Second Hand Goods Bought and Sold.

TELEGRAPHIC SPARKS

Fresh From the Wires from All Points.

Washington, August 1.—Senator Burrows, of Michigan, in an interview with a Post reporter this afternoon said: "It is my judgment that if the war in the Philippines is still in progress next year, and the end is not yet in sight, the situation will be to the disadvantage of the republican party. The only hope for the party and country I might add is a speedy change in the Philippines. Unless the war in the Philippines speedily ends it will become an important political factor, and its continuance will make the outlook for the republicans uncertain for the least. If I had my way we would have simply taken a coaling station or a base of supplies in the Island of Luzo, we would not have paid a penny to Spain and we would have had a foothold in the east without the sacrifice of life and money.

New York, Aug. 1.—The Atlas steamer Atlas, which arrived yesterday afternoon from Kingston and Costa Rican ports, is detained at quarantine, owing to the death of a passenger from yellow fever.

Denver, Aug. 1.—Dennis Sheedy, manager of the Globe smelter, at the announcement of the decision of the state board of arbitration, published a statement that the works would be closed indefinitely.

Trieste, Aug. 1.—Admiral Dewey spent yesterday at the Hotel de Ville while his flagship, the Olympia, was being coaled. He returned to his ship today and expected to sail this afternoon.

Cape Haytien, Aug. 1.—From a dispatch just received from an authentic source it is learned that a resolution will be proclaimed tomorrow or the day after in the republic of Santo Domingo in honor of Juan leader Jimenez. According to this dispatch the entire western portion of the republic has declared in favor of Jimenez and he is the only candidate for the presidency throughout the country.

Madrid, August 1.—Former officers in the Spanish army in the Philippines who have just returned from Manila declare that the Americans are powerless to conquer Luzon during the rainy season, and that with his present force Gen. Otis' efforts are wasted. Only after October 1, they say, can a decisive victory be won—for all agree as to the outcome of the struggle, although it is their opinion that the war in Mindanao and Luzon will be long drawn out.

Washington, August 1.—Commissioner General Powderly, of the Immigration Bureau has directed that sixteen Filipino actors who have been detained at San Francisco for some time pending a settlement of their right to land, be released and be permitted to continue their journey where they have been engaged by the authorities as a feature of the exposition now in progress.

Editorial: The Aug. 1st report of explorers, headed by two Kansas City men, Weldon E. Williamson and Marcus E. Kirk, in which was Alfred Greenfield, of Mapleton, Kas., which left this city March '98 and has not been heard from since June, 18 '98, is now believed to have been exterminated by a hostile tribe of Indians in the western part of Brazil, whither they went in search of the great rubber forests in the interests of Kansas City capitalists. Secretary Hay has notified United States consuls in South American capitals to make immediate and thorough investigation.

The annual meeting of the American Institute of Mining Engineers will be held in San Francisco on September 25. It is expected that some four hundred members of the Institute will come from east of the Rocky Mountains, while the mining states of the Pacific Coast will send an equally large number. Mr. E. H. Benjamin, of San Francisco, secretary of the California Miners' Association, is in charge of all arrangements for the reception of the miners and during their stay in California.

MAUNA LOA.

Destructive Work of the Big Volcano.

Beautiful Hilo, the second city of the Hawaii, there is little doubt has shared the fate of Pomeii. Overwhelmed by fiery streams of lava, this once prettiest of island towns is but a blotch upon the shore of Waiakea bay. The steamer Port Albert, which arrived from Honolulu today, brings the latest news of the eruption of Mauna Loa, and of the progress of the rivers of lava in their course down the mountain side.

According to the Albert's people, it was when they left but the question of a very short time when doomed Hilo would be destroyed. Already the people of the seaside city had begun to leave the homes. Valuables were being packed and household goods being shipped for transportation beyond the reach of the lava's ravaging fire. The lava was almost at the city's edge, and despite the various expedients resorted to by the authorities, steadily rolled on. It was advancing at the rate of four miles a day and was less than five miles distant. The effort to divert the stream by the use of dynamite was about to be made, but there was little hope that it would prove successful.

The outbreak on the Kona side of Mauna Loa continued with unabated force. From the new crater an immense quantity of lava is flowing. A number of fountains of the molten stuff are playing and are visible miles at sea.—Examiner.

