Panama canal as it stands is about \$150,-000,000. This does not take into account such money as would have to be paid both have fought one another politically another, but McNamara pushed him aside for improvements already made on the Panama isthmus. Serious consideration of the Panama project has been impos- manded but very little to provoke a quar- to pull a pistol, but he was not quick sible owing to the refusal of its owners to set a price at which it could be booght. The Panama company was asked two questions, the first being: "Can you sell outright to the United States?" and "How

much will you sell for?" Representatives of the Panama company in conference with the commissioners to-day have continued to evade these questions and the American engineers have reached the conclusion, long ago foreshadowed that the Panama men have no intention of selling to the American Government, the opposition to the Nica ragua canal being based on a desire to nullify that project so that they can float another French loan to complete the work themselves. William Nelson Cromwell of New York is here as attorney for the
