Some recent improvements have put the roads in better shape than they were, but there is yet room for big improvement.

TURPENTINE PROJECT FOR COCONINO FOREST

The forest service wants to start a turpentine industry in this district, according to a letter to the Commercial club.

It is planned to lease the right to place 100,000 cups on western yellow pine trees in the Coconino national forest. This plan is practically experimental, and if it proves successful the industry may be enlarged. The service has conducted experiments in turpentine yellow pine in this district and, according to the report, they showed a yield of resin four-fifths as great as that obtained from similar operations in the southeast, although the season of dipping is shorter here. Analysis of the crude oleoresin of the western trees shows a close similarity to that obtained from the long leaf pine of the southeast.

The service probably will advertise for bidders for the privilege in the Coconino forest, but first it wants quotations on the turpentine and resin markets to ascertain the amount it should charge for the privilege.

The service believes that the imminent exhaustion of the long leaf pine forests of the southeast will make transfer to the west appear attractive to eastern operators.—Albuquerque Journal.

WILLIAM BUCK KILLED ACCIDENTALLY SUNDAY

Wm. Buck, sawfiler at F. L. M. Camp No. 1, was thrown from his horse near Marshall lake Sunday and instantly killed. His body was found about three hours later by Dr. Felix Manning and E. M. Brown, who were coming across country from Mary's lake.

No one was with Buck at the time and as near as could be ascertained, he had attempted to shoot from the horse, frightening the animal which threw him, breaking his neck and bruising his head badly.

His remains were brought into Flagstaff by Undertaker Whipple Monday morning when an inquest was held over the body.

Navajos Go to California School

Mr. H. P. Marble came in from the Western Navajo Indian reservation this week with nine Navajo children which he took to the government school near Riverside, California, Wednesday night. Heretofore it has been practically impossible to get children from this division of the reservation to attend school off the reservation, and there has been a decided aversion among the chiefs of the tribe to outside school, but lately Mr. Marble has been successful in breaking over this aversion and has converted many of the older people of the advantages to be gained.
