*Your gauge will PROVE Red Crown's economy*

Stop at the Red Crown sign the next time your tank needs filling, and then keep track of your mileage.

You'll find that "Red Crown" takes you farther on a gallon, and gives you a more powerful, sweeter-running engine.

"Red Crown" vaporizes rapidly and uniformly in the carburetor and is consumed completely in the cylinders. Every gallon is the same, wherever and whenever you buy it.

Fill at the Red Crown sign—at Service Stations, at garages, and at other dealers.

**Violators of Livestock Laws Must Pay Fines.**

For violation of regulatory laws relating to live stock and meat fines were recently imposed in 43 cases, as announced by the Bureau of Animal Industry in its Service and Regulatory Announcements for July. The list of violators includes railway and express companies, meat dealers, and livestock owners. Most of the violations were of the quarantine law which restricts the interstate shipment of diseased, ticky, or uninspected stock. Several live-stock owners encountered the Federal law when attempting to drive or ship tuberculous cattle interstate.

Violations of the meat inspection law included the offering of unsound meat, shipping uninspected meat and lard, and in one case, using a wrapper bearing the meat-inspection legend for wrapping uninspected meat. The majority of fines range from \$25 to \$200. Although the Federal laws and regulations relating to live stock are for the most part well understood and complied with, persons unfamiliar with the regulations and with the importance of preventing interstate shipment of diseased animals and unsound meats may obtain copies of regulations by applying to the department.

A homemade gummed paper dress form for every woman in the State who wants one is the goal set by local leaders in extension work in Washington State, according to reports received by the United States Department of Agriculture. The method of making the forms as originally demonstrated to group meetings of local representatives or leaders of the various communities in each county organized for the work, has been taken by them to the farm women in their communities. As a result 2,213 dress forms are reported as having been made by farm women in Washington State in six months ending June 1, 1922.
