Washington, July 21—A committee of the Zionist organization of America called at the White House yesterday to present the thanks of American Jews for the interest taken in their behalf by President Harding and particularly for the letter of sympathy written by him at the time of the Zionist mass meeting held in New York to welcome Dr. Chaim Weizmann.

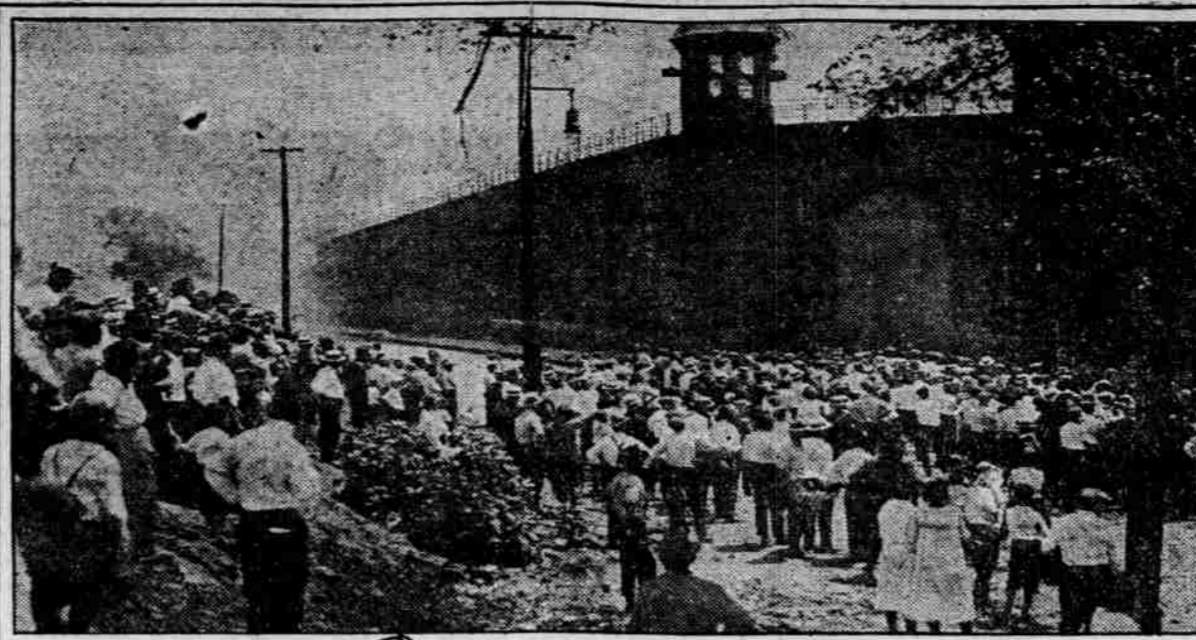

Resinol

Does wonders for poor complexion. It's surprising how rarely the proper use of Resinol Ointment and Resinol Soap fails to clear away blotches, redness, roughness, etc., and give the skin its natural freshness and charm. Sold by all druggists.

VETERAN RIVER CAPTAIN TELLS STORY OF THE BELLS OF THE OHIO

Bellaire, Ohio, July 21—"In the old days to have a fine boat minus a special bell was like trying to run a circus without the elephants," said Captain Jeff Frame, wharfmaster at Wheeling, W. Va., telling about the Ohio River steamboats of a half century ago. "During the Civil War both armies took most of the good bells off the boats and junked them to obtain the copper content," Captain Frame continued. "Most of the bells of that time and for years afterward were made in the shop of a moulder named Kay, in Louisville, Kentucky, who was an expert at fine tuning. He came to the Ohio Valley from Scotland. He charged one dollar a pound. He put into each bell a few ounces of silver. "After the Civil War all the big Pittsburgh-Cincinnati packets had fine bells. "A number of fine bells were used for years on Southern plantations. Others were sold by boat owners to schools and churches. The steamer Bedford, which sank at Marietta in 1898, is still remembered for its fine bell. After the boat had been salvaged the bell was sold to the city of

CONVICTS STORM PITTSBURGH JAIL WHEN FIRE STARTS.

