INFORMATION DEPARTMENT

Commercial inquiries answered and information gladly furnished without cost. Address any firm above.

Marbles From Arizona Onyx

Prescott.—Two hundred and forty thousand marbles, of all the delicate hues of the finest onyx, soon will be on the market and later on the streets and in the school yards of this country as an American product sold for the first time in competition with German-made "taws" so dear to the heart of the boy. Not only American-made, but quarried and polished in America, are these "Yavapai agates." Several small shipments of the product of the Mayer onyx quarry already have been shipped to the manufacturer.

Ludendorff to South America

Berlin.—General Ludendorff, chief of staff to former Marshal von Hindenburg and quartermaster of the German army, is going to South America. The former army chief plans an extensive tour, embracing Argentina and Chile.

Pre-War Dollar Worth 72 Cents

Chicago.—The pre-war dollar now is worth 72 cents when spent for meat and 68 cents when spent for other foodstuffs, according to a statement made public by J. T. Russell, president of the National Association of Meat Councils. Eighteen months ago, Mr. Russell said, the pre-war dollar was worth 52 cents in the retail meat market, and a year ago 62 cents.

Pope's Fortune Small

Rome.—Vatican officials got a surprise when the strong box containing the personal fortune of the late Pope Benedict XV was opened. It was found to contain only 700,000 lire (normally \$135,000), whereas it had been expected that the pontiff possessed at least 2,000,000 or 3,000,000 lire in money.

Bandits Aaxed Guilty

Detroit, Mich.—Alec McLean, 44 years old, and James Logan, 22, pleaded guilty in Federal Court here to the robbery of a Canadian mail truck Oct. 7, last, when registered packages with a reported value of \$25,000 were taken.

Hot Water Bottles for Liquor

Harrisburg, Pa.—Use of hot-water bottles for liquor transportation was discovered, local prohibition enforcement agents said, when Frank Lochbaum of Chambersburg lost the check for a suitcase he had left at a railroad check room in Chambersburg and was forced to describe the contents to obtain his property. He was arrested when an officer heard him describing the contents of the case. Five hot-water bottles, filled with liquor, were in the suitcase.

Murderer Gets Reprieve

Nashville, Tenn.—Ashbury Fields, sentenced to die in the electric chair for murder, was given a thirty-day respite at the state penitentiary by Governor Taylor on his plea directing that he was "not ready to die" and that he wanted the extra time in which to "prepare to meet his Maker." Fields was convicted of knocking a man in the head with a hammer and killing him after he had enticed him into a forest on the pretext of selling him some whisky.

Novelties in Undermuslins; Girdles of Many Sorts

NOW that the season for spring sewing is on, when women occupy themselves with replenishing their own and their children's undermuslins, we find that many novelty garments invite the attention of the seamstress. The annual "white sales" which supply the material for this seasonal sewing, have blossomed out with new color, new cloths and new modes of trimming—when there is trimming. It remains to be seen whether the in-

Pajamas of Cotton Crepe

duction of color and ingenious new decorations will last or not, but manufacturers have faith in it and have made nainsook, batiste and other cottons in almost as many colors as we find in silk underwear. It is not worth while to put much work on the short-lived, soon outgrown garments for children. Manufacturers are showing such sensible garments as the pajama pictured here. This is made of cotton crepe, cut in one piece, with kimono sleeves, and has long pantaloons ending in a flounce at the ankles. The required fullness is gathered in at the front and back

Girdles

and the pantaloons attached to the body across the back by means of buttons and buttonholes. Muslins, printed cottons, and satens are also used for these garments. Jacquard crepe, in white or colored designs, and satens are used for pajamas in new types, for grown-ups also and they are easier to make than the regulation model. It was a happy thought when someone decided to use the season's fashion

ground of vivid green surface. Metallic face and solid metal cloth also are being offered in spring designs and are having active sales.

To Finish Children's Rompers. An easy way to finish children's rompers at the lower edge is to put elastic with the part to be gathered under the presser foot, just enough to hold, then stretch the elastic and sew, folding in at the end. Place button and buttonhole just outside the elastic ends.

The Kitchen Cabinet

Are these the choice dishes the doctor has sent us? Is this the great poet whose works so content us? This Goldsmith's fine feast, who has written fine books? Here, in a sense, is good meat, but the devil sends cooks—David Garrick.

WHAT TO EAT
A very pretty apple to serve on the plate with a slice of cold boiled or roasted ham is the following:
Rosy Apples.—Core and peel very smoothly enough even-sized apples to serve; cook in a sirup of equal quantities

of sugar and water, or a thinner sirup may be used if desired, adding two or more tablespoonfuls of the tiny red cinnamon drops and basting the apple while cooking, with the red juice. Do not cook until the apples lose their shape or the sirup its beautiful color.
Glazed Onions With Steak.—Cook small, even-sized onions until soft, but firm enough to hold their shape. Make a sirup of one cupful of sugar and one-half cupful of stock; cook to the soft-ball stage; add the onions and continue to cook for two or three minutes. Lift out when the sirup begins to discolor and place the onions around the steak on a hot platter.

