What Wells did for history with such amazing success in "The Outline of History" he has now done for the whole science of life! Here in one thrilling narrative is the dramatic epic of all living things—a whole library of knowledge on every form of life, revealing the mysteries of the human body and human behavior; of animal life; life in the sea; insect life; reptiles and birds; plant life. Here is everything you have always wanted to know about the origin and evolution of all the inhabitants of the universe. In fascinating text and pictures, H. G. Wells, in collaboration with Julian S. Huxley and G. P. Wells, unfolds the secrets of birth, sex-life, the workings of the body machine in man and in all other living things.
