SUBSTITUTION OF SILVER

The day that is coming will see gold and silver after the war as seers before, and before the end of the war it is prolonged much further. We have it from L. C. Shepton, among foremost miners and bankers, that this will be the case, in an address before the Arizona chapter of the American Mining Congress at Douglas last week.

The substitution of silver for a large part of the currency of the world, Mr. Shepton states, anteverses the war is complicating and will continue to complicate as more and more finding development of their new silver is brought to the notice of the home. Development and mining of silver is needed.

Upon the maintenance of the copper, and the implementation, the extraction of present metal, is that the cooperating and government of silver that may contribute to the preservation and the officers of the silver and the balance of the silver is not on the horizons of the bank. 

UNFAIR ADVERTISING

The Miner is in receipt of an article from the Nation Bureau of Mines that we believe to be unfair to the manufacturers of stone. It is a letter to the editor of the Nation Bureau of Mines that is in the making.

The letter is signed "The Editor," and it states that the letter is addressed to the editor of the Nation Bureau of Mines, and is to be printed in the Nation Bureau of Mines.

ELECT DEMOCRATIC CONGRESS

The elections held in New York last Tuesday to fill congressional vacancies caused by the resignations of several members of the Democratic caucus, resulted in the election of four Democrats by increased majorities.

Nearly 50 per cent of the vote was cast in favor of the Democratic candidates, and this is the largest majority ever recorded in any election in New York.

The results of the election are as follows:

Republican: 1,200

Democratic: 2,500

The Democratic candidates were endorsed by the Labor and Anti-Saloon tickets.

CENSURING LAPOLETTA

After weeks of jockeying the Wisconsin legislature has at last reached a vote on the bill known as the "Lapolettा Bill." The bill, which is designed to cut down the amount of money spent on the government, has been passed by the legislature and is now awaiting the signature of the governor.

The bill is in the best interests of the public, and is expected to save the state many thousands of dollars annually.

The readers of the Miner are urged to write their representatives in Congress and express their approval of the bill.

ELECT LOYAL MEN TO PUBLIC

"The people of the United States have an important duty to perform this year, as the winning of the war is approaching. The men who are placed in office to watch and guard the public interests are necessary to their continuance.

One hundred per cent Americans are needed. Only loyal Americans may be put in our public offices."

Our sentiments exactly.

MAY INCREASE COPPER PRICE

Owing to the increasing pressure of the copper and the constantly increasing cost of production, it has been reported that the price of copper may be increased.

The increase is necessary in order to be able to meet the increasing costs of mining and transportation, and to provide a fair return to the copper companies.

It is possible that some of the lead and tin mines will be either operated by the owners or by the government. The war makes copper, lead and zinc necessary and every patriot should see that enough for all requirements is produced.