Tongue for Luncheon.—Boil the tongue until tender, in meat stock that has been seasoned with carrots, onions, parsnips, sweet marjoram, chervil and a very little mint, adding salt and pepper, celery, salt and cayenne to taste. When the tongue is well cooked remove the skin, brush over with beaten egg and straw with fine bread crumbs. Bake for half an hour to brown the crumbs, basting every eight minutes with vinegar and water in equal parts. Remove from the oven and let get cold. Place on a long platter and slice into thin slices, allowing it to retain its shape. Spread a thick mayonnaise over triangles of toast; decorate these by covering with thinly sliced pimentes, and arrange them around the sliced tongue. Garnish with parsley.

Orange Layer Cake.—Cream one-third of a cupful of butter, one cupful of sugar and two egg yolks. To this add one-fourth of a tablespoonful of salt and the grated rind of an orange. Sift together one-fourth of a teaspoonful of soda, one and one-half teaspoonfuls of baking powder and one and one-half cupfuls of flour. Add this alternately to the first mixture with one-half cupful of orange juice; add the whites of the eggs beaten stiff and pour into well-buttered and floured cake pans. Put together with the following icing: Take three tablespoonfuls of orange juice, the grated rind of one-fourth of an orange and sufficient confectioner's sugar to spread.

Now, blessings light on him that first invented this same sleep! It covers a man all over, thoughts and all. Like a cloak, it is meant for the hungry, the thirsty, the heat for the cold, and cold for the hot. It is current coin that purchases all the pleasures of the world cheap, and the happiness that sets the king and the shepherd, the fool and the wise man, even.—Cervantes.

MORE GOOD THINGS

For those who are fond of fish the tuna will be an especial favorite.

Tuna Loaf.—Take one large can of tuna fish, flake with a fork and remove all bones and skin. Add one cupful of bread crumbs, one teaspoonful of lemon juice, one teaspoonful of chopped green pepper, two eggs, paprika and one teaspoonful of salt. Mix all the ingredients together, roll in the form of a firm loaf, roll in flour and place in a greased bread pan. Dot with bits of butter and bake thirty minutes in a moderate oven. Serve unrolled on a hot platter with:

Sauce for Tuna Loaf.—Melt one tablespoonful of butter in a saucepan, add two tablespoonfuls of flour and mix well, add slowly one cupful of milk, stirring constantly, and cook two minutes. Remove from the fire and add one egg yolk well beaten. Season with salt and pour around the fish loaf.

Apple Ice.—Cut up six large tart apples and boil with four cupfuls of water the rind of one lemon until soft. Drain, add two cupfuls of sugar and boil for three minutes. Add the juice of two lemons and the juice of an orange and freeze.

Pecan Cookies.—Cream one-half cupful of butter and one cupful of brown sugar together; add two eggs, one at a time, beat well, add one cupful of honey and one teaspoonful of vanilla extract; then add one cupful of chopped pecan meats, one-fourth of a cupful of milk and one-half teaspoonful of salt. Add a teaspoonful of baking powder to one cupful of flour, making more flour, if needed, to roll out and cut in diamond shapes. Bake on greased tins in a brisk oven. These cookies are better when they are kept a few days.

Want to Spend \$15,000,000. The Massachusetts department of public works wants to spend \$15,000,000 a year on roads and bridges of the state during the next 20 years.

Bonds for Good Roads. Pennsylvania has just sold \$11,200,000 bonds bearing 4 1/2 per cent interest—the last of a \$50,000,000 issue for road work—for \$104,311, which shows that, however the market for other bonds may be, there's a mighty brisk demand for nontaxables.

Alfalfa Fed to Horses. Alfalfa has been fed to horses with good success and with excellent success when the amount is limited. Like other livestock, horses are very fond of alfalfa and inclined to eat too much if they are given all they want.

Cows Freshening in Spring. While it is natural for cows to freshen in the spring it cannot be said to be most profitable, for in the flush time we always find a lower price, while farm work is then most pressing.

Place of Cabbages and Snakes. Cabbages and snakes are the chief features of New Year Island, a tiny speck in the Bass Strait, between Australia and Tasmania. The cabbages are twelve feet high. In four months two soldiers killed 1,050 snakes.

GOOD HIGHWAYS

ROADS CONSTRUCTED IN 1921

Approximately 28,000 Miles Built During Year Just Passed—Materials Lower.

