ITALY'S CHANGE

From a distance it cannot help being appreciated that Italy is playing an important part in the war across the water.

Italy has made excellent progress in this last offensive in smashing through the mountain defenses of Austria.

The claim is made that Italy has a sufficient army to carry out such operations, and that in spite of the long battle front and the millions of men under arms it has not as yet called many of its classes...

It is quite natural that there should be widespread interest in the plans which are being made to take care of the soldiers and their dependents in case of death as the result of the war.

It is interesting to note that the war insurance bill is the outcome of deep thought upon this matter.

WAR INSURANCE

It is interesting to note that the war insurance bill is the outcome of deep thought upon this matter.

Murderers are hanged and murderers are electrocuted, but it is hard to convince those who have blood in their eyes that they cannot escape the ends of justice.

The man on the corner says: Some chaps straighten up with an air of importance every time a motor car stops a string of vehicles to get him across the street.

Count Luxemburg will henceforth be a disaster to Berlin, not because he advocates destruction without leaving a trace, but because he, like Zimmerman, was found out.

There may be some countries which are afflicted with the anger displayed in Argentina, but those very nations must take time and reflect upon where the responsibility lies.

The sum called for in the war revenue bill is large, but as the senate passed it there is the satisfaction of knowing that the country has not been drained to the last penny.

IDLE SHIPS

With the need that exists for more vessels and the inability in some quarters to move crops because of the lack of that kind of transportation facilities, the large number of neutral ships which are lying in the

WOMAN IN LIFE AND IN THE KITCHEN

SUGGESTIONS FOR THE HOUSEWIFE

All raw foods should be thoroughly washed. Before painting furniture be sure that it is clean.

Jellied prunes can be served with boiled custard. Sweet corn and popcorn should not be planted together.

The longer tomato sauce is cooked the better the flavor. New peas are improved by a little sugar, and so is cut off corn.

Don't salt steak until ready to serve it, if you would have it tender. A heavy wire double broiler is most convenient for steak broiling.

Nothing is more delicious than chicken smothered in fresh mushrooms. In case of burns apply powdered charcoal; it smooths the pain and heals the sore.

Linen pillow slips are a great comfort to an invalid. Warm little night slippers for baby can be made out of bathrobe material.

Several kinds of left over jelly can be mixed together and used for cake filling. Put pockets in the little girl's dress if possible. She will not lose so many handkerchiefs.

A large letter wall calendar and an attached pencil makes a most convenient kitchen memo pad. Grocery lists can be noted in the date spaces, memoranda of things to be done on certain days, a record kept of any matter of interest, and it is always in sight and will not be neglected.

To Keep Lemon Juice Squeeze the juice into a china dish, then strain it through a piece of muslin or the least fine gauze. It cannot go through. Fill some small bottles that are perfectly dry, with the juice, leaving enough room for a spoonful of sweet oil, cork tightly and let stand in a cool place.

For large bottles use more oil. When you wish to use the juice, take a piece of cotton, wind it around a skewer and dip the oil from the juice. You will find the juice as nice as when first bottled.

Home Made Labels Cut off the gummed edge of envelopes that come with advertising and use for labels. Stick them on canned fruit, salsas and boxes. Also, the labels are handy, cut in strips to wrap around small bundles of tickets, ribbons and what not. Better than rubber bands, as they hold them firmly and can be labelled.

HEALTH AND BEAUTY Gray hair should always be shampooed with white soap, as another kind is liable to leave the hair yellow. Neurologia is relieved sometimes by applying a bag of hot salt, and it will relieve earache sometimes.

When a person faints place the person in a supine position with head lower than the body. In this way consciousness returns quickly. Eggs are considered one of the best remedies for dysentery. beaten up slightly, with or without sugar, they tend by reason of their emollient qualities to lessen inflammation of the stomach and intestines, and form a transient coating on these organs.

Wedding Cake Na matter how much in love with the man of the hour the prospective bride may be, she is never too full of gentleness to ignore a new idea in serving the wedding cake. The woman who is contemplating matrimony should consider the latest novelty in individual boxes for the wedding cake. Each box is a triangular shape and looks just like a single portion of cake. Twelve of them are arranged with their points toward the center so that in a mass they resemble a large, ornate, every box there is a perky bow of ribbon. The ribbon can be chosen to fit in with the color decorations, thereby this is a pleasant change from the square boxes with which everyone is familiar.

