DIED OF WOUND LIKE M'KINLEY'S. SMITH ONCE NEARLY RECOVERED.

Discharged From Hospital a Week or So Ago—Thought to Have Excited Too Violently—History of the Case.

Henson Smith, a negro, whose chief claim to distinction lay in the fact that he was wounded in a similar manner to the late President McKinley, is dead.

The negro was shot by Ernest Norris, a young white man, on the farm of Zachariah Briggs, near Gaithersburg, on the evening of September 24.

Smith, when first shot, was brought to this city in a critical condition. He was taken to the Emergency Hospital.

Under the eyes of physicians Smith began the battle for life. His case was extraordinary in that he seemed daily to improve.

On examination I found that Smith had four holes in the intestines. A large artery was also severed by the bullet.

The course of the ball could be traced through the lining of the stomach, the intestines, and into the muscles of the back.

On the first night we performed an operation, following Smith's arrival. This was successful. The artery was properly tied.

The shot which hit him in the chest was fired at very close range. Williams declared. "There were powder marks all around the wound."

Mr. Warfield called. Williams found no traces in the room. There was not a drop of blood anywhere in the room between the door and the body.

W. W. Warfield, the proprietor of the Kenmore Hotel, described the building in detail.

He gave the names of the occupants of the various rooms on the fourth floor, where the Bonine family occupied rooms 46 and 48.

Mr. Gould emphasized the fact that there was an electric push button on the wall beside the door in Ayres' room.

Under cross-examination Mr. Warfield said that the windows of the hotel parlors on the second floor were always left open at night for ventilation.

"I object to the question," said Mr. Gould. "It is not admissible."

Attorney Fulton made an argument in which he said that the defense could prove that the defendant had made arrangements with the witness to leave the hotel.

BATTLESHIP TYPE AGREED ON. Board of Construction Designs Two Powerful Vessels of War.

The plans for the two heaviest and most powerful battleships projected for the United States Navy were completed yesterday.

At the meeting of the board Thursday the much discussed question of the arrangement of the main battery of these formidable armaments was arranged amicably.

Each of these ships will have a main battery of 12-inch guns. The only war vessels of greater caliber recently built down by England.

CAUSE OF DEAFNESS. The Most Common Cause Only Recently Discovered.

It has been stated on good medical authority that nine-tenths of cases of deafness are caused from catarrh of the ear.

It is a little far-fetched to say that most cases of deafness are caused from catarrh, but it is certainly true, and anyone who has had a severe catarrhal cold must have noticed how the hearing was affected while the cold lasted.

With catarrh suffers this impairment of hearing becomes chronic and grows worse the longer it is neglected.