Road building has recovered from the setback received during the war, and prospects are bright for the future. Approximately 14,000 miles of road were constructed during the present season by the states in conjunction with federal aid, according to the bureau of public roads, United States Department of Agriculture, and probably an equal amount independent of federal aid. More miles of improved road were built than during any other year.

Costs of road grading and construction with local materials is down practically to the 1914 level. Some reductions, also, have been made in freight rates on road materials. The importance of this item is shown by the fact that in some cases it has been estimated that increased freight rates have added 10 per cent to the cost of a road. Prices of manufactured road materials trend downward; the present level is materially lower than that of a year ago.

With the new appropriation by congress of \$75,000,000, added impetus will be given to new road construction. Many of the states are considering an

Federal-Aid Road in Western State, Just Completed.

larged amounts of state aid, and the new law will have a tendency to encourage this policy. It will also secure the construction of a system of interstate and intercounty highways, rather than haphazard selection of roads as in some cases in the past.

HEAT INFLUENCES CONCRETE

Discovery Made That Edges Curl Up and Down in Response to Temperature Changes.

That the edges of concrete roads curl up and down in response to changes in temperature is the discovery recently made by the bureau of public roads of the United States Department of Agriculture in the course of experiments at the department's experimental farm at Arlington, Va.

Curling is caused by the unequal expansion and contraction of the upper and lower sides of the concrete slab under the influence of heat. It has been observed during the middle of the day when the surface of the road becomes hot it expands more than the cooler underside and causes the sides to move downward. At night when the surface is cool the contraction causes the edges to rise slightly. The extreme movement may be as much as one-tenth of an inch.

While the warping of the concrete is not in itself detrimental to the road, it may lead to failure of the surface under the wheels of vehicles which travel over it when parts of it are not resting on the ground.

HAUL PRODUCTS TO MARKET

Enormous Amount Carried Over Country Roads Shows Necessity of Better Condition.

The necessity of keeping country roads in good condition is shown by a report recently compiled by the bureau of markets and crop estimates, United States Department of Agriculture, showing the extent to which they are used in hauling farm products to market. According to the report, which shows the tonnage of 11 products hauled on country roads, giving the yearly average for the period from 1915 to 1919, there were 27 tons of these 11 crops hauled for every 100 acres of land. The average tonnage of the 11 crops hauled on country roads each year for the period mentioned amounted to 80,500,000 tons. The 11 crops referred to in the report are corn, wheat, oats, barley, rye, rice, flaxseed, cotton (including seed), tobacco, potatoes and cultivated hay.

Bonds for Good Roads. Pennsylvania has just sold \$11,200,000 bonds bearing 4 1/2 per cent interest—the last of a \$50,000,000 issue for road work—for \$104,311, which shows that, however the market for other bonds may be, there's a mighty brisk demand for nontaxables.

Want to Spend \$15,000,000. The Massachusetts department of public works wants to spend \$15,000,000 a year on roads and bridges of the state during the next 20 years.

Alfalfa Fed to Horses. Alfalfa has been fed to horses with good success and with excellent success when the amount is limited. Like other livestock, horses are very fond of alfalfa and inclined to eat too much if they are given all they want.

Cows Freshening in Spring. While it is natural for cows to freshen in the spring it cannot be said to be most profitable, for in the flush time we always find a lower price, while farm work is then most pressing.

LIVE STOCK

SHEEP CARE DURING WINTER

Breeding Ewes Should Be Kept Thrifty and Not Allowed to Lose in Weight.

At this season the flock owner is principally interested in fall and winter feeding and maintenance. The shepherd should train himself to read the condition of his sheep by feeling the bone of the loin or back. At no time while they are in lamb should ewes be allowed to lose weight. In open, wet, fall seasons there is danger of waiting too long to start feeding.

Winter management is very important in its effect upon the returns from the flock. Leguminous hays, straws and cornstalks usually form the main part of economical winter rations. Clover, alfalfa or cowpea hay, if of good quality, may be used as the sole feed until near lambing time, from 3 to 3 1/2 pounds daily being sufficient for ewes weighing less than 150 pounds. Oat and wheat straw are better than rye or barley straw. Cornstalks placed where the ewes can eat off the leaves may be used as a part of the roughage ration. If this ration is made up largely of cornstalks or straw, a nitrogenous concentrate should also be used. Timothy hay is not good sheep feed.

Slilage will reduce the cost of the ration, but it is best to use it with hay. Feed only silage made from well-matured corn, and be sure that it is not spoiled, frozen or moldy. Three pounds per head a day is the limit for this feed. For bred ewes, roots, particularly turnips, should be used sparingly until after lambing. The two rations here given will be found satisfactory for ewes from 120 to 145 pounds in weight:

Ration No. 1.
2 pounds alfalfa or cowpea hay,
2 pounds corn silage,
1/2 pound shelled corn.

