NEW EXAMINATION. Paris—Doctors examining the new conscription class of 1921, which is to be called to the colors this month, have a new question to put to each youth as he stands before the examiners clad in his "altogether."

"Mr. Gotton Wins." Lexington, Va.—Mr. Gotton of Memphis is bantamweight wrestling champion of Washington and Lee University, but whether his first name is Henry or Nicholas nobody but the Memphis twins know.

Bandit Not Posted. Chicago—A girl novice in the school of banditry failed in an attempt to put her lessons in practice on Harry Baumstein. Accompanied by a man, she met Baumstein. "Put up your hands," she said, pointing a small pistol at him. Baumstein put them up. "Now what do I do?" she asked her companion. Baumstein did it for her. He ran.

Bomb Suspects Discharged. New Orleans, La.—The five seamen brought here from Rio de Janeiro recently, charged with mutiny on the shipping board vessel City of Alton, and suspected of possible connection with the Wall Street bomb explosion, were discharged from custody by United States Commissioner Browne. The men were examined by Department of Justice officials, but no evidence was found which would warrant their being held, it was said.

Hard to Float Bonds. New York—Tightness of the money market was emphasized when City Comptroller Craig on opening bids on \$47,000,000 in corporate stock notes and city revenue bills found that banks had offered only \$28,400,000 of the amount. Interest rates demanded were higher than the city has ever been forced to pay, in some cases running over 6 per cent. Before the war the city borrowed all the money it needed at 2 1/2 to 3 per cent.

FINE CROPS SURE

Farmers in Western Canada Jubilant in Prospect.

splendid Winter Weather Has Put the Naturally Fertile Land in Splendid Condition, and Bountiful Yields Are Assured.

"What a delightful winter we have had," is an expression that could be heard almost anywhere when the topic of the weather became the subject of conversation. Not only in the Middle West and "down east" could it be heard, but also in the Far West, up in the Canadian West.

The same remarkable features that brought forth a wonderful winter existed. Reports from all parts of the country, from famed Medicine Hat in Alberta to Winnipeg in Manitoba, indicate that all through the winter season very little cold weather was experienced. In December, we read that golf playing had put into the discard all ice sports, that farmers were caught "red-handed" plowing their fields. In January, the Alberta yeoman got out his tractor and in his shirt sleeves was seen preparing ground for the 1921 crop. During February, in Saskatchewan, one farmer harrowed fifty acres and planted the seed. "Why, yes, of course, in March," said an Iowa farmer, who had just heard from his son, who was looking after the "Western Canadian farm," "my boy writes me they had some snow, and a few cold days, but what did that matter? The cattle and the horses came through the winter in better condition than they looked three or four months ago. Grass was plentiful on the prairie, the stubble was rich and valuable as food, and the straw stacks and groves proved ample for shelter."

Spring is now fully upon the Western Canadian farmer, his machinery is all in shape for a spring's work, and he is looking forward to an excellent crop year. Last fall there was a splendid lot of moisture that permeated the ground sufficiently to leave a perfect seed bed. Indications are now that the crop will go in in the condition required for successful germination. Then, with the lengthened days of May and June, the many hours of sunshine that they bring, accompanied by showers of rain, and with a soil of which there is none richer nor more generous, there will be seen preparing for a ripening harvest the hundreds of thousands of acres of wheat, oats, barley, rye, alfalfa and corn that will make the hearts of the Western Canadian farmers swell with pride as they reasonably look forward to an abundant harvest.

There is a great deal that can be said in favor of the climate of Western Canada. The most important is that those who live there, and have lived in other countries, prefer it to any they have experienced elsewhere. It is true the winters are a rule are colder than in those in countries lying much farther south, but it is also true that they are tempered by a dryness of the atmosphere that makes a lower temperature preferable to that several degrees higher where greater humidity prevails. Enervation and listlessness are unknown; the air is bracing, but the cold is not penetrating. Then the summers and the autumns—they could not be more enjoyable.—Advertisement.

A Sharp Speaker. Mrs. Sheridan, the beautiful young Anglo-American sculptor who recently went to Russia and made busts of Lenin, Trotsky and the other Bolshevik leaders, succeeded particularly well with her bust of Trotsky.

Mrs. Sheridan, who was Miss Moreton-Frewen before her marriage, said at a dinner party: Trotsky, you know, is famous for his sharp speeches. When I exhibited his bust in Petrograd, a lady said to Lenin: "What a likeness! You can see the quiver on his lips."

"Yes," said Lenin, "and the arrows coming out of it."

Don't Forget Cuticura Talcum When adding to your toilet requisites. An exquisitely scented face, skin, baby and dusting powder and perfume, rendering other perfumes superfluous. You may rely on it because one of the Cuticura Trio (Soap, Ointment and Talcum). 25c each everywhere.—Adv.

