letter.

District Attorney's Office,
County of New York, Mar. 23, 1917.
My Dear Mrs. Baxter: The news of Mr. Baxter's sudden death shocks me. Please accept for yourself and yours my sympathy in these dark hours and yet to come. Because of my position as Assistant District Attorney and my membership on the Board of Trustees of the American Defense Society, the impression went abroad that the District Attorney would make an investigation of the relations existing between Mr. Baxter and the Society. There was never the slightest foundation for such an impression—it was never suggested by anyone—and never dreamed of by me. The unfortunate incident which brought about the severance of relations was regretted by all who knew Mr. Baxter, of whose work for the Society I heard only words of praise. My sympathy for you and yours is the keener because of the fact that Mr. Baxter has passed out before he could legally meet and brand as false the outrageous attacks made against him by certain newspapers.

Sincerely yours,
(Signed) LESLIE J. THOMPKINS,
Mr. George Baxter, Harmon-on-Hudson, N. Y.

It is remembered here that Mr. Baxter made immediate reply, though quite ill at the time, denouncing the published New York newspaper articles as a conspiracy of political enemies of the administration when President Wilson was in the midst of his campaign for re-election. Mr. Baxter said that he would not join in the conspiracy and that they sought to discredit him. Mr. Baxter was quite cheerful over the prospect of winning his suit, which was on the spring docket of court, but worried over the unjust criticism and unpleasant notoriety given him and family.

OKLAHOMA AND TEXAS IN PATH OF STORM

FROM SECTIONS HEARD FROM DENNISON SEEMS TO BE THE HEAVIEST SUFFERER.

Dallas, Texas, April 27.—Southern Oklahoma and North Texas were visited with a heavy rain, wind and electrical storm this evening and, according to early reports, the property damage in North Texas will probably reach several hundred thousand dollars. No loss of life has been reported. Several of the smaller towns are isolated from wire communication, however. Denis, near the Oklahoma line, reports property damage of \$25,000.

The storm struck Dallas about 9 o'clock, the rain falling in torrents for thirty minutes. No damage was reported as there was little wind.

Denison reported a heavy wind storm from the west, which later veered to the northward, carrying down wires and poles and many small outhouses before it. The wind "drifted" in places, taking the form of a "twister." St. Patrick's Catholic church and the boys' Catholic school were blown from their foundations and a one-story brick building caved in by the wind. Other buildings suffered more or less damage. At 9 o'clock the streets of Denison were reported flooded with water and heavy rain still falling. Wire service to the northward from Denison into Oklahoma is reported completely demoralized.

Gainesville, Texas, was also isolated at 10 o'clock, the last word from that point being a message to the Associated Press inquiring for information concerning the "storm damage in his vicinity."

The rain was general over North and Northwest Texas.

GAINESVILLE, TEXAS, IN THE STORM'S PATH.

Property Damage Will Probably Reach Several Hundred Thousand Dollars.

Gainesville, Texas, April 27.—Railroad and wire communication in North Texas and Southern Oklahoma was paralyzed several hours this evening by a severe wind, rain and electrical storm, which did property damage that probably will reach several hundred thousand dollars. Many small towns and remote sections have not been heard from. No loss of life has been reported.

The storm, which struck Gainesville at 6 o'clock, had decreased in intensity when it reached Dallas and Fort Worth, where heavy rain still was falling at midnight, accompanied by an electrical disturbance, but little wind.

The wind, which reached proportions of a small tornado in the sections farther north, had apparently turned in a northerly direction after having struck Denison, and late tonight had seemingly spent its force in Southern Oklahoma without doing great damage. At Gainesville a lightning struck a 57,000-barrel crude oil tank owned by the Petroleum Oil Refinery, setting it afire. At midnight the fire was still burning. The loss here will reach about \$80,000. Dozens of small out-houses were blown down. Heavy damage is feared at Muenster, Lindsay and St. Jo, where heavy hail is reported to have accompanied the storm.

Late reports said the damage elsewhere along the Texas-Oklahoma line would probably approximate \$150,000, with many sections yet to be heard from.

Shortly before midnight railroad traffic was reported to have begun moving again, but all trains were running late, owing to swollen streams and demoralized wire service.

The only Oklahoma point affected heard from late tonight was Lawton, where it was said there had been little or no damage.

MINE EXPLOSION ENTOMBS 125 MEN

MEN ARE BELIEVED TO BE IN SHAFT 3,600 FEET UNDER THE MOUNTAIN.

