**DANGERS OF T.B. DEM-
 STRATED IN PICTURE**

The danger to farm animals and to human beings from the neglect of animal tuberculosis is graphically illustrated in a new motion-picture film prepared and issued by the United States Department of Agriculture under the title, "Out of the Shadows." The story has to do with the happy family of Henry Benton, a wholesome farmer, with a large and handsome herd of dairy cattle. A Government inspector tracing an epidemic, suggests a test of the Benton herd, and gives arguments that induce Benton to consent to a tuberculin test. The result of the test shows an appalling condition, and explains the declining health of Benton's beautiful young daughter, who has drunk the milk of a favorite heifer. The clean-up of the farm and Benton's acquirement of a herd of cattle not affected with tuberculosis are results of the inspector's visit. The daughter, however, is not restored to health until after three years in a sanitarium. The picture is in two reels and carries so strong a human interest story together with its lesson that it is being widely sought through the loan system of the department, and through purchase by State and local organizations.

**SILAGE APPETITES OF
 COWS SHOWN IN TEST.**

A series of experimental feeding tests conducted by the United States Department of Agriculture at its Beltsville, Md., live-stock farm, revealed some interesting information as to the effect of siloing upon the palatability of various plants found on a farm range. During the last summer and fall about 150 different plants and combinations of plants were packed in barrels in the same manner that ensilage is placed in a silo. The purpose was to study the effect of the silo fermentation upon the fiber and other features of the plants. It was thought possible that silage would overcome some objectionable qualities of certain plants, in addition to breaking down the fiber of some which were too woody for stock feed. The various lots of silage were taken to Beltsville to test their palatability as cattle feed. The tests were not protracted enough to give final conclusions, but interesting results were obtained. Both wild and tame sunflowers were eaten readily when they came out of the silo, although the peculiar flavor and woody stalk of the former make it distasteful in its natural state. Russian thistle was eaten in the course of about 12 hours, and the same was true of ragweed, which cattle seldom touch in the field. Canada thistles, and castor bean plants without seed were eaten quite readily. Jack bean vines and pods were eaten rather reluctantly. The cows ate siloed Australian salt bush, but not the native plant. Siloed onion tops were fed to four cows; two ate them and two refused them. Buckwheat also provided a choice morsel. Cabbages, which in their natural state are eaten avidly by cattle, were absolutely untouched when siloed, the product being in many respects similar to saur kraut but without salt. Giant rye grass went untouched. The cattle were not compelled to eat any of the siloed products to satisfy hunger, as hay was fed them between siloed rations and they had regular portions of grain. The tests were not entirely conclusive, especially as the quantities were so small that the animals did not have an opportunity to get accustomed to unfamiliar flavors. The department may make some extensive tests another season on some of the materials, as there was no opportunity with barrel lots to gain any knowledge as to the beef and milk producing value of the feeds.

 March 4 to April 1, 1921.

Indigestion

Many persons, otherwise vigorous and healthy, are bothered occasionally with indigestion. The effects of a disordered stomach on the system are dangerous, and prompt treatment of indigestion is important. "The only medicine I have needed has been something to aid digestion and clean the liver," writes Mr. Fred Ashby, a McKinney, Texas, farmer. "My medicine is

Theford's

BLACK-DRAUGHT

for indigestion and stomach trouble of any kind. I have never found anything that touches the spot, like Black-Draught. I take it in broken doses after meals. For a long time I tried pills, which griped and didn't give the good results. Black-Draught liver medicine is easy to take, easy to keep, inexpensive." Get a package from your druggist today—Ask for and insist upon Theford's—the only genuine. Get it today.
