Fired, Out? TEACHERS IN MOVE FOR LEGISLATION

Going After Better Tenure Regulations for Profession

Chicago, Ill., Jan. 18.—The executive council of the American Federation of Teachers, following action taken at the recent convention of the organization held in St. Paul, is launching a nation-wide campaign for better tenure legislation for teachers. State legislatures will be asked to remedy existing conditions relative to the employment and retention of teachers, who believe that injustice lies in the prevailing system. The American Federation of Teachers authorities assert that remedial legislation will go far towards raising the standard of the teaching profession, inasmuch as it will obviate arbitrary dismissal of competent teachers by autocratic boards of education.

"In asking for a decent tenure legislation," said Charles E. Stillman, president of the American Federation of Teachers, at Chicago headquarters, "our organization is not animated

by any desire to protect the inefficient teacher. In fact, the American Federation of Teachers is interested in providing the machinery by means of which incompetent teachers may be removed from the school system. Far from protecting incompetency, the American Federation of Teachers has gone on record in a most revolutionary measure for the protection of the public schools, by demanding for its organization professional training as a prerequisite for the chartering of a local."

President Stillman said the American Federation of Teachers maintains that tenure should be permanent during efficiency after the lapse of the probationary period, which should not exceed three years; that all dismissals, both during and after probation, must be for causes definitely embodied in the educational law, such as gross insubordination, inefficiency and conduct unbecoming a teacher, and that after the probation period dismissal for any cause, including inefficiency, shall be authorized only by an impartial trial board.

Appeal from the decision of a trial board may be made to the civil courts, would also be allowed.

The Federation officials say they see a cultural wage for teachers and

explain that this is a wage which will enable them to live according to the requirements of their position, to provide for such hazards of life as illness and old age, to provide for culture, recreation and professional improvement, and to maintain self-respect.

Besides demanding certain working conditions, they also assert the right of teachers to participate in the administration of the schools and establish the principle that the teachers are entitled to the rights of free expression and the right to organize and to affiliate with such groups as they find expedient and deem socially and spiritually sound.

The American Federation of Teachers is affiliated with the American Federation of Labor.