CROWDS WATCHING THE FIRE

The interior of the Western Penitentiary of Pennsylvania, on the Ohio River, in the Woods Run district, near Pittsburgh, was wrecked, a dozen smaller buildings connected with the institution destroyed by fire and fourteen persons, nine of them convicts, injured in what is declared to have been the greatest prison riot and attempted delivery in the history of the United States. The nine convicts injured were shot by city police, county detectives and prison guards while attempting to fight their way to liberty. Virtually all of the 1,135 prisoners except fifty, who are women, took part in the rioting, both inside the main building and in the prison yard.

Try To Map Baffin Land

An attempt to map Baffin Land, the vast Arctic island southwest of Greenland, whose 1,500 miles of unexplored western coastline is a mystery today as when the English navigator, William Baffin, announced its discovery in 1616, is the main objective of the Donald B. MacMillan expedition.

The tiny 115-ton schooner Bowdoin, which carries the party north to the Arctic regions, is the vessel used in the expedition.

The head of the expedition was Peary's chief lieutenant on the latter's successful dash to the North Pole in 1909. He has made eight voyages into the Arctic regions. According to MacMillan's plans, he intends to reach Baffin Land about August 15 and establish a camp south of the entrance to the dangerous Fury and Hecla Strait, where the ships of Captains Peary and Lyon, sectors of the Northwest passage, were blocked a century ago. The location is 160 miles north of the Arctic circle and 700 miles south of Etah, Greenland. It is not far from the point where MacMillan's Crocker Land expedition passed the four winters 1913-14-15-16. On that occasion the expedition was once reported lost and two relief expeditions were sent out for it but MacMillan finally returned. He announced that Crocker Land was not "land," as believed possible by Peary, but an ice mirage.

During the winter of 1921-22, attempts will be made to explore the coast of Baffin Land and the following summer an effort will be made to penetrate the interior where, according to Eskimo tales, there exists one of the richest and most alluring fields of research in the north. The region is said to have great mineral deposits and to possess high mountains and beautiful lakes which have never been seen by white men. The region is believed to be an immense breeding ground for water fowl, whose nesting habits will be the subject of study. While the program of the expedition also calls for field work in zoology, botany, geology, meteorology and terrestrial magnetism. Special observations will be taken of the magnetic pole which was located first by James Ross in 1830 on the further side of the Boothia peninsula, and far from MacMillan's proposed winter camp.

An attempt will also be made to circumnavigate Baffin Land. In the event of a serious mishap to the Bowdoin, the party plans to retreat by dog sled to Fort Churchill, a trading post at the foot of Hudson Bay, and thence return to civilization by way of northwestern Canada.

MacMillan was born in Provincetown, Mass., Nov. 10, 1874, the son of a Cape Cod sea captain. He was graduated from Bowdoin College in 1898 and took up postgraduate work at Harvard in 1910-12. Before he was an explorer he was a teacher and public school principal. In addition to accompanying Peary on his last famous trip north, he was a member of the Cabot Labrador expedition in 1910 and as previously referred to, the leader of the Crocker Land Expedition three years later. In 1910 and 1912 he made ethnological studies of the Eskimos of Labrador. He is unmarried.

Headquarters of the First Army Corps announced that more than 1,400 men out of a total of 3,600 in New England have asked for their discharges.

Retail trade is buying canned goods in greater quantity than at any other time before this year, Libby, McNeill & Libby announced.

Bellaire for use on its Central School. "In the old days, just prior to the departure of the boats, the captain would toll the bells, thus giving every one time to get to the river shore before the boat left. River town residents knew the various boats by the different tones of their bells."

ONE OF THE LOOKOUT TOWERS IN FLAMES

MANHATTAN MOURNS THE DEATH OF ONE OF ITS INSTITUTIONS IN THE PASSING TO OBLIVION OF THE ORGAN GRINDER

New York, July 21—New York City folk called the wonder city of the world. But the metropolis contains an institution unique even in a city where things unique are taken as a matter of course. It is a hurdy-gurdy "garage," believed to be the only one of its kind in the country. Nestled among the stupendous skyscrapers that mark the lower district of Manhattan is a small, dingy, weather-beaten building, strangely out of place among the surrounding palaces of stone. This is the home of the hurdy-gurdy. Situated but a stone's throw from the City Hall, in a small block called City Hall Place, and passed by thousands of the city's dwellers daily, the building has gone unnoticed for years.

