Woman's World.

Hints to Housekeepers.

Keep tea in a well covered canister

After washing never wring worsted dress goods. Shake them

Soak mildewed clothes in buttermilk and spread on the grass in the sun.

After blood stains have been well saturated with kerosene, wash in cold water.

Use lemon juice and salt to remove iron rust, ink and mildew on white goods.

Apply castor oil once a day to warts from two to six weeks and they will disappear.

Toilet vinegar, cologne water, alcohol and red wine are good for oily and moist hands.

No receptacle for soiled clothing, even if handsomely decorated, should be kept in a sleeping apartment.

Whiten yellow linen by boiling half an hour in one pound of fine soap melted in one gallon of milk. Then wash in suds, then in two cold waters with a little bluing.

Lemon will do for the yellow white sailor hat what shoe polish does for the worn black one. Remove the ribbon band, and with a slice of lemon clean the straw thoroughly. Put on a fresh band, and the hat is white and fresh.

An appetizing sandwich, and one that has the merit of novelty, is made from thin slices of brown bread spread with a very little butter, then with a layer of chopped English walnuts and almonds. The nuts should be slightly salted.

Kitchen Lore.

Raised Muffins.—Take a quart of wheat flour and mix it smoothly with a pint and a half of lukewarm milk, half a teacupful of yeast, two eggs, well beaten, two tablespoonfuls of melted butter and a little salt. Place the batter where it is warm to rise. When it is light, bake on a griddle in muffin rings.

Apple Float.—Stew six large apples, lay them on a sieve to drain and cool; then put them on a flat dish with about two spoonfuls of powdered sugar, the juice of one lemon and the whites of two or three eggs. Beat all this to a froth with an egg beater. Fill a glass bowl or custard cups with soft custard, and lay the apple froth on as high as it will stand.

Chocolate Pudding.—One quart of sweet milk, three ounces of grated chocolate, six eggs, one cup of sugar and one or two (according to taste) of vanilla. Scald the milk and chocolate together; when the chocolate is dissolved, take from the fire, and when cool add the yolks of the six beaten eggs and the whites of three beaten separately, the sugar and vanilla. Bake in a pudding dish for half an hour. Beat the remaining whites of the eggs, with five tablespoonfuls of sugar, spread over the top and brown lightly.

Cold Potatoes.—Never throw away cold potatoes. Cold boiled potatoes are best to fry, and require less time than raw ones, but they should be sliced thicker. Skin baked potatoes while they are warm; they are excellent for meat hashes or to heat in milk. It is also a nice way to chop them fine, when cold, sprinkle with salt and pepper and fry in pork fat or butter. Press the mass down in the frying pan, let it remain till it is heated through and the lower surface is browned, or stir occasionally with a fork till sufficiently browned.

Huckaback Darning.

Perhaps the most durable and effective work at present in use is the huckaback darning. The material used is the ordinary huckaback which comes at twenty cents a yard, and is from twelve to thirteen inches wide. The silk used is the Roman floss, and is very effective if used in black. Almost anything can be made, from a laundry bag to a sideboard scarf, or a gentleman's tie.

For a scarf or a bag, have any conventional design stamped, such as sunflowers, or daisies, and outline or work them in long or short, and then fill in the remainder of the material, round about them in any of the pretty darning stitches. Your ingenuity will suggest to you many new and fancy ones, and new ones for this durable material. Any article made in this work, and using these materials will last as long as anyone could desire, and will allow of being washed any number of times.

A pretty piece is a sofa pillow, with a wreath of leaves done in long or short stitches with the Roman floss in pale green. Another pretty one was seen in pale yellow, the design being buttercups.

Kerosene Emulsion.

Kerosene emulsions may be made by various emulsifying agents, but the most satisfactory substances and those most available to the average farmer and fruitgrower are milk and soapsuds. In each of these cases the amount of emulsifying agent should be one-half the quantity of kerosene. Following is a formula approved by the department of agriculture:

Kerosene	2 gallons	(67 per cent)
Common soap or whale oil soap	½ pound	(33 per cent)
Water	1 gallon	

Heat the solution of soap and add it boiling hot to the kerosene. Churn the mixture by means of a force pump and spray nozzle for five or ten minutes. The emulsion, if perfect, forms a cream which thickens upon cooling and should adhere without oiliness to the surface of glass. If the water from the soil is hard or has a large percentage of lime, add a little lye or bicarbonate of soda, or else use rainwater. For use against scale insects dilute one part of the emulsion with nine parts of cold water. For most other insects dilute one part of the emulsion with 15 parts of water. For soft insects like plant lice the dilution may be carried to from 20 to 25 parts of water. The milk emulsion is produced by the same methods as the above.

