# The PRICE or the VALUE--- WHICH?

In buying Dry Goods, Clothing, Shoes, etc., there are two main points to consider---

## PRICE AND VALUE

Value is not always represented by price. On the contrary, Price is frequently out of all proportion to Value, being influenced by style or prevailing fads.

This store endeavors at all times to give SOLID VALUES, even in lines where Fashion governs.

If you would be sure of not only Right Price, but Right Value, come to us.

# A Store That Seeks to Serve the People

Our aspiration is not merely to operate a mercantile establishment where goods are sold for legitimate profit. That much, of course, is essential. But above and beyond the perfectly human desire to make money, our purpose is to be of actual constructive service to the people within our trade radius. We believe every institution ought to be a factor in community and county growth and development. We believe in the true spirit of co-operation and helpfulness. We believe in and endeavor to practice in our dealings with the people the principle that there is a mutuality of interest between the business institution and the public and that all transactions should reflect the spirit of the golden rule. For these reasons we have devoted our advertising space for several months to preaching safe, sane and profitable farming, elimination of waste and the encouragement of thrift and economy upon the part of the people. If you think an institution that operates along these lines is deserving of your business, we shall most certainly be glad to have your patronage; and remember, we have a deeper interest in you and your welfare than in the dollars you may spend with us.