The hurdy-gurdy has long lent color to the sidewalks of New York. For years it was a common sight to see the gayly-dressed Neapolitans trundling their organ into a crowded street and become the center of a crowd of laughing and shouting dancing, joyous children when the first strains of music came from the organ. The small ones would sway to the tunes of the "garage" and other favorites, or lustily join in the chorus of some popular song. Even the grown-ups would stop and listen while the hurdy-gurdy man played some selection from "Il Trovatore" or "La Gioconda," or perhaps some sentimental tune of the "garage" and bring a catch to the voice and a tear to the eye. And when the song was finished the organist with a tambourine would pass among the crowd seeking his reward.

But all this will soon be a thing of the past, for the hurdy-gurdy, like the wooden Indian, the hoop skirt and great mineral deposits and to possess high mountains and beautiful lakes which have never been seen by white men. The region is believed to be an immense breeding ground for water fowl, whose nesting habits will be the subject of study. While the program of the expedition also calls for field work in zoology, botany, geology, meteorology and terrestrial magnetism. Special observations will be taken of the magnetic pole which was located first by James Ross in 1830 on the further side of the Boothia peninsula, and far from MacMillan's proposed winter camp.

PREPARE FOR HAWAII PRESS CONGRESS

Honolulu, Hawaii, July 21—Arrangements which are expected to result in the establishment of special press rates from Hawaii to some forty countries during the sessions of the Press Congress of the World at Honolulu next October are being made by W. S. P. Hawk, local manager of the American Corporation of America, it is announced.

It is expected that between 450 and 500 editors, publishers and newspapermen will come to the islands this fall, and a large number of them will undoubtedly desire to keep their respective publications informed by radio as to the Congress proceedings. The idea of special press rates occurred to Manager Hawk, and he is taking up the matter with the stern office. Later on the vice-presidents of the Congress delegates will be taken on visits to all of the larger islands of the Hawaiian group. Special entertainment programmes are being prepared by the residents of these islands and there will be a number of interesting features aside from the general sight-seeing tours that will be arranged on all of the islands.

Delegates, while they are at Honolulu, will have time to enjoy the surfing and swimming at Waikiki Beach. Visits will be made to the big sugar mills and pineapple canneries,

of the saloon had something to do with it. Men who had a drink or two, not the drunk men, seemed to be affected more by the music.

The "garage" has been in existence thirty years, the owner said. It had formerly been a saloon. For thirty years, he said, the doors of the building have opened, letting forth the Italian organ grinders and their shawl-clad women, carrying their organs. They went on regular routes, agreed among themselves, to different parts of the city, over the bridge to Brooklyn and even to points in Staten Island and Jersey.

"The music seemed to go right through them. Their eyes would shine and generally you would see a tear or two go slipping down their cheeks. Then they'd drop something shiny into the tin. Generally it was a nickel or a dime or a quarter. "But the grinders don't play 'Over There' any more. It isn't good for the organ business now. The people have forgotten."

The most remunerative sections of the town for the hurdy-gurdy men, the aged proprietor said, were where the ordinary American citizen lived. He responds to music the quickest.

"Most of the people who are now in the organ business," continued the owner, "are the old and crippled. On holidays, which are generally the best days, and organ grinder sometimes makes \$5. But you must remember that this is not an average and that there are many days on which they take in nothing and that the organ is often the sole income of the family. My sons I have sent to dental college in this way."

And thus we may soon record the death of another old institution.

News Briefs

Council of Ambassadors meeting in Paris considered appeal of the Allied mission in Upper Silesia for more troops to be used in maintaining order.

Nichols P. Wilson, Robert P. Matches and William A. Loomis, regarded as three leaders in the Emerson Motors Co. rotation of five years ago and sentenced in 1918 to imprisonment, were denied a retrial.

Steamer Binghamton, which went aground on the rocks at Grenney Lodge, N. E., is expected to be a total loss, as the vessel is reported breaking up fast.

Fifty-eight Japanese working on fruit and melon farms in Stanislaus County, Cal., were placed on automobile trucks and driven five miles out of town and were warned not to come back, according to San Francisco dispatch.
