CASTORIA
For Infants and Children.

Mothers Know That Genuine Castoria

Always Bears the Signature of

Dr. J. C. Holt

In Use For Over Thirty Years

CASTORIA

ALCOHOL—3 PER CENT.
A Vegetable Preparation which Assimilates the Food by Regulating the Stomach and Bowels of Infants and Children.

Thereby Promoting Digestion, Cheerfulness and Rest. Contains neither Opium, Morphine nor Mineral. **NOT NARCOTIC**

A helpful Remedy for Constipation and Diarrhoea and Feverishness and LOSS OF SLEEP resulting therefrom in Infants.

The Sincere Signature of **Dr. J. C. Holt**
The Great Western Dispensary, NEW YORK.

At 6 months old 35 DROPS—40 CENTS
Exact Copy of Wrapper.

What to Do for Disordered Stomach

Take a good dose of **Carter's Little Liver Pills**—then take 2 or 3 for a few nights after. You will relish your meals without fear of trouble to follow. Millions of all ages take them for Bilioussness, Dizziness, Sick Headache, Upset Stomach and for Sallow, Pimply, Blotchy Skin. They end the misery of Constipation. **Signature bear** *Small Pill; Small Dose; Small Price*

CARTER'S LITTLE LIVER PILLS

Keep Your Blood Pure Nature Will Do the Rest

Did you know that ninety per cent of all human ailments depend upon the condition of your blood? Nature gives her warnings in various unmistakable ways, so that when the appetite fails, and you become weak and listless, and a general run-down condition seems to take possession of the whole body, it is an unfailing sign that impurities will steadily accumulate until your general health will be seriously affected. You should recognize the importance, therefore, of very promptly cleansing out the system, and keeping the blood supply pure and robust.

Get a bottle of S. S. S. at your drugstore to day, and note how promptly it builds up the appetite and gives new strength and vitality. Write for free literature and medical advice to Chief Medical Adviser, 153 Swift Laboratory, Atlanta, Ga.

MONEY IN BREEDING MUSSELS
United States Fisheries Bureau Reports That a Profit May Confidently Be Looked For.

The business of breeding pearly mussels artificially has been carried so far by the United States fisheries bureaus that a money profit is confidently promised.

To produce in this way 1,000 baby mussels costs about 20 cents. When they are full grown 30,000 of them will weigh a ton. Thus the cost of producing a ton of pearly mussels of market size (if all survived) would be, as exactly reckoned, \$2.08. Assuming a loss of 50 per cent, the cost would be \$5.36.

Pearly mussels occasionally yield valuable pearls, but commercially it is the shells, suitable for mother-of-pearl, that are important to be considered.

The fisheries bureau has devoted its attention wholly to the propagation of superior varieties of mussels, the shells of which have at present time a market value of \$35 a ton.

When anyone has offended me, I try to raise my soul so high that the offense cannot reach it.—Descartes.

FURTHER USE FOR RADIUM
Its Employment in Pottery is Said to Be Productive of Results of Great Benefit.

Water containing radioactive compounds is used as a curative agent for certain illnesses. Mere contact with such compounds for a sufficient length of time will make water slightly radioactive.

Pottery is now manufactured which has in it a small percentage of radioactive material. This is mixed with the clay and baked in the kiln. Water left in pottery of this nature for a short time will become radioactive by "induction," and a health-giving drink is made.

Such water may also be employed in the watering of plants with good results, since the presence of a radioactive compound near the roots of a plant is very helpful to its growth.—Popular Science Monthly.

Then She Does.
"Does your wife drive the car?"
"Only when I'm at the wheel."—Exchange.

In a novel it is generally the incident taken from real life that seems the most improbable.

The longer you boil POSTUM CEREAL the better it is

Your reward will be such richness of flavor as would please most coffee or tea drinkers.

This pure, wholesome cereal drink contains nothing harmful. Its regular use proves a comfort and an economy.

Need Hospitals for Service Men

Surgeon General Reports Ex-Soldiers Breaking Down at Rate of 1,000 a Month.

SICK AND INSANE INCREASE

Asks \$30,000,000 to Provide for 10,200 Additional Beds—Many Patients Now Housed in Flimsy and Inflammable Structures.

Washington.—To properly house and care for the rapidly increasing number of American ex-soldiers who suffer from tuberculosis, mental diseases and other afflictions, approximately \$30,000,000 is needed immediately, according to a letter written to Senator Ashurst of Arizona by Surgeon General H. S. Cumming of the bureau of the public health service.

