Bouse Down to the Basis of Things Dependable

THE HOTEL BURKE BUILDING

Construction Work Has Begun—Work Rushing on the Clara Consolidated—Freight Teams Badly Needed. Work For 300 of Them.

Bouse, Ariz., Feb. 12.—(Special correspondence of The Republican.)—Business at Bouse is picking up very rapidly and everything is moving along at a good rate. Things are of a more substantial nature than they were some time ago. Many people are coming in and looking over the situation from an investment standpoint. Most of these people are people who have the money to invest. Of course there are some who drift in, as they do in every new town, merely to see what they can get hold of and who are dependents on the world. There are a good many mining people also coming in and looking over the situation and are taking a great deal of interest in matters. Many properties are going to work, some on a small scale and others on a large scale. All in all everything is very satisfactory to all interested in Bouse and it is believed that with the opening of spring in the northern countries that business in Bouse will be booming. Of course the people of Bouse do not want a boom in town lots or inflated values but rather do they want a strong steady growth and one that will be lasting.

The Hotel Burke Building.

One of the things which look particularly good to Bouse is the fact that Dennis A. Burke of Prescott arrived a day or two ago with a force of men and started in to work on his fine new hotel. The hotel will be built of adobe and cemented on the outside, mission style. The main building will require 35,000 adobes and Mr. Burke brought in a force of twenty Mexicans from

Piles Quickly Cured at Home

Instant Relief, Permanent Cure. Trial Package Mailed Free to All in Plain Wrapper.

Piles is a fearful disease, but easy to cure if you go at it right. An operation with the knife is dangerous, cruel, humiliating and unnecessary.

There is just one other sure way to be cured—painless, safe and in the privacy of your own home—it is Pyramid Pile Cure.

We mail a trial package free to all who write.

It will give you instant relief, show you the harmless, painless nature of this great remedy and start you well on the way toward a perfect cure.

Then you can get a full-sized box from any druggist for 50 cents, and often one box cures.

Insist on having what you call for. If the druggist tries to sell you something just as good, it is because he makes more money on the substitute.

The cure begins at once and continues rapidly until it is complete and permanent.

You can go right ahead with your work and be easy and comfortable all the time.

It is well worth trying. Just send your name and address to Pyramid Drug Co., 92 Pyramid Building, Marshall, Mich., and receive free by return mail the trial package in a plain wrapper.

Thousands have been cured in this easy, painless and inexpensive way, in the privacy of the home.

No knife and its torture.

No doctor and his bills.

All druggists, 50 cents. Write today for a free package.

AND IF YOU LIKE

you're treated thus, by all means bring them to us. Entrust the work to us to do—your garments will be made like new. Perfect in shape, superbly clean, as ever raiment yet was seen. And if, perchance, you should decide to have your Coat and Trousers used, the task will not be difficult—you'll be surprised at the result. We'll have them finished when agreed, because we do our work with speed, and turn it out serene and nice at quite a modest little price.

THE ARIZONA CLEANING AND DYEING WORKS.
Mrs. Lillie Wilson, Prop.

All Physicians

Must prescribe some of the ingredients that are contained in Hood's Sarsaparilla—for all troubles of the blood, stomach, kidneys and liver.

They include sarsaparilla, stillingia, yellow dock, gentian, wild cherry bark, mandrake, dandelion, juniper berries, pipsissewa, etc.

The combination and proportions are our own formula and give power to cure beyond the reach of any other prescription or substitute. That's why it is wise to get Hood's and only Hood's.

Wickenburg to work and they are working. The first day they turned out 2,000 and they expect to have them all made and commence laying the walls this month. Now this sounds mighty good, but then that is not all. Mr. Burke has employed W. W. Cain of Denver, Colo., to take charge of the construction. Mr. Cain was his foreman when he built the Burke in Prescott, and he knows his business. Mr. Cain is now in Los Angeles buying the lumber and other material for the construction of the hotel and he will ship it to Bouse in car loads. This material will begin arriving by the first of March and Mr. Burke expects to have his hotel running by the first of May at the very outside.