Vacation Time

Is at hand and is gladly welcomed by all, especially those whose duties in life have caused them to greatly run down their system to meet the requirements, physical and mental, forced upon them. With these and others, it is important, whether at home, at the seashore or in the country, that some thought be given to diet, and as further assistance to Nature, a good building up medicine like Hood's Sarsaparilla had best be resorted to. If the digestion is poor, liver deranged and frequent headaches seem to be the rule, Hood's will change all this and enable everyone to return to their home and business in a refreshed state of mind and bodily health.

Hay Fever.

As the 20th of August approaches, you should fortify your system with Dr. Humphreys' Specific "77," and escape Hay Fever. Price 25 cents at all druggists.

Hood's Pills act easily, yet promptly and efficiently on the bowels and liver. 25 cents.

NOTICE.

I WANT every man and woman in the United States interested in the Opium and Whisky habits to have one of my books on these diseases. Address B. M. Woolley, Atlanta, Ga. Box 382, and one will be sent you free.

Results prove conclusively that by the use of fertilizers rich in potash the crops of

Wheat and Rye

and all winter crops are largely increased and the soil is positively enriched. We will cheerfully mail our pamphlets on Potash, its Use and Abuse on the Farm, free of cost. They will cost you nothing to read, and will save you dollars.

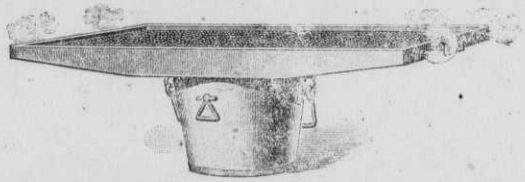
WANTED EVAPORATORS FRUITS, BERRIES, and VEGETABLES.



THE VICTOR STEAM EVAPORATOR Is the most perfect fruit preserver in the world. Lowest in price and simplest to operate. Will do in one hour what no other will do in ten hours.

Will Evaporate Apples in 40 Minutes.

AGENTS WANTED. A Fortune in Every COUNTY. Sells at Sight.

Here is a Good One.

Madisonville, Ohio.

Gentlemen:—I am forced to make an apology to you, since having thoroughly tested, your machine. I was so positive you were "gulling the public" with your broad statements that I could not help saying to you frankly that I would not believe your published statements, until I was thoroughly convinced by actual experiment. I am not only convinced, but must acknowledge that I have a great deal to learn yet, and shall never again write any concern a smart letter. I tested apples, peaches, cherries and several things, and they came out perfectly in so short a time, that I could hardly believe the work after seeing it. I am going to put my whole time in selling them. I have engaged about sixty machines. You may ship me 25 more at once. I can sell 500 to 1000 in this county.

W. E. ARNOLD.

Hamersville, Ohio.

Gents:—I will sell one thousand machines in Brown County. The more I test the Victor the better I like it. You may ship me twelve more at once.

G. W. SHINKLE.

VICTOR STEAM EVAPORATOR CO., CINCINNATI, O.

Send for Canvassing Outfit. Mention this paper

10 DAY. 20th DAY. 30th DAY. 40th DAY.

For sale in Wilmington, Dela., by N. B. DANOFF. Filled by H. K. WATSON, Druggists.

PATENTS

FOR INVENTIONS.

Equal with the interest of those having claims against the government is that of INVENTORS, who often lose the benefit of valuable inventions because of the incompetency or inattention of the attorneys employed to obtain their patents. Too much care cannot be exercised in employing competent and reliable solicitors to procure patents, for the value of a patent depends greatly, if not entirely, upon the care and skill of the attorney.

With the view of protecting inventors from worthless or careless attorneys, and of seeing that inventions are well protected by valid patents, we have retained counsel expert in patent practice, and therefore are prepared to

Obtain Patents in the United States and all Foreign Countries, Conduct Interferences, Make Special Examinations, Prosecute Rejected Cases, Register Trade-Marks and Copyrights, Render Opinions as to Scope and Validity of Patents, Prosecute and Defend Infringement Suits, Etc., Etc.

If you have an invention on hand send a sketch or photograph thereof, together with a brief description of the important features, and you will be at once advised as to the best course to pursue. Models are seldom necessary. If others are infringing on your rights, or if you are charged with infringement by others, submit the matter to us for a reliable OPINION before acting on the matter.