Ration No. 2.
2 1/2 pounds alfalfa hay
2 pounds corn silage.

If the ewes run on fall wheat or rye during the winter the pasture must be supplemented by some dry or concentrated feed. Silage and roots are not desirable when the pasture is green. One-half pound of cottonseed meal contains the daily protein re-

A Good Pasture to Range Over Provides the Best Exercise for the Breeding Flock.

quirement for pregnant ewes and it should be used when the price is right. However, a quarter-pound along with other feeds containing protein may be better than one containing a larger amount of cottonseed meal.

Exercise for the ewe in winter is necessary if strong lambs are to be produced. They can be induced to take exercise by scattering their feed over the ground which will induce them to do a great deal of walking. Another way is to do the feeding some distance from the shelter. Winter pasture will, of course, solve the problem of exercise. But the flock ought not to be out in rain or wet snow, as a wet fleece is a frequent cause of colds and pneumonia. A sheep will shake off dry snow and be none the worse for having been out in a storm.

Present conditions should be no discouragement to a person who thinks of starting a flock, for the man who succeeds with live stock is the one who goes in and stays in through fat years and lean. Perhaps it is better to go in when prices are low, for then it costs less for foundation stock.

It is doubtful whether a man should start keeping sheep unless his farm will allow the keeping of at least 30 ewes, and in most cases 60 or more will be handled better and more economically than a very small flock. Old ewes should be discarded at five years of age. When this is done and the poorest of the ewe lambs are sold a flock will ordinarily double in size in three years.

CASTOR OIL GOOD FOR SWINE

Simple, Harmless and Generally Effective Remedy for Animals When Off Feed.

Castor oil for hogs that are off feed is a simple, harmless and generally effective remedy. Put salt on the hog's tongue, and when she starts to lick put the castor oil in her mouth with a spoon. Two tablespoonfuls is the right dose. Give it immediately you notice a hog is off feed.

Moldy or Rotten Corn. Moldy or rotten corn is less dangerous to stock when left in the field where it will partially dry or cure before being eaten by cattle or hogs.

Pasture for Spring Pigs. Plenty of exercise on good pasture is fundamental to the development of the best type of pure-bred spring pigs.

Sunlight in Hoghouse. There should be provision made for plenty of light in every hoghouse. Sunlight is a germ and bacteria destroyer.

MONTHS OF SUFFERING

How a Baltimore Girl Recovered Her Health

Baltimore, Maryland.—"For several months I suffered with severe backache and general weakness. I could not sleep comfortably at night for pains in my back. I found your book at home one day and after reading it began at once to take Lydia E. Pinkham's Vegetable Compound. I had very good results and some of my girl friends are taking it now. You may use this letter to help other girls, as the letters in your book helped me."—ROSE WADNER, 3018 Roseland Place, Baltimore, Md.

That is the thought so often expressed in letters recommending Lydia E. Pinkham's Vegetable Compound. These women know what they have suffered, they describe their symptoms and state how they were finally made well. Just plain statements, but they want other women to be helped.

Lydia E. Pinkham's Vegetable Compound is a medicine made from medicinal roots and herbs, and without drugs, to relieve the sickness women so often have, which is indicated by backache, weak feelings, nervousness, and no ambition to get anything done or to go anywhere. It has helped many women. Why not try it?

MOTHER! CLEAN

CHILD'S BOWELS WITH CALIFORNIA FIG SYRUP

Even a sick child loves the "fruity" taste of "California Fig Syrup." If the little tongue is coated, or if your child is listless, cross, feverish, full of cold, or has colic, give a teaspoonful to cleanse the liver and bowels. In a few hours you can see for yourself how thoroughly it works all the constipation poison, sour bile and waste out of the bowels, and you have a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.—Advertisement.

Regard righteousness as gain.

Help Your Kidneys

Is a cold or grip keeping you miserable? Are you tortured with dull, persistent backache and sharp, cutting pains? Likely your kidneys need help. Colds and grip fill the blood with poisons. Your overworked kidneys have become weak filtering these poisons off. That's why you feel weak and depressed and suffer from headaches, dizzy spells and urinary disorders. Don't wait for serious kidney disease. Help your kidneys with Doan's Kidney Pills. Doan's have helped thousands and should help you. Ask your neighbor!

A Wyoming Case

Mrs. B. E. O'Neil, 1514 H. O. G. Ave., Laramie, Wyo., says: "I had weak kidneys and dull backaches and pains through my kidneys. Headaches were frequent and I felt dull and tired. The action of my urine. I used Doan's Kidney Pills and they soon rid me of kidney complaint."