The hotel in itself will be one of the finest of the smaller hotels of Arizona or of the southwest. It will be strictly modern in every respect. It will contain thirty sleeping rooms, fifteen of which will have private bath rooms attached. The building will be 100 feet frontage and 150 feet back. It will be set in the middle of the block and will have shade trees and palm gardens clear around the building. There will be a patio in the middle of the building and the rooms will open out on the patio. The inside rooms will open onto the patio and for this reason there will be no inside rooms in the hotel. The patio will be 16 feet wide and 60 feet long and will be filled with palms and flowers. He will drill a well and have his own water works and light plant. It is Mr. Burke's intention to leave nothing undone to have a really first class hotel in every respect.

This hotel will be one of the fine advertising features for Bouse, as there is nothing which makes a man form such a good opinion of a city as first class hotel accommodations. Bouse now has many people who come in who are accustomed to this kind of a hotel and as soon as the building is ready for occupancy it will be filled all the time. It is expected that many prominent mining men from all parts of the country will bring their families to Bouse and live so they can be close to their mining properties.

Big Freight Contracts.

The Clara Consolidated is going after business in a way which means success right off the reel. Geo. Mitchell has recently been at Swansea and has given orders to have everything started off full force. Everything now is being rushed. The one principal drawback is the lack of freight teams, but these are being gathered together just as fast as possible, and Mitchell stated to have at least three hundred teams hauling freight between Bouse and Swansea within two weeks and that he would have work enough to keep them all busy from now until the railroad is built, which may be some time, although he states that it will not be for longer than six months or a year at the very outside. He states positively that if the Santa Fe does not get a move on them and get to building the road from Bouse to Swansea right away that he will build it himself.

Right now there are several carloads of lumber stacked up at Bouse awaiting teams to haul it to Swansea, and within another week there will be many more car loads. In addition to this there will be car loads of other material besides lumber. There are many car loads of smelter material yet to come. In addition to this there will be coke to haul pretty soon, because Mr. Mitchell states that the smelter will be running within three months if he can get teams enough to get the material to Swansea.

What this all means to Bouse is easily figured. Think of 300 teams coming into Bouse every day or every other day, loading and moving out again. It means a great impetus to business of all kinds. Nothing makes a town look so full of business as a great number of freight wagons loading and moving in and out with their loads. The days will be full of business and the nights full of music. The traveling musicians are now drifting to Bouse and within a short time the streets will be filled with them.

Arizona-Bouse Ready.

The Arizona-Bouse Copper company is now ready for business and within a few days will have a large force of men busily engaged in developing that property. They will put a number of men to work on the Little Butte at once and also men to work on other parts of their property. The Little Butte will have the main shaft sunk to water level, where the main ore body will be found, if it is not found before. Drifts and cross-cuts will be run from the fifty-foot level. The property will begin shipping ore at once as all the matter taken from the shaft is ore, and it is expected that the ore shipments will more than pay for the development work. This takes an exceedingly rich property, but the Little Butte will do it.

May Be New Lumber Yard.

The E. K. Woods Lumber company of Los Angeles has had a man in Bouse looking over the situation as regards establishing a lumber yard which will do both a wholesale and retail business. This company is now furnishing a large part of the lumber for the Clara and it is believed that with the Clara trade and all of the trade for the town building, as well as the large amount of lumber which will be required for the other various mining properties of the district, a large lumber yard will be a big paying proposition. The Woods people are large dealers on the coast and if they establish a yard at Bouse it will mean much for the young city.

Morning Glory Working.

The Morning Glory, composed of a group of eight claims, about seven miles south of Bouse, owned by Jack Bellus and associates, is being worked by a force of men, and Bellus states that he intends to begin shipping ore at once.

BUILDING A DISASTER SAYS P. BUNAU VARILLA

A Reiteration of His Opinion That the Lock System is a Mistake.

New York, Feb. 12.—The construction of the Gatun dam now being built by the United States government on the Panama canal will result in the greatest disaster to any public work, probably, that has ever been built.

This was the statement made today by P. Bunau-Varilla, the French engineer, who arrived here on the French line steamer La Provence from Havre. He has frequently asserted that the construction of a lock canal was entirely impracticable. He said today that he had not changed his views in this respect.

Dear Friend:

You can tell good coffee by the smell. Blank coffee smells fine. It makes you feel good when you drink it, papa says. Blank coffee costs blank cents a pound.

Bad coffee makes you feel bad all day. Blank coffee smells so good that I beg mama to let me drink it.

Your friend,
JACOB.
