

150th ANNIVERSARY BE CELEBRATED BY HAWAIIANS IN 1928

Tentative plans for an elaborate observation in 1928 of the 150th anniversary of the discovery of Hawaii by Captain James Cook, the English navigator, have been submitted to Bruce Cartwright, president of the Hawaiian Historical society, by Albert Taylor, librarian of the territorial archives.

The proposed program would include a visit to the islands by an international fleet of warships and the minting of an American coin in commemoration of the discovery of the archipelago which was named the Sandwich island after Captain Cook's patron, the Earl of Sandwich.

Taylor pointed out that the celebration would have an almost universal interest in view of the fact that so many nations played a part in the building up of the islands, their civilization, industry and commerce, following the discovery. These he listed as Great Britain, the United States, Russia, France, and Spain. Denmark and Sweden also became friendly with the kingdom of Hawaii and probably would be included in the celebration.

Taylor suggested that the historical society bring the proposals to the attention of Governor Wallace R. Farrington and request that he ask the state department to extend formal invitations to the various governments to send representatives and men-of-war to the islands during the celebration. During the visit the vessels might visit Kealahou bay, island of Hawaii, where Captain Cook was killed on his second visit to the islands.

He also suggested that \$50,000 be minted specially in 50-cent pieces and that this amount be underwritten in the islands.

Toots From The Round House

By Charles Erickson

Extra! A discovery made! Painter A. M. Billingsley was found using a brush on engine 1231 yesterday. What's the matter Bill, is the spray broken?

Mr. Kiely: "Did Machinist Andrew Rodriguez check in this morning?" Timekeeper: "No sir, I haven't seen him." About an hour later in rushes Andy, all smiles and nervous like, with two boxes of Chancellor cigars and fairly shouts "It's a 7 1/2 pound boy Charlie. Pass these smokes out among the boys for me will you? Thanks." Thus was his absence from work explained. Here's to a long and healthy life for the "chip off the old block."

Glad to see terminal locomotive inspector, A. L. Hanson is back on the job. Al received quite a bad injury to his spine a couple months ago but of course the A-1 treatment at our Los Angeles hospital "brought him out of it" and he feels fine.

R. S. Pawley, who has spent the past sixty days resting up in the states of Kansas and Missouri, is back punching the clock at the roundhouse. Bob was pretty much "all in" when he left but sure looks and says he's feeling jake.

Having worked considerably steady the past year Pete Johnson is now taking a little vacation, going to Laguna and Albuquerque. After resting up for a few days Firebuilder Charles Pino is again on duty.

Am very regretful at reporting that Miss Alice Friend was called to Gallup on account of the serious condition of her mother who is in the St. Mary's hospital there. Mr. and Mrs. H. E. Kemmis are spending a few days in Gallup where Harry is attending some business.

Our machine shop foreman, F. C. Blumlein, after returning from his deer hunt in the Kaibab forest, where he got lost and was almost drowned by heavy rains, spent the remainder of his vacation in El Paso and Juarez. He reports things very wet down there also.

Night Roundhouse Foreman R. K. (Musty) Mullins returned to work last night after spending a portion of his two weeks vacation in the mountains hunting big game and the remainder of the time in Los Angeles, accompanied by Mrs. Mullins. Buel Canady, who was likewise on his vacation with Musty, reported for work a few days ago.

Mrs. Gib Hunter, nurse on duty at the roundhouse eye treatment room, left on train No. 21 last evening for Oakland, California, where she was called on account of the illness of her sister.

Pleasing news was received from Tommie Thomas to the effect that she is improving nicely and expects to be back at work soon.

Mr. Ed Collins, a representative of the Oxwell company, is expected as a visitor today, as is E. J. McKernan, general tool supervisor with headquarters in Topeka.

The deer brought in by Wallace Merrick after a week's hunt in the mountains isn't a deer at all. It's a turkey, but Wad says it tasted just as good.

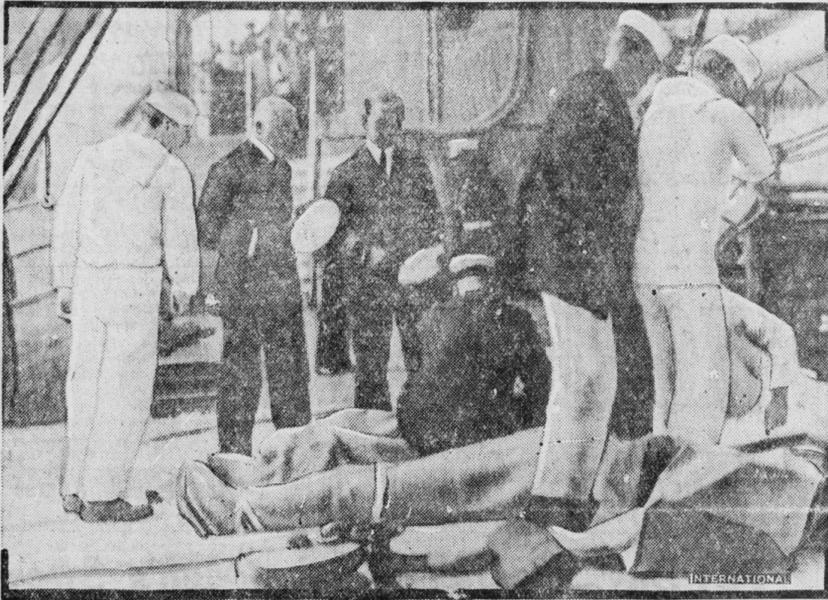

Am very glad indeed, to hear that Fireman T. R. Dick, who was injured a few weeks ago, is improving nicely in the Gallup hospital.

