The Phoenix papers state that a handsome belle of that city is about to be married to a prominent city official of Tombstone. As all of our city councilmen are married men, we presume that Mayor Fitts is the one who will draw the prize. This will, no doubt, create a jealous feeling among our bright home stars.

BORN.

GRAY—In Tombstone, February 7th, 1892, to the wife of John Gray, a son.

A NEW INDUSTRY.

The Mesquite Bean to Grace Our Breakfast Tables as a Substitute for Mocha and Java.

A new industry is likely to be created in the southwest through the discovery of a San Antonio, Texas man, who has been experimenting with the mesquite bean, and has discovered that it is a most valuable substitute for coffee, in fact equal to the best Java as a beverage, says the Silver Belt.

A chemical analysis of the bean revealed that its constituents are much the same as coffee. The discoverer also invented and had patented a method for removing the fibrous substance surrounding the bean. As a beverage it is said to possess a delicious aroma, and while it acts as a stimulant in much the same way as coffee, there are no unpleasant effects following its use.

A company with ample capital has been formed to convert the mesquite bean into a marketable product as a substitute for coffee. It is believed the industry is destined to become of considerable importance.

The prairies of that portion of Texas, south and west of the Colorado river are covered with the mesquite tree, growing in its wild state. The tree is also indigenous to New Mexico, Arizona and the greater part of Mexico. It thrives in a dry climate, and gives its great yield of beans during seasons of severe drought. It is estimated that the average yield of each tree is 30 pounds of beans.

A Wonderful Machine.

There is no doubt that man is a fine mechanism, but like every other machine he wears out by friction. It is said that he is born again every two or three years. His body is virtually re-made from food. To retard this making over is radically wrong, as a man loses so much vitality in the delayed process that it takes a long time to recuperate. The process of making anew is so accelerated by purging with BRANDRETH'S PILLS that a new man, as it were, may be made in two or three months, and the change in the mechanism is such that the worn out part is replaced by the new without the usual running down of the whole machine. You don't have to stop for repairs. Purge away with BRANDRETH'S PILLS the old, diseased and worn out body. They are purely vegetable, absolutely harmless and safe to take at any time.

Wellington's Battle Steed.

Copenhagen, the battle steed which carried the duke of Wellington fourteen hours at a stretch at Waterloo, has been honored with a monument at Strathfield, the country seat of the duke. British papers have a lot of anecdotes to tell of the horse, one of which says that the brute was buried one cold winter morning at six o'clock, and that the old duke turned out himself at that uncanny hour to attend the funeral. He saw in dismay that one hoof of the dead horse was without a shoe, at which sight he grew very angry. After the funeral he ordered a search to be made for the lost shoe and a groom brought one, saying it was Copenhagen's. The duke was pleased and had the relic made up as an incense burner for a lasting memorial of his faithful steed.

Such good results were obtained from its use that I enclose one dollar and ask that you send me two bottles by express.—J. A. SCRIVEN, 18 E. 15th St., New York City. To H. H.
