MUST BE PRETTY FAIR SORT OF MAN TO GET BY DRAFT EXAMINATION

Doctors To Examine Registrants In Their First Birthday Suit For Ailments, Diseases, Deformities Or Anything That May Disqualify Them For Service.

A list of the disabilities on which a man should be exempted from the selective draft army will be in the hands of the physicians who are to make the physical examinations. The rules prescribe that all men presenting themselves for examination must be stripped. A standard height, weight and chest measurement is first set forth for the guidance of the physicians. These figures range from a height of five feet and one inch to six feet and six inches. The standard weight for a man five feet and one inch tall is given as 118 pounds, his chest deflated at 31 inches and inflated at 33 inches. For a man six feet and six inches tall the standard weight is 211 pounds, chest 38 1/2 and expansion four inches. Variations in weight and expansion are permissible for qualification as follows: Height, 61 to 64 inches, a variation of 8 pounds and 1 inch in chest expansion; 64 to 68 inches tall, 10 pounds and 2 inches; 68 to 69 inches, 12 pounds and 2 inches; 69 to 70 inches 15 pounds and 2 inches; 70 to 73, 20 pounds and 2 inches; 73 inches and over, 24 pounds variation in weight and 2 inches in expansion. (To be acceptable for military service a man below 5 feet and 4 inches in height, the rules direct, must be "of good physique, well developed and muscular." "Unless exceptionally well proportioned," the rules also say, "men above 6 feet and 6 inches in height should be rejected." Causes For Rejection. Causes given in the rules for rejection of men for military service include the following: Mental, lack of normal understanding. 2509 Wm. Pruitt—Humboldt. 2554 Frank Rainero—Jerome. 1313 August C. War To Cost Each Family In America \$848 A Year

ARE YOU READY WITH YOUR SHARE OF UNCLE SAM'S STAGGERING EXPENSES FOR THE FIRST YEAR OF CONFLICT?

(By Basil M. Manly) WASHINGTON, August 4.—Have you \$848.57 for your Uncle Sam this year? That is what he is going to need, the coming 12 months, from the average American family to pay the staggering cost and ordinary government expenses. Some families will have to pay more in loans and taxes. Some will pay much less. Some, who pay only through indirect taxes, will not realize just what they are contributing; but—all will pay.

Table with columns: Category, Amount, Total. Includes Army, Loans to Allies, Navy, Merchant Ships, Aviation, Deps. and Misc., Postoffice, Pensions, President's War Fund, Food Control, Interest On Loans, War Risk Insurance. Total—Passed and Pending: \$16,971,414,291 \$848.57

A compilation of the appropriations passed and pending for the fiscal year ending June 30, 1918, shows a total of \$16,971,414,291, of which about \$9,250,000,000 has been authorized by congress, and \$7,750,000,000 is still to be voted. For each of the 20,000,000 families in America this means an average of \$850 in round figures, and for every man, woman and child an average of \$170. What is Uncle Sam buying with these enormous sums? The army is the biggest item, with \$2,684,000,000 already appropriated and \$5,000,000,000 more required—\$384.22 from the average American family for the army. Next comes the cost of loans to the Allies, \$3,007,000,000 already, including the cost of printing the bonds, etc., and \$2,000,000,000 more to be provided. This will amount in all to a loan from each American family of \$25.35. Of course, these loans are the debts of our Allies, but the money for them must be raised. The third item is the navy, which has had \$1,034,000,000 and asks for \$100,000,000 more—total \$61.76 per family. Merchant ships to the amount of \$405,000,000 have already been authorized and \$500,000,000 more will be asked—\$45.25 per family. Aviation has been voted \$640,000,000 and the navy is asking for \$45,000,000 more—a little item of \$34.25 per family. For the expenses of congress, the executive department and all sorts of miscellaneous items (not including the postoffice)—there has been \$516,000,000 and they are coming up soon for \$176,000,000 more, including a nice little item of \$26,893,000 river and harbor "pork"—making an aggregate of \$33.33 for the average family. The postoffice has \$331,000,000, all of which must come out of the pockets of the nation in the form of postage—\$16.59 per family. Pensions cost \$160,000,000—\$8 per family. The president has a lump sum of \$100,000,000, a large part of which is understood to have been spent for ships—\$5 per family. War risk insurance funds of \$45,000,000 have been voted—\$2.25 per family. Finally, there is a little item of \$70,000,000 to pay the interest on the Liberty Bonds already issued—\$3.50 per family—which is just a foretaste of the rapidly mounting interest charges that will have to be raised when the costs are paid with bonds. And this may not be all; there are strong movements for higher pay for the soldiers, more airplanes, more submarines, and a comprehensive insurance scheme—which would make even the staggering total of \$7,000,000,000 mount like the thermometer's mercury on a hot day.

