Preventative Medicine
The tendency of medical science is toward preventative measures. It is easier and better to prevent than to cure. Pneumonia, one of the most dangerous diseases that medical men have to contend with, often follows a cold or attack of the grip. The cold prepares the system for the reception and development of the pneumonia germ. The longer the cold hangs on, the greater the danger. Take Chamberlain's Cough Remedy as soon as the first indication of a cold appears so as to get rid of it with the least possible delay. It is folly to risk an attack of pneumonia when this remedy may be obtained for a trifle—Adv

THE FAMOUS STORE ALTERATION SALE

WOMEN'S SILK DRESSES

at

\$14.95

starting

Wednesday

April 19

As a sale may be any offering where the price is slightly below the real value, we would use a bigger word than sale on this occasion, if we knew one. In June, this price on such dresses could be a bargain worth clamoring for, so what can we say to impress the importance of such an event, right at the Easter season.

A backward season; continued cold weather, even up into April in the big Eastern markets, and—being on the spot with the cash when big manufacturers were forced to accept cancellations—all contributed to this event.

Many of the models we found were exact duplicates in style, material and workmanship of dresses already purchased and still have called this a remarkable sale. But we did not, and it is to your gain.
