**There Are Others**  
 In a man's life there are three tragedies. The first is when he decides he's too old for Lord Fauntleroy curls and mamma decides otherwise because they're so cute. The second is when the high school Beatrice he can't live without marries and he doesn't die. The third is his shape in a bathing suit.—Boston Transcript.

**Her Sense of Fitness**  
 Little Ethel had lost her grandfather. A few days after the funeral she asked her mother if she could play the piano a little while.  
 "No, dear, don't you know that we are in mourning?" her mother replied.  
 "Well," insisted the disappointed child, I don't think it would be wicked if I only played on the black keys."—Judge.

 "I don't like a friend to domineer over me," said the young man with the patient disposition.  
 "Who has been doing that?"  
 "My room mate. He borrowed my dress suit."  
 "That's a good deal of liberty."  
 "I don't mind it, but when he asked for my umbrella I told him I might want to use it myself. But he got it just the same."  
 "How?"  
 "He simply said: 'Have your own way; they're your clothes that I'm trying to keep from getting spoiled, not mine.'"—Los Angeles Times.

**About Your COAL-- NOW and THIS WINTER**

For two years this company has endeavored to procure suitable space on the Railway Company's right of way for its coal bins. At the end of two years it succeeded, and we are now glad to inform our customers that our new bins have just been completed. Our scales are being installed this week, and our first shipments of coal will start with the coming week. From that time you may call our office with every assurance that your coal needs will be taken care of by prompt delivery of good clean Diamond Lump coal.

For your further convenience we have arranged with Ed Ellis to make all deliveries and receive orders at their office next to the Wetzler Building.

Anything Is Possible.  
 While one man says of a thing: "It is impossible!" and contents himself with saying so, another one passes him and does it. This has been the history of the world's progress ever since time began. We cannot say of anything that it is impossible in this marvelous world of invention and endeavor. We can only say: "It has never yet been done."
