

The U.S. S. Oregon City, one of the new heavy cruisers, which carried 500 Reservists and an equal number of Regular Navy men on an October training cruise to Bermuda and back to Boston.

lavy Cruises on Peace Missio

By Lt. Don Martin, U.S. N. R. Editor of the Naval Reservist

TTENTION of Washingtonians today—Navy Day—is focused on activities of the Nation's first line of defense, and particularly upon the Naval Reserve, in which many District area veterans of World War II are participating as civilians.

Sixty-six Naval Reservists of the Potomac Naval Command returned early last Sunday morning from the first 14-day cruise of the postwar Reserve training program. Together with officers and enlisted men of the 1st, 3d and 4th Naval Districts, they made up a complement of more than 500 Reservists who sailed aboard the new heavy cruiser, U. S. S. Oregon City.

Reporting aboard the 13,700-ton fighting lady at Philadelphia Navy Yard on October 6, the Reservists joined an approximately equal number of Regular Navy personnel to make up the ship's company for the trial cruise.

High lights were liberty stops at New York City and Bermuda. The Reservists were disembarked on October 19 at Boston.

Program Calls for 35,000 To Cruise Each Year

The U. S. S. Oregon City is assigned to the 4th (Reserve) Fleet under the command of Vice Admiral Daniel F. Barbey and served as the trip. During a press conference aboard. aboard the sleek 674-foot cruiser,

Despite the failure of the planes to attack, radar continued searching surface and sky. In fact this had been going on ever since the ship got underway. All targets appearing on the radar screen were plotted and tracked. Within about a minute from the time a target was picked up men working on the plotting boards were able to tell its direction and speed and if it was another ship, to inform the officer of the deck at what distance the other ship would pass the Oregon City, if the courses of both ships were maintained.

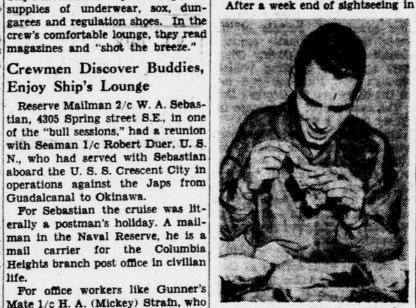

Many Hazards to Vessels In this manner, ships of the modern fleet are protected from collision and other disasters that