Harvey Nett returned from San Bernardino last Tuesday, where he had been called because of his father's illness. We are glad to know the sick man is getting along quite nicely now.

The regular monthly shop council meeting for October will be held in the apprentice hall this evening at 3 o'clock. All who can should attend.

Oh heck! The world series is over once again, and the youths of Pittsburg won the high honors over the elderly players of Washington.

Victims of Submarine Disaster Brought Up by Divers

Photograph transmitted from New York over the wires of the American Telephone and Telegraph company shows Admiral Christy and Captain Newton standing by as doctors examine the bodies of two members of the crew of the lost submarine S-51 which were brought up by divers.

The Santa Fe Hospital

By CHARLES ERICKSON

Assuming that many local Santa Fe folks are interested in the fine remodeling of our Los Angeles hospital, I will endeavor to give you the "low-down" on just the kind of a place it is. I might as well start by saying that if any employee has to be given either medical or surgical attention, he could not possibly go to a cleaner or nicer place or receive any better treatment than is accorded him by the Santa Fe Hospital association and its staff.

As most all know, our "human repair shop" has one of the very best, if not the best, location in the city of Los Angeles, for an institution of its kind, four blocks away from the closest street car line, thus avoiding noises that are distasteful to the sick, and affording the beautiful Hollenbeck park, where patients who are able to go out of doors are privileged to stroll about the many pretty drives and pathways, edged with colorful and sweet scented flowers, take it easy on a bench in the shade of gigantic palm trees and listen to the soft notes of happy birds, or watch healthy young folks enjoying a game of tennis. Then there is the lake, where you can go canoeing, and feed popcorn to graceful, pure white swans, ducks and thousands of fish.

Hollenbeck is also one of the most popular parks for moving picture companies to "shoot" comedies and many a laugh can be had. I remember once of seeing two darlings "spoonin'" on the banister of a bridge, when all of a sudden they spied a Ku Kluxer standing by them and both fell over backwards, about thirty feet into the lake. So much for those up and around. Now for the real sick patients, the quiet and pleasant atmosphere is likewise quite helpful, while the dreariness is broken by the sunny dispositions of the nurses, who always go on duty with a cherry "good-morning" and off duty with "Is there anything else I can do for you?" Believe me a hospital is where a fellow can notice the tender care and sympathy of real womanhood, as is exemplified by the untiring efforts of the nurses to comfort and relieve the sick.

It might be well to say that many employees go into the hospital and do not appreciate what I have said above, for they think they should be waited on hand and foot and want to do as they please, just because a small fee has been taken out of their paycheck each month. These fellows, who "raise the roof" have seldom much the matter with them except their mean disposition and do not want to obey the doctor's orders. Just as an illustration, I recall an instance where a man "came in" from San Bernardino, complaining of stomach trouble. Carrying out orders from Dr. Sugarman, the nurse requested this fellow to stay in bed and when noon time came, brought him a bowl of mush and milk. When she told the man, replying to his question, that that was all he was allowed to have, oh boy! how he did roar, and proceeded to tell the nurse that he wanted a steak and something to eat, that he didn't come to the hospital to be starved to death and also that he had paid a dollar and a quarter a month to the hospital fund for several years and he didn't see why "I can't have what I want to eat." Remember this patient entered the hospital for treatment on account of stomach trouble too. Pretty good to enlist a physician's advice and then tell him what to prescribe eh? Yet there are many who do just that. I will say that if patients "do as they're told" while in the hospital, they profit. Having occupied a bunk there myself for eight whole months in 1922, during which time I saw hundreds come and go, I claim to know just a little bit about it. In fact when I left I was contemplating "hangin' out my shingle."

Well, here I've raved a lot and could keep on but guess I better stop. It's a good thing I spent my spare change in Sunny California recently or I'd had to kiss it good bye because I wanted the Senators to win.

get the "remodeling" part of this article before I run out of paper.

The building itself is surrounded by grounds quite in harmony with the park "just across the street" which I have previously diagnosed.

Where formerly were the convalescence and foreign wards, we now have a fine three story wing and a ground floor consisting of forty-six rooms in all, with the addition of a splendid first class operating room, X-Ray room, eye, ear, nose and throat operating room and a bandage dressing room on the third or top floor.

The surgical and medical wards are now being used for foreigners. These wards have thirteen beds each, while the new rooms have from one to four beds, which when all are occupied, the hospital will accommodate 130 patients.

There are three wonderful sunporches built on the new wing and each equipped with a fine radio set presented to the hospital by the Order of Railway Conductors. All and all we have a very good "back shop" for our employees, and it will be still better when a duplicate of the new part is built on the other wing.

Including many specialists, there are about 25 doctors on the staff, 35 nurses, and believe me all pretty girls aren't in the movies, 12 housekeepers and janitors and about a crew of ten in the kitchen and dining room.

One thing about this hospital of ours, is that they either kill or cure you. That's all I have to say.
