

Uncle Sam Boosts Recovery With Public Works

A Nation-wide pictorial survey of projects into which the huge Public Works Administration fund is flowing to give jobs to millions and works of lasting value to the Nation.

Flood control projects are getting the benefit of Public Works money. And thousands of men are getting pay envelopes again in work of the sort shown here on the Dutch Bend bank revetment on the Ohio River, under supervision of Army engineers.

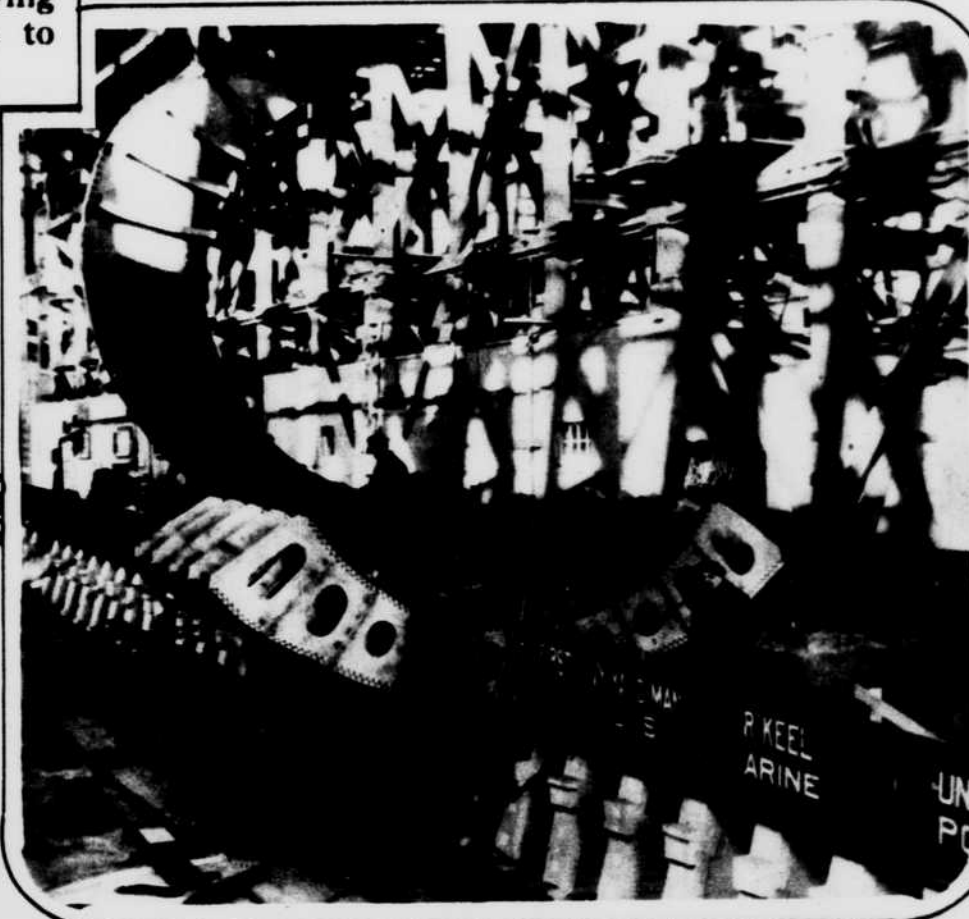

The great Boulder Dam project, on the Colorado River, is progressing full-tilt on its \$38,000,000 allotment of Public Works funds. It means jobs for thousands of men, both on the site and in Eastern machinery mills.

A perilous job, but he's glad to have it! Boulder Dam gives this steel worker the risky hours he's paid for. He is shown atop a cableway tower above the dam site.

Navy yards are humming with activity again. A scene in the shops of the Portsmouth Navy Yard as naval construction takes a spurt under its P. W. A. allotment.

Bolstering the Nation's first line of defense with Public Works money. The picture shows construction work on the submarines Portsmouth and Pike at the Portsmouth Navy Yard.

The big pay-off. Public Works pay envelopes await these workers in the electrical manufacturing machine shop at the Portsmouth Navy Yard.

These are happier days along the Mississippi. Thousands of men are employed under Public Works allotments in curbing the old river's obstreperous ways in flood time. This shows workmen, under the direction of Army engineers, fabricating concrete mattresses at Profit Island, La.

Building roads in Yosemite National Park, Calif. For all time the forests of the park will be better protected against fire by the access these roads will give to forest fire fighters.

The Marine Barracks at Philadelphia comes in for some much needed renovation with Public Works funds.