A story is told of a justice of the peace in a county seat, not outside of this county, who takes advantage of everything that comes his way. It seems he had made some slurring remark about a well known miner, which came to the miner's ears. The miner went down to the justice's office and called his honor down. Harsh words followed which led to blows, and the justice of the peace came out second best, he being unable to successfully wield the water pitcher, which he attempted to do. They were finally separated, when shortly afterward the miner was arrested on a warrant charging him with assault, sworn out by the justice before sundown, but learning that his victim was going to demand a jury trial and a change of venue he withdrew the complaint and, upon the advice of the district attorney, concluded the only way that he could get a fee out of it was to fine the man for contempt of court, which he did, in the sum of \$25. The fine was paid, but it does not end here; other events are likely to follow in the case.

According to reports from good authority, says the Engineering and Mining Journal, the high prices of copper have reduced the consumption in Europe—especially in France and Germany—though they have not had that effect in this country. The reduction has been due, not to the substitution of other material to any extent, but rather to the postponement of new electrical and other construction in which copper takes an important part. How long this will last is not certain in some cases it may result in the abandonment of such enterprises altogether, but in many others the postponement depends upon the market, and some of the projects will be brought out with each fall in quotations. The production of the metal shows only a small increase; in the United States it has been almost stationary, though the European producers have been more active.

Foran Editor is Recommended Patent Medicines?

From Sylvan Valley News, Brevard, N. C.:—It may be a question whether the editor of a newspaper has the right to publicly recommend any of the various proprietary medicines which flood the market, yet as a preventive of suffering we feel it a duty to say a good word for Chamberlain's Colic, Cholera and Diarrhoea Remedy. We have known and used this medicine in our family for twenty years and have always found it reliable. In many cases a dose of this remedy would save hours of suffering while a physician is awaited. We do not believe in depending implicitly on any medicine for a cure, but we do believe that if a bottle of Chamberlain's Diarrhoea Remedy were kept on hand and administered at the inception of an attack much suffering might be avoided and in many cases the presence of a physician would not be required. At least this has been our experience during the past twenty years. For sale by all druggists.

Neat, attractive job printing on short notice at The Orb.

THE COPPER QUEEN STORE.

It's "betwixt and between" here now. In the interim between the final out-going of the summery goods and the advance on-coming of the new season's merchandise little prices on lingering lots of present-need goods prevail. For instance:

Shirt Waists—well made and of good material, reduced from 65c, 75c and 85c to 50c. This is a thrice-told tale, but it bears repeating.

Shirt Waists — that were \$1.25, 1.35, 1.50 and 1.75, now \$1.00 and \$1.25. If you've need of a waist these few words are important.

Low Priced Lawns—to our regular 8c assortment have been added a lot of 10c colored lawns and dimities. This means greater choice and an added element of cheapness. 8c yard.

Womens' Umbrellas — natural wood crooked handles, 75c; steel rods 85c and \$1.25.

Colored Underskirts — two ruffles at bottom, together with dust ruffle.....\$1.25.

White Pique — with welts instead of horizontally. In stock again at 20c yard.

Womens' Low Shoes—the odds and ends of sizes and kinds. The little prices marked on them will make it worth your while to look for your size.

Mens' Wool Pants—a small lot of only 71 pairs left. Former prices were from \$1.50 to \$4.50; now \$1.00 to \$3.00 a pair.

Mens' Work Pants—not wool, but wear—resisting cottonade in dark, dirt-proof colors from \$1.25 a pair to \$1.00.

Little Weight Underwear for Men—the fancy sorts. Broken assortments make prices much less than usual.

Neglee Shirts—soft or stiff bosom, collars and cuffs attached or detached; every desirable style and kind. 85c to \$4.00.

Mens' Straw Hats—smooth or rough brims; soft or flat brim. Reduced from \$1.75 and \$2.50 to \$1.50.

Mens' Linen Crash and Co-vening Suits have had a dollar knocked off their price. Regularly \$5.00, now \$4.00 a suit.

Boys' Wash Suits—the \$2.50, \$2.75 and \$3.00 sorts, all now \$2.00.

The Copper Queen Consolidated Mining Co.