His Theory. Wilbur, age seven, rushed into his home after school and his first request was for bread and jam. His grandmother, after complying with the request, jokingly told the boy that he would "never grow up" if he continued to eat so much bread and jam, whereupon Wilbur answered: "Grandma, I believe that's why you're so old. You don't eat any bread and jam."

Married Life. "I gave my husband no cause for fault finding." "That's a mistake. A little fault finding keeps 'em occupied."—Louisville Courier-Journal.

Important to Mothers Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it bears the Signature of *Dr. J. C. Watson* In Use for Over 30 Years. Children Cry for Fletcher's Castoria

Population of Tarsus 8,000. The population of Tarsus, celebrated as the birthplace of St. Paul, has dropped within the last five years from 20,000 to 8,000.

Trace Birds by Use of Anklets

Habits of Our Feathered Friends Discovered by American Banding Society.

20,000 ALREADY ARE MARKED

Incredible Wing Mileage Is Revealed in Some of the Reports—New Facts About Domestic Relations of Jenny Wren and Husband.

New York.—The habits of birds, the age they attain, the dispersal or distribution of their young, their mating customs, the strength of the homing instinct, the consistency with which migrant birds return to given areas in their winter range, routes followed by individual birds, and even polygamy—these and countless other problems the American Bird Banding association seeks to solve by methods that leave no opportunity for questioning the accuracy of the date.

The several hundred members of the association have for 12 years been conducting their research on a large scale in the western hemisphere, and European societies whose aims are identical with those of the American workers have been operating since 1898. These bodies of investigators pursue their experiments by the use of rings, bands of tags, each bearing an inscription or return address and a serial number. The bands are usually made of aluminum and are manufactured in about a dozen different sizes to fit the legs of all birds, from the smallest warbler to the clumsy pelican and the mighty eagle.

Fifty-eight thousand of these bands have so far been made for the American Bird Banding association, and approximately 20,000 have been placed by members on the legs of native wild birds. Each ring is stamped with the words, "Notify Am. Museum, N. Y.," and following this, on or reverse side of the band, is a serial number. At the time the band is placed on the bird the bander records on a standard file card all information relating to the operation. These data include the number of the band, the name of the bird, its age (whether nesting, fledging or adult), locality, date, name of bander and remarks. The bird, having been thoroughly "catalogued," is sent on its way.

Long Migrations Recorded. Workers for the association have carried bands into the remotest regions. As members of scientific and exploring parties they have placed the tags on birds in Alaska, Greenland, Labrador, and even in the antarctic a thousand miles from Cape Horn. A young robin, banded in its nest on the lonely shores of Great Slave lake, in the Northwest territory of Canada, has been reported from Louisiana, more than 2,000 miles away; a Massachusetts tern, or sea swallow, has been recovered a similar distance from its birthplace, in the waters off the Venezuelan coast, and a chimney swift, a bird less than six inches long, has been recorded at its New Hampshire summer home after three seasonal journeys to South America, involving almost incredible wing mileage, the minimum distance covered having been 18,000 miles.

Aside from the birds which are systematically trapped, wild birds, either dead or alive, fall into human hands in a variety of ways.

The longest period record thus far turned in has been produced by a common crow, which was banded in the nearest at Berwyn, Pa., May 17, 1914, and shot while stealing chickens on the sixth anniversary of the date of banding, May 17, 1920, at Phoenixville, Pa., only eight miles from the site of its

birth. The inscription on the aluminum band worn by this bird is as legible today as it was when received from the maker, notwithstanding the six years of rough treatment under all weather conditions. One of the most astounding details of bird life brought out by banding is to do with the domestic relations of Jenny Wren and her songful husband.

Wren is Fickle. Wrens habitually raise two large families in rapid sequence each season, and in these circumstances it would naturally be thought the head of the establishment would give his uninterrupted attention to his household. Not so, however, with an Ohio house wren, who, the moment his first hatch of offspring was on the wing, ruthlessly abandoned his little brown wife and moved off less than a hundred yards, reared his second family with a newly found mate. This abnormal fickleness might never have been suspected had it not been for

PHYSICAL PERFECTION

Here's Another Peril in "Hitting Bottle"

Winchester, Va.—The art of drinking from a bottle is being lost in this vicinity. E. Clarence Smith of Berkeley county entertained a party of men friends at an old-time "pitch" party, at which bottled pop was served. One of Smith's guests had not munched anything for so many years that when he went about it in the old-time way the suction fastened the mouth of the bottle tightly to his lips and it could not be removed.

Finally one of the guests procured a feather and tickled his friend under the nose, provoking a laugh, which broke the connection.