At the present time, the surgeon general states, sick and insane men whose afflictions can be charged to their service to their country, are increasing at the rate of about 1,000 per month, and owing to inadequate hospital accommodations, great numbers of them are of necessity being cared for in structures that are described as "flimsy and inflammable."

In his letter to Senator Ashurst the surgeon general says:

"I wish to invite your attention to the fact that since June 2, 1920, the date on which the France bill, to authorize the secretary of the treasury to provide medical, surgical and hospital services and supplies for discharged soldiers, marines, army and navy nurses, and for other purposes" was favorably reported, the number of patients has increased from 17,445 to 22,292 for the week ended January 1, 1921.

"In the week ended January 1, 1921, there were in hospitals operated by the public health service 12,511 patients, and in hospitals under contract with the public health service 9,781. Of this number 19,019 were patients of the war risk insurance bureau. It is understood that there were approximately 3,000 patients of the war risk insurance bureau in hospitals operated by the National Home of Disabled Volunteer Soldiers, and in army and navy hospitals.

"Patients increase 1,000 Per Month.

"The present rate of increase in patients in hospitals of the public health service is approximately 1,000 per month, and it is expected that before the peak is reached the number of beds on request will approximate 30,000 to 35,000. It is estimated that the peak will not be reached before 1927 to 1929.

"The public health service now has, or in the near future will have, under operation hospitals providing approximately 19,878 beds. Of this number of beds 10,347 are in hospitals of flimsy and inflammable construction or in hospitals leased by the service under leases which will expire at certain periods after the declaration of peace, or are otherwise not to be counted upon in the program for permanent care.

"An analysis of the 19,019 war risk insurance patients in hospitals of the public health service for the week ended January 1, 1921, shows that they were distributed according to disease as follows: Tuberculosis, 7,589; neuro-psychiatric, 5,680; general medical and surgical, 5,743; total, 19,019.

"The most pressing need is for tuberculosis and neuro-psychiatric patients.

"For tuberculosis patients there are 7,431 beds in hospitals operated by the public health service and 1,000 beds in

beds for general medical and surgical patients.

"In round numbers 10,000 beds are urgently needed, of which the beds for tuberculosis and neuro-psychiatric patients are of the greatest urgency.

"At the estimated cost of \$3,000 per bed, 10,000 beds urgently needed would require an appropriation of \$30,000,000."

Midnight Fire Sweeps Graves in City of Dead

Santa Barbara.—Midnight in a silent city of the dead is not exactly the expected place for a fire, but a blaze which originated in the little chapel in the Santa Barbara cemetery swept over numerous mounds, raising wooden headpieces and otherwise doing considerable damage to stone and marble monuments nearby.

The cemetery chapel, valued at \$2,000, was totally destroyed. Hoboes sleeping in the chapel are said to have been responsible.

Fit of Coughing Saves a Fit of Coffin

Huntington, W. Va.—Five years ago Carl Jacobs, while chewing a piece of locust wood, "inhaled" a thorn which had come from the bark. Since then his health has been bad and he has suffered violent pains in the chest. It was feared he had tuberculosis. He's recovering now following a fit of coughing in which the thorn was expelled.

The common king snake is an enemy of the rattlesnake and often kills it.

British and U. S. Roads Compared

Bureau Reports Greater Efficiency at Less Cost in the United States.

710 TONS IN TRAINS HERE

In Great Britain Average Is 150 Tons of Freight—Would Take Three Times as Many British Cars to Handle Our Loads.

New York.—The bureau of railway economics has prepared a memorandum comparing operating results on British and American railroads, which shows that the average trainload in Great Britain for the six months to June 30, 1920, was 150 tons, while that for the United States for the same period was 710 tons. Operating and traffic, as well as geographical, conditions in the United States and England, it is explained, are so different that comparisons of train or car loading may be considered misleading, but it is pointed out that a direct comparison, designed to set out the differences in detail, must have some value, especially when all the factors in the comparison are taken into account.

The average freight train load in the United States in 1888 was 176 tons; in 1898, 226 tons; in 1908, 252 tons; in 1918, 628 tons, and in 1920, for six months, 710 tons. Every decade from the first has shown marked advances, with the curious coincidence that in 1888 the average trainload in this country was greater than the British average for 1920, while the American average for 1888 was almost the same as that for one or two of the individual companies that top the list in England today.

