ORDER IS ISSUED TO BEGIN CONSTRUCTION WORK ON THE FLORENCE DIVERSION DAM

Telegram From Washington Insures Construction By Which 62,000 Acres of Land Are to Be Furnished Water for Irrigation—Not to Wait for Bids, but to Proceed by Force Account—Expected to Be Ready for Use the Coming Season—Means Much for Florence and Casa Grande.

Work is to begin immediately on the construction of the Florence diversion dam on the Gila river by which water is to be furnished to 62,000 acres distributed as follows: 17,000 acres near Florence, 10,000 acres near Casa Grande and 35,000 on the Sacaton reservation.

The order for the immediate beginning of the work is announced in the following telegram received by Judge O. J. Baughn of Florence: Washington, Jan. 24, 1921.

Answering your wire to Secretary Payne, construction of the Florence dam by force account is ordered and the preliminary work is being rushed so as to begin actual construction at the earliest possible date.

Flood seasons on the river and other unforeseen delays will prevent construction in time to divert water through the government works this season. Land owners should realize this. Assistant Chief Engineer Oldberg has been detailed to take immediate charge of work on the ground with instructions to expedite in every particular. Advise chamber of commerce accordingly.

Wire From Senator Ashurst

The foregoing is in reply to urgent telegrams sent by Judge Baughn to the department and telegrams from the chambers of commerce of Phoenix, Florence and Tucson, not only to the department, but also to Arizona representatives in congress.

Wire From Senator Ashurst

I interviewed the secretary of the interior and the commissioner of Indian affairs today and urged that work on the Florence dam be commenced at once under force account as the money was appropriated nearly five years ago.

Wire From Senator Ashurst

The dam is to be built near Price. It will be somewhat similar to the Granite Reef dam of the Salt river project, though not so long or so costly. A partly finished canal built some years ago by settlers in the Casa Grande valley in an effort to irrigate their lands will be taken over by the government and used.

Wire From Senator Ashurst

The entire cost of the project is unknown, the total available appropriations thus far made by congress aggregating something near a half million dollars. This is not expected to cover the entire cost.

Wire From Senator Ashurst

The building of this project at this time will mean much for Arizona, and particularly for Pinal county. It is expected to materially increase the population of that district. Both Florence and Casa Grande will profit by this work, particularly Florence, as nearly all of the government work will be in the vicinity of that town.

Wire From Senator Ashurst

The Phoenix chamber of commerce did its part toward getting action on this matter by wiring to Washington at the request of the Florence folks. Senator Ashurst and Congressman Hayden got busy, and orders were issued to begin the work.

Back taxes collected by the government, officials explained, include penalties for delinquencies and evasions as well as additional amounts in taxes now due.

There are thousands of ways to use corn meal and lend variety to the diet. Corn meal is not only cheaper than flour, but it is stimulating and invigorating to the system. There is more food value in corn than in any other product of the soil. In the housewife who does not draw on it is overlooking the nation's greatest food reserve.

The Department of Agriculture has issued an attractive booklet which tells many ways to use corn meal. It is full of practical and tempting recipes—and it is free. One Washington Information Bureau will secure a copy for any one who sends two cents in stamps for return postage.
