Instead of waiting until after the Fourth of July (as is customary) before sinking the knife into prices, we do it now. Our policy demands that all outer garments be sold within the season for which they were designed. That we are determined to accomplish our purpose is clearly shown in the price reductions here quoted.

PASSED THE CENTURY MARK

One Hundredth Anniversary of Naaman's Creek School.

AN APPROPRIATE CELEBRATION

Fine Historic Address by Judge I. C. Grubb.

Remarks Were Also Made by Rev. J. Harry Chesley, Treasurer Henry C. Conrad, Ex-Mayor Charles E. Bird, Superintendent A. H. Spaid and A. B. Cooper.

With appropriate exercises the 100th anniversary of Naaman's Creek school, at Claymont, was celebrated yesterday afternoon. Among those present were many who received their first education in the old school. Miss Robinson, the principal, had charge of the music. Rev. J. Harry Chesley presided and addresses were made by Judge I. C. Grubb, Henry C. Conrad, ex-Mayor Charles E. Bird, who attended the school, Superintendent of County Schools A. R. Spaid and Alexander B. Cooper of New Castle. Mr. Bird will give two prizes, to be known as the Alfred D. Bird and the Ellen E. Conrad prizes, for the best average in mathematics during the year. Judge Grubb presented to the school the original parchment deed of the ground upon which the school house stands, made August 9th, 1805, by John Dickinson, Judge Willard Hall, father of the free school system of Delaware, and photographs of the old school house before the recent additions were made. Judge Grubb, in presenting the portraits said he was especially gratified to join in this centennial celebration of the erection of this historic schoolhouse because he was born in Brandywine hundred and this was where he began his education, when but 5 years old. Continuing, he said, many former pupils of the school have afterward attained success and distinction in various lines. One of these is Charles D. Bird, a native of the hundred, who was the late mayor of Wilmington. He also recalled another, William Clyde, president of the Clyde Steamship Co. New York. In fact Brandywine hundred has been prominent in producing men of worth and distinction in after life. Speaking of mayors, John P. Allmond, a native of the hundred, was also mayor of Wilmington. Charles Gilpin, years ago mayor of Philadelphia, and United States District Attorney a son of Edward Gilpin, Lydia Grubb, was also of the old Brandywine hundred stock, as was also Edward W. Gilpin, one of Delaware's best and wisest chief justices.

For du Pont, a former president of the Union National Bank, Wilmington, and one of the best lawyers and most beloved citizen of his day, was born and bred in Brandywine hundred and his distinguished uncle, the gallant Admiral du Pont, from his childhood to his death, was a resident of the hundred. "Today," he continued, "our present governor, Preston Lea, was also a native of her soil, so you see our old hundred of Brandywine, can walk erect and hold her head proudly among her sister hundreds of the State.

In referring to the deed and framed portraits and photographs, presented by Judge Grubb, he said: "This deed is the original parchment indenture made and signed by John Dickinson, more than 100 years ago. This old deed I found some months ago among some papers of my grandfather, James Grubb, Esq., of Grubb's Landing, who was one of the five trustees to whom John Dickinson conveyed the ground for school purposes forever. This framed likeness of John Dickinson is taken from a rare portrait of him. John Dickinson, and one of the most noted patriots and statesmen of the period which included the Revolutionary War. Dickinson at one and the same time, was governor of Delaware, governor of Pennsylvania, member of Congress from Delaware, and chief justice of the High Court of Appeals of Pennsylvania.

"Three States claimed him as a citizen, Maryland, where he was born, Pennsylvania, where he practiced law, and served in the high positions mentioned, and Delaware, where he was reared from the age of eight years and served as a delegate in the Continental Congress, a signer of the Articles of the Confederation of the Federal Constitution, as well as a member of her constitutional convention in 1792. He died in Wilmington in 1801 at his residence, which stood on the present site of the Wilmington Institute Building at Eighth and Market streets. He was buried in the Friends' burial ground, at Fourth and West streets.

"This other framed portrait is an excellent likeness of Judge Willard Hall, who was born in Massachusetts in 1780, and died in Wilmington in 1875, in his 95th year. He came to Delaware in 1803, practiced law at Dover until 1823, when he was appointed United States District Judge for the District of Delaware, by President Monroe, which office he held for 48 years, until his resignation in 1871. Judge Grubb also referred to the various other offices and positions of trust which he had held in Delaware, and said he knew him while he was eminent as an earnest Christian philanthropist, lawyer and judge, and with his New England training, ideas and methods, and a disinterested public spirit made an enduring impression upon the institutions and people of his adopted State. But he will be always remembered by the people of Delaware as a framer of our first State free school act of 1829, and as the real founder of the public free school system of Delaware, to which he gave the best efforts of his youth, his prime and his old age. Therefore, I have thought it most appropriate that his portrait should hang upon the walls of this oldest, at least one of the oldest existing schoolhouses, which has been longest in use under the free school act system, secured by him by the act of 1829. This framed picture is a photograph of this old schoolhouse before the recent addition and enlargement was made to it. It represents practically the schoolhouse as it stood when I first entered it in my early childhood, and as it had stood since its erection in 1805, 100 years ago. It was then known

Special Correspondence of Every Evening.

New Castle, June 8.—The New Castle Water Works Co. is making extensive repairs to the plant and President James G. Shaw stated last evening that the company was going to increase the steam pressure, which will make the water better than it has been in hot weather, by destroying the algae or growth that is bound to form in hot weather. The company will also try the aerating plan and erect a stand pipe about 50 feet in height, which will give a pressure sufficient to force the water by gravity over the highest building in the city.

Children's Day will be appropriately observed in the M. E. Church on Sunday evening at 7:30 o'clock. The full program of the service, which is entitled "Nature's Glory," will be published tomorrow.

SOUTH WILMINGTON DRAINAGE.

Injectors in Connection With the New Sewage System Are Working Satisfactorily.

George Rommel, Jr., engineer for the Street and Sewer Department, is of the opinion that the proposed plan for a new sewer project in South Wilmington will prove a success. The test of the Spruce street sewer, which was begun several days ago, is still in progress, and, so far, has proved satisfactory. The object of the test is to ascertain whether the sewer,

which has not been in service for some time, is in working order and whether it will take care of the drainage from some of the lowlands.

The injectors, which are used in connection with the lift, are working smoothly and Mr. Rommel believes that the machinery can be operated without difficulty.