Trinidad, Colo., April 27.—One hundred and twenty-five men caught in the Hastings mine of the Victor-American Fuel Company by an explosion this morning still were entombed tonight, while rescue squads slowly worked toward the main workings, 3,600 feet under the mountain, where the men were believed to be imprisoned.

Whether any of the men are alive is unknown, but company officials hoped that they escaped the effects of the explosion and can hold out until the rescuers reach them.

At last reports helmet squads had penetrated to a depth of 1,200 feet. Evidence of a gas explosion was found at this depth, but there was no trace of the men.

Rumors that the explosion was the result of a bomb plot were discounted by company officials. The pointed out that the mine was known as a "gas mine" and that a similar explosion occurred in 1915. Company officials insisted that the explosion was slight and that the greatest danger to the men was from the fire and smoke. The fans were kept working pumping fresh air into the workings.

Ninety of the men caught in the mine are miners, the others being company men. Among the latter are Mine Inspector David Reese, David Williams, pit boss, and H. J. Millard, fire boss.

Besides the rescue squads of the Victor-American Company, rescuers were called from the Colorado Fuel and Iron Company's camp just across the hill from the scene of the accident.

The Hastings mine is situated 29 miles from Trinidad and normally employs about 100 men to a shift and has a capacity of 1,000 tons a day.

At 11:30 tonight it was reported that five bodies had been found. Rescuing crews are working continuously in short shifts and expect to reach the remaining men before daylight. No hope is held out that any of them will be rescued alive.

The explosion which caused the destruction is said to have been caused by a sudden change of temperature this morning, resulting in spontaneous combustion of coal dust.

FUNSTON'S MOTHER DEAD.

Emporia, Kan., April 27.—Short funeral services will be held here tomorrow for Mrs. E. H. Funston, mother of the late Major-General Funston, who died here last night. The body will then be taken to Iola, where further services will be held Sunday afternoon. Interment will be made in the Iola cemetery.

Keeping Yourself Well

THE FIRST STEP

Usually the first indication of a lowering of health is found in the bowels and liver. Something goes wrong—we eat too much, or work too hard—and the bowel action weakens or the liver is sluggish. That heavy feeling on arising in the morning, dryness of the throat, with bad taste, a slight headache, dull eyes—all show that food has fermented in the intestines, and that the body is manufacturing poisons instead of good blood.

Clear it all out. Give the stomach and bowels a fresh start. Encourage the liver to go to work. Manalin does all of this, without gripping or weakening. It's the ideal laxative and liver tonic, because it follows Nature's plan, without discomfort, inflammation or forming a habit. Constipation may be overcome with its use.

Thoroughly tested and APPROVED by the Council of the American House of Chiropractors.
Liquid or Tablet form. The Tablets taste like candy. Children like them, and they are safe. 10 and 25 cents.

Loganberry Juice

The Loganberry is originally a California product—a cross between the red and black raspberry—and a fruit of delightful flavor. The natural fruit juice is put up without the aid of preservatives, so rich and thick so that two parts water or crushed ice may be added for a delicious drink. For home-made ice cream, sherbets, etc. We strongly recommend.

The South Must Feed Itself

There will be wide-spread suffering in the South before the year ends, if food crops are not heavily increased. The only way to avert the impending calamity is for every farmer to raise plenty of food for man and beast.

Alarming conditions confront us as the result of war. The South has been fed largely from the West, but this year we must feed ourselves, because the government will take the Western food supply for the armies.

On the average one-horse farm in the South there should be planted in 1917, 5 acres in corn and velvet beans, 5 acres in cow peas for hay, to be followed by winter oats; not exceeding 10 acres in cotton; 5 acres in peanuts to be crushed for oil or grazed down by hogs; 1 1/2 acres in sweet potatoes to be followed by winter cover crops; 1 1/2 acres in alfalfa or crimson clover, cow peas or soy beans; one acre in rape, oats, vetch, cow peas or soy beans; one acre in truck crops, followed by hay or grazing crops for hogs; 10 acres should be set aside for pasturage for cows and hogs; one-half acre in orchards and one-half acre in garden. This may be changed to suit local conditions.

The United States Department of Agriculture, through its farm demonstration agents, is co-operating in this movement and you can get any assistance and any practical suggestions you may need from the nearest farm demonstration agent.
