## Across the Continent on the Stearns.

NEARLY 4,000 MILES WITHOUT A BREAK.  
400 RIDERS—400 WHEELS.  
NOTHING BUT STEARNS BICYCLES RIDDEN.

The Journal-Examiner Yellow Fellow Relay finished Sept. 7, in the marvelous time of 13 days, was the greatest cycling event ever originated, and its successful execution demonstrates the strength and speed of the Stearns as these virtues have never before been established for any bicycle. This ride over trails, mountain passes, rocks, boulders, railroad ties, deserts and cities in such time is simply marvelous, and it all stands to the credit of the Stearns, whose makers originated and successfully executed the relay.

The way to do it is to do it on the Stearns.

### A Seizure Sale.

[From the Nogales Oasis.]

At the custom house at Nogales, one

day last week, the great government

of the United States made a sale of

goods for alleged violations of the revenue

laws. Following is the inventory

of articles sold:

1 white lace shawl.

1 palm leaf hat.

1 box cigars (containing 8.)

4 yards cotton lace.

2 pairs ladies' shoes.

6 yards dress goods.

8 yards white cotton lawn.

4 yards cream cotton lawn.

1 box cigars (50.)

1 box cigars (50.)

1 harmonica.

2 pairs ladies' shoes.

25 bone hairpins.

13 black combs.

1 woolen table cloth.

1 quart bottle wine.

8 straw hats.

1 pig.

The above list was the accumulation

of seizures during several months by

the vigilant line force employed by

Uncle Sam to prevent infractions of

the revenue laws. That they have been

vigilant and active would seem from

the infinitesimal detail with which

they performed their work. And the

Oasis is pleased to commend the sweep-

ing extent and accuracy of their work.

For instance, in the list may be noted a

child's woolen hood. It is stated that

the hood was snatched by an inspector

off from the head of a squalling brat

which was being packed by its mother

across the line. The inspector would

have taken its diaper also; but to have

been made saleable the cloth required

washing, and as congress has made no

provision for washing babies' dummies

from me—or a little faster."—[Oasis.]

### THE GAME OF GOLF.

It is really a Linguistic Discipline

Learned Out of Doors.

A celebrated metaphysician has said

that the Hegelian philosophy consisted

"entirely of a scientific terminology

which no two people interpreted in the

same sense, hence its value as a source

of endless discussion." The more you

talked the further you were from a

conclusion, but you had a "grand training

in dialectics." It is eminently

proper that the game of golf should

originate with the metaphysical race,

the Scotch, for it consists partly of a

hard rubber ball, a number of peculiar

curved sticks and a becoming negligee

costume, but chiefly and primarily of

a vocabulary. It can be played, but

not properly played, without mastering

the vocabulary. It cannot be thor-

oughly enjoyed unless the name

"golf" is rightly pronounced, but as no

one knows how to do that, and all think

they do, the pronunciation is a matter

of comparatively little consequence.

The proper use of the technical terms,

however, is a matter of vital impor-

tance.

The principal words in the new lan-

guage are: Driver, putter, cleft, lofting

iron, niblic, mashie links, tees and

caddy. One who has thoroughly mas-

tered these words and wears a costume

is a "golfer." To confuse their mean-

ings, to speak, for instance, of "holing

a caddy" or "lofting a links," or call a

"putting green" a "niblic" is as serious

a breach of good form as it would be

to call a fishing rod a fish pole, as boys

did 25 years ago, before the tyranny

of the technical term set in. To be

sure, you do walk about out of doors

and strike the ball with the clubs, but

the real essence of the game lies in

wearing the costume and using the

words. A thorough mastery of them is

a liberal education.

Other subjects have their peculiar ter-

minology, but in none of them is it so

extensive and of such educational value

as in the game of golf. An eminent

authority defines an electrician as one

who thoroughly comprehends the word

"potential" and the notions collateral

thereto. "If you go into the woods,

and live on canned food and crackers,

you must speak of the place where you

try to sleep, not as a "shanty," but as

"a camp." The name at once elevates

the place into the region of sylvan po-

etry and makes discomforts enjoyable.

It really is a shanty; call it so, and

the result is complicated discomfort; call it