COUNTY RECORDS TO BE TYPED HEREAFTER

MACHINES REPLACE THE SPENCERIAN METHOD; BIG SAVING WILL BE EFFECTED BY USE OF THE WRITING MACHINE

(From Tuesday's Daily.) Aiming to effect a saving of about 75 per cent in time and almost that in space, the county recorder's office is now transcribing all documents on a typewriter. Recorder Edith Ruffner has relegated the hand-written transcript to the past. A wide-carriage machine has been put in, and one book of records made on it. Hereafter, as books are filled up by hand, they will be replaced or followed by loose-leaf books, in which all documents will be typed. The typewriter does four pages while the Spencerian script covers one page by the typewriter, that took nearly four pages by hand. In this way, there is a saving both of the time of the deputies and of the stationery. An investigation was made of the machines which type documents directly into bound books, but it was found that in order to operate them successfully, it is necessary to keep an expert repair man handy, as the machines get out of order so easily. Several other county recorders use these machines, and find them excellent, but their forces are composed of men and include one or two deputies who are able to make repairs. TWO SEEK DIVORCE (From Friday's Daily.) Two divorce complaints were filed in the Superior court yesterday, each charging desertion. William M. McCall seeks separation from his wife, Beulah McCall. They were married in Los Angeles on September 20, 1913. Andrew Peterson is suing Ramona Peterson on the same grounds. They were married in December, 1913, at Congress. ed from the present drawing, but that the ranks would be kept full out of the list thus obtained, adds to the certainty that virtually every man who is registered and has no good excuse for exemption will find himself in a uniform unless peace comes sooner than any one really looks for.

MISSING GIRL WAS FORMER RESIDENT

(From Sunday's Daily) The disappearance about two weeks ago from San Diego of Miss Margaret Haggott, the 15-year-old daughter of Mrs. Martha B. Haggott, is of local interest, the mother having been a former resident of Prescott, a sister of Henry Hartin. Los Angeles papers are giving this affair much publicity, while police officials throughout Southern California are moving energetically to find the missing girl. Mrs. Haggott is now in Los Angeles, and is being willingly assisted in her vain search by many people. She gives as a reason for her daughter leaving home so mysteriously her despondent mood ever since the death of her father, E. A. Haggott, which occurred a few months ago. It is believed the girl has wandered far away, not the slightest trace having been obtained of her whereabouts since she left home.

ESCAPES THE DRAFT BUT CUPID MAKES HIM TOE THE MARK

(From Sunday's Daily) C. A. Whetson a young mining engineer, who left this section for Peoria, Illinois, to appear before the military board for examination, returned Friday, and stated he had been rejected on grounds given as defective eyesight and one of his ears being useless. He is to resume his mining work in this field, and will remain until Winter, when he leaves for the south. He meets in a few weeks at Tucson a young lady of Clinton, Iowa, when their marriage will be solemnized in that city. Immediately after the ceremony they come to Prescott. "If Cupid were as exacting as the military experts I would loose out all around," he informed friends yesterday. Mr. Whetson will probably become interested in mining in this section. His brother is with the Canadian Mines Co., Limited, of Montana, and is arranging his business to come to this county to remain.

STRIKE HIGH GRADE SHOOT IN THE PERRY

(From Friday's Daily.) Arrivals yesterday from the Perry camp, in Hassayampa district, state a strike of high grade silver ore has been made in the shaft at a depth of 110 feet, the paystreak being two feet wide. The values are not known, but the ore content is characteristic of a bonanza condition being developed. This property is under operation by W. S. Wilhelm, and is equipped with a new hoist and air compressor. Its return into a paying class revives its early history of over a third of a century ago when it was active, shipping to Colorado smelters several tons that ran as high as 1,200 ounces to the ton.

NURSES ASKED TO REGISTER FOR WAR

(From Tuesday's Daily.) Prescott nurses who have graduated from hospitals, and are entitled to bear the title "trained" are asked to register for war service. A movement intended to result in recording the desires of all trained nurses in the Pacific coast division has been started by the Red Cross at San Francisco, and Miss Lillian L. White of that city has charge of the work. She has written to Mrs. Edith Calles, of 327 South Marina street, this city, to ask her to interview all trained nurses in the Prescott district. The Red Cross wants the name of every trained nurse, and with it, wants to know whether or not she will be willing to enter service in France or England. Those who do not want to go abroad may be used in this country, if they so desire. Mrs. Calles will see a good many of the nurses, but is bound to miss some of them, unless all see this notice and will call her up on Phone 233 R. Mrs. Calles will send the information she receives direct to Miss White.

EXCEPTIONAL CASE YIELDS TO SURGERY

(From Sunday's daily.) It will be learned with very much interest as well as pleasure by the many friends in this county of Homer Hixon that he is assured of recovering the use of both limbs through surgical operations performed during the past two months by Mayo Brothers, of Rochester, Minn. He arrived in Prescott yesterday, and is en route to his home in Thompson valley, where he is quite largely interested in land and cattle. Hixon's affliction dates back to 1902, when from complications arising after an attack of typhoid fever, he lost the use of both legs, and for over 15 years has used crutches. One of his limbs is being rapidly restored, and in a few months he returns to complete the operations, when it is stated he will have the full use of both legs.

MINER DIES

(From Friday's Daily.) O. H. George, a miner of Turkey Creek district, who was brought to the city a few days ago, for medical treatment, died yesterday. He had been a resident of this county for over 15 years, and was aged about 60 years. He was a native of Illinois. The body is at W. M. Poulson & Co.'s.