Old Almanac. Burlington, Kan.—W. W. Richards of Lebo believes he is the possessor of the oldest almanac in Kansas. His almanac was printed in 1701, thus being 220 years old. It was printed in Welsh by Thomas Jones.

Insane May Be Cured by Music

Pianist Boguslawski Evokes First Response From Many Stuporous Patients.

DOCTORS WATCH EXPERIMENT

After Two Years' Research Musician Claims Remarkable Results From Music in Arousing Patients From Mental Stupor.

Chicago, March 19.—The Italian woman sat huddled in the corner her thin shoulders shaking. The color came to her blanching skin. She worked her fingers over her face, over the walls; she tore frantically at her fingers with her teeth. The intermezzo of "Cavalleria Rusticana" ended. The woman kneeling in the corner, Adeline M., sagged down. A nurse leaned over her and remarked: "She says: 'Oh, my baby! Baby needs a mother. When am I going home?' Say, you know, that's the first time she's spoken since she brought her here. She refused to nurse her baby."

Moissaye Boguslawski, Russian pianist, who is now living in Chicago, fingered through the "Misereere" from "Il Trovatore." Shudders crept over the Italian woman in the corner and she wept. The tears sped down her

face. She weaved her head from side to side. "Yes, yes," she moaned, "I have a heart—everybody is happy—baby—father—oh, don't forget me!" And she vibrated to the rush of the music, while her mouth twisted into a grotesque smile.

Tries Music as Aid to Insane. It was at the state hospital for the insane in Dunning. Surrounded by "stuporous," or depressed types of insane patients, Mr. Boguslawski sat at a piano running through the emotional gaunt of music. A small audience of alienists watched the experiment.

Can insanity be cured through music? After two years of research, Mr. Boguslawski claimed remarkable results from music on such cases. He has been performing experiments at the Dunning institution, it is said, for the last month. He has been holding "musical clinics."

Psychiatrists and health department officials, as well as Chicago physicians, are watching the experiments at Dunning. At each "music therapeutic" test, as Mr. Boguslawski named his psychiatric process, Dr. D. B. Rotman of the hospital staff has collected data for presentation to the American medical profession for discussion.

"These experiments are the first of their kind ever conducted in the United States," said Dr. Rotman. "They are highly interesting. There is a universal potency to music; it appeals to the entire elements of the mind. Patients long considered dull are aroused by this music to the expression of emotional display. The effect on that Italian woman, for instance, was overwhelming. Now we have found a response, she may be curable."

A Revelation, Says Official. "This is a revelation to me," exclaimed Dr. E. A. Foley, assistant superintendent of the institution, watching the pianist endeavor to arouse the patients from their mental torpor with many varieties of melody.

"I have studied this for two years; I know it will work," replied Mr. Boguslawski. "I don't claim to be able to cure insanity, but I can relieve much mental distress. Probably a third of the 100,000 insane in the United States can be greatly improved by 'music therapeutics.'"

One of the cases studied was Mary K., an Armenian refugee. She was made insane by war horrors. She saw her mother, father and brother slain before her eyes. The Chopin funeral march today brought her to her knees in mumbled prayer. Tragic memories apparently were revived. She fell on the floor sobbing.

"Nostalgia," explained Boguslawski. "An intelligent approach. A relief through the caress of sympathetic music for pent-up desires, suppressions, imagined fears. Music is the scalpel which help open the wound. After that it's a case for physicians, not musicians."

Danish King to Visit Greenland. Copenhagen, Denmark.—The king of Denmark, who is also king of Iceland, will visit Iceland, Greenland and the Faroe islands in the coming summer with the queen. This will be the first time any Danish king has visited Greenland.

FREAK SUGAR NOT VALUABLE Can Be Made From Corncocks and Straw, but Poor Food, Says University Expert.

Lafayette, Ind.—Making sugar from corncocks, straw, sawdust and other materials which have been suggested by chemists at various times recently is quite possible, but there is a question as to whether such sugar has any real food value, according to President Stone before becoming a chemist and was an authority on sugars.

"I prepared sugar from corncocks, from straw and from sawdust in 1898," said President Stone. "These have an entirely different constitution and behavior from the ordinary sugars of commerce. These sugars are not subject to fermentation and the substance from which they are derived, found in corncocks and straw, did not appear to be digestible when fed to animals, as some experiments of mine seem to

show conclusively. So far as the physiological value of these substances, or the sugars derived from them, is concerned, the results of the research indicate that they have little value.

the numerous rings used on all of the characters involved.