The Weatherproof Coat For the woman who must brave the elements and travel under rain as well as shine there were seen in the shops some extremely smart models which are known as the weatherproof walking coats. These generally boast the big collar that will open or close at will and the large pockets and detachable sleeves. These coats are made of a waterproof over the other coats that are like them in appearance. They are carried out in several materials and are sure to prove a boon to the woman. Clothes are a necessity and the wise woman will but not many but enough, and economically as well. This year the fashions are such that it is quite possible to obtain garments that will look fitting for several occasions. And these combination styles in suits and coats are the result of the planning and experience of the fashion makers and are a boon to those of us who must of necessity dress on a small income.

A Chemise Hint If you are a lover of the empire effect in chemises you will appreciate this way of obtaining it. Make your chemise as usual, either the straight kind in the envelope variety. Crochet a neat little beading around the top and then make about twelve of four-inch inches of beading insertion to match the edge. Sew this across the front of your chemise at the high-waisted line and run ribbon through the beading at the front and sewing the ends where the insertion ends, just to the front of the side seams. You will have the high-waisted effect and a decorative one as well.

Black and white costumes are in great vogue in Paris. Lining the sash with white satin is strikingly chic. Fashion is ever inconsistent. Along with the new suits showing snugly fitting lines are shown topcoats in loose, belted effect and full sleeves.

A college frock is made of dark blue silk crepe with a touch of embroidery and self-covered buttons. A white sash, hat trimmed with dark blue band and ornament is worn. Draperies grow more profuse. Many skirts are draped in lines that are quite unique. Faneled effects are very strong in evening dresses. Sometimes one frock will boast of two, and then

OTHER VIEW POINTS

Defenders of Germany are wont to brand all newspapers as pro-British when those newspapers publish articles derogatory to the British.

So the devaluation of German duplicity in Argentina wherein the diplomats of Sweden were convicted and messenger of the Great Cause and his "take-story." All newspapers that commented upon the affair were held up as going off half-cooked.

The defenders of Germany are the defamers of the American press.—New Bristol Herald.

THE WAR PRIMER

By National Geographic Society.

Island of Oesel

The National Geographic Society issues the following war geography bulletin on Oesel, an island in the Baltic where the Russians have an aviation base which was recently bombed by German airplanes.

"The island of Oesel lies like a great and above the Gulf of Riga, almost completely shutting it off from the waters of the Baltic sea. Together with the smaller islands of Moon and Rundo, (the latter the subject of a recent war geography bulletin) it forms the Oesel district of the Russian Baltic province of Livonia. It is now known as the island of the Courland and has an area nearly three times that of Long Island, N. Y., but with a population not exceeding 65,000 most of whom are Estonians.

Arensburg, the capital, is practically the only population center in the island. It has some 5,000 inhabitants engaged largely in trade in grain, potatoes, and whiskey and fish.

The town of Oesel is situated one hundred and six miles northwest of Riga. In times of peace there is a bi-weekly steamship service between the two cities, but during the war the service is required about eight hours. Practically the only interesting building in the town is the Old Bishop's Castle, erected in the 13th century but still well preserved, unless the bombs recently dropped by the German raiders have demolished it.

From August in ordinary times Arensburg is visited by several thousand tourists from the mainland who come to enjoy the sea bathing and the town baths, which are supposed to have special curative properties.

Oesel began to figure in the history of the Baltic early in the 13th century. Waldemar, King of the Danes, took possession of it and erected a castle there. The stronghold was soon destroyed by the Estonians, however. In 1522 the Brethren of the Sword introduced Christianity on the island and its government was entrusted to a line of Bishops, the last of whom, in 1710, sold the island to the Knights' took possession, sold the territory to the Danes. In 1845 the island passed to the Swedes who held it until it was incorporated in the kingdom of Russia during the first quarter of the 19th century.

The small sturdy horses of Oesel like those of the Shetland islands are noted for their mettle and endurance.

Made-in-Connecticut War Interviews

Why We Must Send Men as Well as Money

An interview with Joseph G. Kitchell representing the Middlesex County Auxiliary Committee, Connecticut State Council of Defense.

Reasons why the United States must send men as well as money to aid in the cause of the Allies are given by Joseph G. Kitchell, representing the Middlesex County Auxiliary Committee of the Connecticut State Council of Defense in a "Made-in-Connecticut War Interview" made public by the Council today in answer to the question, Why must we send men as well as money, Mr. Kitchell, who is Captain of Company F of the 15th Connecticut Home Guard, made the following statement:

"We must send men as well as money because by the sending of men we win the war, and at this juncture only the United States can respond adequately to both needs.

"Men and money are economic commodities and as life and property are the most valuable and best guarded of mortal accessories what greater could be given?

"This analysis of the situation coming from the father of a son about to enter for France with the 165th Infantry, was sincere and critical.

"Money may be the sinews of war