NATION IN DANGER

Farm Abandonment Has Created Most Serious Situation.

Food Supply Threatened Through the Drift of the Population to the Cities—Now Is Great Opportunity to Take Up Land.

The question, "How is the country to be fed if the population continues to drift to the cities?" is one that should create an agitation that will bring about a reply that will mean a solution. The census, recently completed, reveals a situation truly alarming, one that has never been known in the United States before. The urban population is now greater than that of the rural districts by about 4,000,000. Cities and towns, each with more than 2,500 inhabitants, contain 54,318,032 persons, or 51.4 per cent of the total population, while the farms and smaller towns together claim only 51,399,739 persons, or 48.6 per cent of the total.

As is pointed out by an influential Chicago daily, "the drift to the cities is thus proved and, reduced to figures, showing a top-heavy condition of the industrial life."

Farming is and must remain the basic industry of the world, and certainly should remain the basic industry of a nation with a continental area like ours. It is small profit to gain the markets of the world with manufactured goods if agriculture has decayed so badly as to furnish an uncertain subsistence for our people, and fluctuating crops are reflected in price changes that upset the economic life of the country. Yet we are within measurable distance of that condition, if the present or recent drift toward the cities continues.

Most writers on this topic take it for granted that young folks go from farms to cities merely to make more money. Doubtless that is something of a motive at all times and was a very strong one in the period immediately after the war, when city industries paid wages totally impossible for farmers to rival.

It is hoped that this drifting has reached its apex. Unless it has, and there still remains a possibility of its continuance, the effect cannot be foretold. The great wave of manufacturers for war purposes has ceased, and with it the number of those employed in factories is diminishing by thousands daily. It is therefore hoped that there will again be heard the slogan, "Forward to the Land." If prices to which farm land has reached are prices prohibitive to many, the opportunity is still open elsewhere. There are states possessing large areas of good land that may still be had at prices within the reach of many, and it is doubtless true that in self-preservation it will be necessary to bring these lands under cultivation. The prices are not high, considering their value. Then, too, there are the lands of Western Canada, that hold out an inviting prospect. Reports from there show that the prosperity of the farmers there is not mythical. Farming there is conducted on scientific principles, and the climate is such as appeals. The production amply repays all the expenditure that may be made. The social conditions are of a character that make farm life a pleasure, and tends to keep the young man and young woman from pining for urban life with so many drawbacks. If conditions as above mentioned, showing such a large percentage of population in the cities and towns, continues, they will require food. The opportunity to supply it is by the means suggested. Go forward to the farm, become independent; and become a factor in supplying the world's needs in cattle, sheep, grain and such other commodities as the farm will produce and the resident of the city requires.—Advertisement.

BELLANS FOR INDIGESTION

Soft Music.

One of the piano instructors at the Music School Settlement recently was consulted by a young man who desired a list of "good piano duets."

"Exactly what kind of music do you want?" inquired the instructor. "How difficult? Classical? Operatic?"

"I want some duets," explained the young man. "to play with a young lady I want to marry. I leave it to you."

"Shorn Lambs of Labor" in a Parade

More than two hundred "Shorn Lambs of Labor" took part in a demonstration at Trinity church, New York city. The unemployed, carrying signs, marched from their headquarters in the basement of the chapel of St. Marks-in-the-Bowery to historic Trinity at Wall and Broadway. The banners carried paraphrased scriptural quotations.

TOO CARELESS WITH KISSES

Long distance kisses and a beautiful blonde proved the undoing of Samuel Domko, according to his wife's testimony before Judge Trude in the court of domestic relations.

"I might never have caught him at all if he hadn't picked out an affinity right across the street," said Suzanna, the wife.

"I began to notice a blonde woman across the street, sitting in the window every evening waiting for some one. Finally I caught her waving at him and then he would go up to her

fat. She would also throw kisses to him as he came and went."

"I'll back up her story," said Mrs. Elsie Megas, a neighbor. "We women have to stick by each other. I saw him throwing kisses to her in the mornings when he went to work."

"Kisses—long distance and otherwise—belong to your wife," ruled the judge. "Also, \$8 a week toward her support."

Cactus will impoverish land of which it has possession.

Kill That Cold With HILL'S CASCARA BROMIDE AND QUININE

FOR Colds, Coughs AND La Grippes

Neglected Colds are Dangerous
Take no chances. Keep this standard remedy handy for the next season.