Another house wren with a history is the "little old woman who lived in a shoe." She and her husband and their 13 children (reared in two installations) were all banded. No word has ever been heard from the children since they left home, but a year later a wren was seen at the old "shoe bungalow" with a bracelet on his leg, but no mate was near. The observer is left wondering if perhaps there is not a wren Reno somewhere in the South. Of the total of 20,000 birds banded approximately 400, or 2 per cent, have so far been heard from, and additional recoveries are being received from time to time.

What to Do for Disordered Stomach

Take a good dose of Carter's Little Liver Pills—then take 2 or 3 for a few nights after. You will relish your meals without fear of trouble to follow. Millions of all ages take them for Biliousness, Dizziness, Sick Headache, Upset Stomach and for Sallow, Pimply, Blotchy Skin. They end the misery of Constipation. Genuine bear Brand Small Pill; Small Dose; Small Price.

Oh How Glorious to Be Free From Rheumatism's Tortures!

Just suppose you could be free from your deep-seated, agonizing rheumatic aches and pains, your stiff joints and unsightly swellings! Wouldn't you give anything to get rid of them?

You have doubtless rubbed on outside treatments; most rheumatism sufferers have. Some of these take the edge off the terrible pains for a few hours, but they do not strike at the cause, which nearly always lies in the poisoned, impoverished blood. When this is so, you need an internal remedy, one that will take out the impurities that are torturing you, one like famous S.S.S., which has relieved thousands of cases of rheumatism all over the country just this way. Get S.S.S. from your druggist today, and after starting with it write us a history of your case, addressing Chief Medical Advisor, 877 Swift Laboratory, Atlanta, Georgia.

Harvest 20 to 45 Bushel to Acre Wheat in WESTERN CANADA

Think what that means to you in good hard dollars with the great demand for wheat at high prices. Many farmers in Western Canada have paid for their land from a single crop. The same success may be yours, for you can buy on easy terms.

Farm Land at \$15 to \$30 an Acre located near thriving towns, good markets, railways—land of a kind which grows 25 to 45 bushels of wheat to the acre. Good grazing lands at low prices convenient to your grain farms enable you to reap the profits from stock raising and dairying.

Learn the Facts About Western Canada—low taxation (none on improvements), beautiful climate, good schools, churches, pleasant social relationships, a prosperous and industrious people.

For illustrated literature, map, description of farm opportunities in Manitoba, Saskatchewan and Alberta, reduced railroad rates, etc., write W. V. BENNETT, Room 4, Bee Building, OMAHA, NEB. Canadian Government Agent.

HIS REQUIREMENTS NOT HIGH WORDS MADE NO DIFFERENCE

Connecticut Man Merely Sets Forth Qualities He Desires in His Housekeeper. Hearers Might Have Found It Hard to Understand, but Old Friends Were Satisfied.

A citizen of Bristol, who is separated from his wife, advertised here as follows, according to a Winstead (Conn.) dispatch to the New York Herald: "Wanted, a housekeeper; good home, small amount of work; prefer one who can sew on a button or two once a month; do not bar politics; she may be a suffragette, as I hold no political job; prefer one who has had not over eighteen years' experience; she must have the Tuesday dinner dishes out of the sink before Thursday; bear in mind I do not bar any religion, but do not want one who is too religious; now, maids, do not apply for this job unless your age is under 90; decent wages and congenial surroundings. Apply at once."

Too Much Intermission. Bobby, being a great lover of the movies and especially the slides during intermission, always insists on remaining for two shows. I had scolded him, explaining that it took up too much time. We have our luncheon at 12:30 but Bobby is called in half an hour before to give him time to catch his breath and freshen up after his play. He sat in the kitchen watching me put the finishing touches to the lunch. He looked disgusted.

I exclaimed: "Bobby, don't you feel well?" He replied: "Oh, yes, but I think the intermissions are too big in this house."—Chicago Tribune.

In Days of Old. "Your majesty has had a blowout." "Where is my tire woman?" demanded Queen Elizabeth.

Prudes are females who are always looking for temptations to resist.

Antics of a stubborn automobile are enough to make a horse laugh.

Watch Your Step. A drunkard of long standing has been reformed by an operation which removed a bone that pressed against the brain. The Detroit News also reports a number of cures effected by the removal of a brass rail that was pressing against the foot.—Kansas City Star.

Brief Reform. "What sort of woman is Mrs. Gadder?" "The usual kind, I believe."

"After the monthly bills come in and she's had a heart-to-heart talk with Mr. Gadder she practices strict economy for twenty-four hours."—Birmingham Age-Herald.

WORK DAYS AND REST NIGHTS

Can you do it now? If you can't, there's something wrong. Many find coffee a disturbing element, so wisely leave it off and use

Postum Cereal

Postum is a pure cereal drink containing nothing that can possibly disturb nerves or digestion. You'll find Postum has a delightful flavor that fully satisfies.
