**ON TO NACOSARI.**

The Naco Branch of the A. & S. E. to Ex-  
tend into Sonora,  
(From the Bisbee Orb.)

From a most reliable source The Orb  
learns that the Copper Queen company  
are soon to begin the work of building  
the proposed extension of their rail-  
road to Nacosari. The surveying party  
is now being organized and will soon  
take the field. The preliminary survey,  
was completed sometime since, and the  
estimated cost of the road has been  
made. The building of this road means  
much for the future of Bisbee and Naco.

It will open up a mining country in  
Sonora that is at present attracting  
attention of capitalists from all parts  
of the country. The Queen company,  
which operates in Sonora under the  
name of the Mexican Copper com-  
pany, has put in thousands upon thou-  
sands of dollars during the past six  
months in the way of machinery,  
buildings, etc., at Nacosari, and in  
order to successfully work the new  
plant when completed, it will require  
an enormous amount of coke and coal,  
which cannot be taken in by wagon in  
sufficient quantities to keep the plant  
moving.

The road will be built only to Naco-  
sari at present, but will ultimately be  
continued down to the Gulf of Mexico,  
the concession having already been  
secured from the Mexican govern-  
ment.

**National Irrigation Congress.**

The Eighth Annual Session of the  
National Irrigation Congress will be  
held at Missoula, Montana, on the 25th,  
26th, and 27th of September, and more  
than usual interest is being already  
manifested. These congresses have  
been heretofore largely attended by  
scientists, engineers, and men directly  
interested in irrigation, but now the  
subject is attracting outsiders—busi-  
ness men and manufacturing interests  
in all parts of the country who realize  
that the opening up of millions of  
acres of land into enormous produc-  
tion cannot but stimulate business in-  
terests in every quarter.

It is therefore probable that the con-  
gress will be the most success-  
ful yet held. The congress is com-  
plicated as follows: Five delegates ap-  
pointed by the governor of each State  
and Territory; one delegate from each  
city of the United States, having a  
population of less than 25,000, and two  
from each city with a large population;  
one delegate from any regularly or-  
ganized irrigation, agricultural, or  
horticultural society of engineers, irri-  
gation company, agricultural college,  
or commercial body, duly accredited  
representative of any foreign nation  
or colony, any member of the U. S.  
Senate or House of Representatives or  
governor of a State or Territory, any  
member of a State or Territorial irri-  
gation commission, or the chairman of  
each section and the permanent officers  
of the congress.

The citizens of Missoula are bound  
to make the Congress a success so far  
as lies in their power. They are withal  
immensely proud of their big State,  
which produces not only immense  
mineral wealth, but is destined, under  
irrigation, to be important agriculturally.

Delegates who come from the East  
over the Northern Pacific will pass,  
for a few hundred miles, through the  
valley of the Yellowstone, and while  
they will see many miles of irrigation  
ditches, they will also see more water  
going to waste and bant on joining the  
Missouri and the Mississippi in their  
ascent on the expansive Government  
levees in the entire States, than would  
water thousands and thousands of  
acres of arid but otherwise productive  
land.

**"Bob" Ingersoll on Money.**

In 1891 Colonel Robert G. Ingersoll  
said:

"I said I would say one or two words  
to-night on such vulgar things as gold  
and silver. I am as satisfied as I am  
that I live that the few—the few who  
control the debts, the currency, the  
money of the world—have combined,  
either consciously or unconsciously,  
to make the debtor pay more than the  
creditor has a right to ask.

"The tendency has always been in  
this world to put the burdens upon  
those least able to bear them. In bar-  
barian countries the women have to do  
the work simply because they are  
weaker—that is all. And the others,  
being the stronger, expend their  
strength in making the weaker do their  
work.

"This is precisely the same in our civ-  
ilized society to-day. Between the rich  
and the poor, if the burden is to be  
borne in this country, it is to be borne  
by the poor—always.

"They are the first to suffer. Let the  
blast of war blow in this country, who  
goes to war? Who goes to the front?  
The millionaires? Not one. Who  
goes? The presidents of corporations?"
