THE MEXICAN GOLD & SILVER RECOVERY CO., LIMITED.

Issue of increasing the issue of Mr. McKinley is curtailing it, much to the disgust of the hungry people. He is keeping it back because he thinks it will be needed to get the tariff bill through, and for the same reason he has not made the modification in the civil service rules that he has decided to make.

Another argument in favor of the election of United States senators by popular ballot is furnished in the recent contest in Kentucky. It is estimated that it cost the state over \$50,000 to elect Debee. Had the choice of candidates been submitted to the people at general election, no extra expense whatever would have been incurred.

A little girl was told the moon was made of green cheese, and she consulted a learned preacher. He told her she must read her Bible and ascertain the truth. She asked where she could find it. The minister told her to commence at Genesis and read until she found it. This little lady did, and came running to the preacher and exclaiming: "I've found it, and it isn't true for God made the moon before he made cows."

If the Dingley tariff bill, which is now receiving the attention of our statesmen in the senate, contains an original clause when it reaches the president for his signature, a great change of mind and tactics will be necessary. The Los Angeles Herald views the situation:

The tariff bill is fearfully and wonderfully made. It reminds one of the justly famous serpent that "Wired in and wired out, leaving the people still in doubt whether the snake that made the track was going out or coming back."

It is the general disposition in Congress to regard the trip to Europe upon which Senator Welcott, ex-Vice President Stevenson, and General Paine will start this week, with credentials authorizing them the negotiators with European governments in behalf of international bimetallism, as nothing more than a pleasant summer junket for these three gentlemen. There are not a dozen men in Congress who seriously think international bimetallism more than a dream, concocted to stave off an independent settlement of the financial question by this country.

SENATOR JONES OF ARKANSAS, who is regarded as a tariff expert as well as one of the most careful political observers of the time, said of the present situation: "This tariff bill means the disruption of the republican party. The taxes imposed by it will be resented by the people. New England will certainly go democratic on the question of a duty on hides, but the lesson that will be taught by this one item might be applied to every other section of the country. The next house of representatives will be democratically a very large majority." Senator Jones, in reply to a question, said he thought the debate on the tariff bill, which is to begin on the 18th inst, would last until about the first of July.

**The Grandest Remedy.**  
Mr. R. B. Greeve, merchant, of Chilhowie, Va., certifies that he had consumption; was given up to die, sought all medical treatment that money would procure; tried all cough remedies he could hear of, but got no relief; spent many nights setting up in a chair; was induced to try Dr. King's New Discovery, and was cured by use of two bottles. For three years has been attending to business, and says Dr. King's New Discovery is the grandest remedy ever made, as it has done so much for him and also for others in his community. Dr. King's New Discovery is guaranteed for coughs, Colds and Consumption. It don't fail. Sold by Chenoweth & Mix, Nogales, Arizona.

George E. Bent came in from El Plomo Tuesday and went on to Chicago. He has given up the management of El Plomo mine and will go to South Africa in a short time to take charge of some big mines there for his company. Mr. Bent leaves many friends in Nogales who will miss him. Mrs. Bent is visiting relatives in Nova Scotia.

FRANCIS E. WILLIAMS SAYS: "We need more men and women with iron in their blood and granite in their backbones." Ordinary men, flesh and bone make very poor men and we are a little dubious about accepting the amendment in favor of women with an iron constitution and a granite skeleton.

## NO MORE CRUEL WAR.

The Yaquis Sign a Treaty of Peace

And Agree to Take Their Land in Severalty.

The End of a Fierce Guerrilla Warfare That Has Lasted for Eleven Years.

The long and tedious war between the Yaqui Indians and the Mexican government is at last settled by a treaty of peace satisfactory to both sides.

Col. Francisco Peinado, of General Torres' staff went to Hermosillo Tuesday to make final arrangements for ratifying the treaty and he was met there by Juan Maldonado, chief of the Yaquis, who signed the treaty for his tribe.

The papers of agreement have all been arranged and Sunday at Ortiz, the final signatures and ratification of the treaty will be made. Chief Maldonado of the Yaquis will be there with between four and five thousand of his followers, two thousand of whom are well armed, and all the high state officials of Sonora and the Mexican army will be there with government soldiers.

It might not be out of place to say that the Yaquis at Ortiz are the best drilled men in Sonora and they are hard fighters.

The Yaquis are to take their land in severalty and promise to be good, thus ending a war that has lasted for eleven years.

The Mexican government had tried for years to get the Yaquis to take their land in severalty but they stubbornly refused to do so and in 1886, a large number of Mexican troops were sent down there to protect the settlers to whom the government had granted land. The Yaquis immediately raised an armed force and commenced to kill off the soldiers, burned all the canoes, launches and boats about eight hundred in all belonging to the Indians to prevent them from having flotillas with which to do battle on the water. The government had about 8,000 men in the field in the Yaqui country at that time and most of them were killed off by the nery Yaquis.

There has been a guerilla war continuously since until the present time, when the final amicable settlement has been made. The land that has been in controversy is well worth fighting over as it is the richest in the world and it will be divided up with about twenty-five acres to the family. The land will produce almost anything planted and the climate is a healthy semitropical climate. If the same land was in the United States it would very readily bring \$500 an acre. Coffee, hemp, indigo, tobacco and all such stuff can be raised in abundance.

The settlement of this controversy will be worth untold thousands to the state of Sonora and now the country will be more rapidly developed.

### CRISP NOTES.

**Duquesne and Washington Camp Notes.**

The concentrating plant is turning out tons of rich concentrates.

The contractors are pushing the work for the Jerome parties on the Pride mine.

Negotiations for the purchase of the Pool group, have been discontinued for the present.

Dennis Coughlin is developing a fine copper prospect over in the Granite country west of camp.

Hon D. G. Chalmers in in camp on mining business connected with the Pool group in which he has a large interest.

N. H. Chapin, the Washington Camp merchant, is capturing more than his share of trade. The miners and ranchers from far and near come to patronize him.

Richard Farrell of Harshaw, is supplying the Empire Smelting Company with iron for flux from his mine located between the old American and Buenose mines.

"Actions speak louder than words"—ask your grocer if we really mean money-back if you don't like Schilling's Best tea.
