

Keen as Spring itself

These boys are fully alert and alive, because the new wine of Springtime is in their veins. Yet other little boys and girls are beset with Spring weariness and weakness—dull-eyed, moping, shirking both study and play. Perhaps yours is among them. If so, remember that Gude's Pepto-Mangan is a splendid blood-building, invigorating tonic that gives permanent benefit and does no harm.

Gude's Pepto-Mangan

"The Red Blood Builder"

It tones up, boosts up, braces up the whole system by increasing the number and oxygen-carrying capacity of the red blood cells. It increases the color, improves the appetite, fills every part of the body with renewed health, power and strength. Easy to digest, exceedingly pleasant to taste. Universally prescribed by the medical profession.

Pepto-Mangan is made only by
M. J. BREITENBACH COMPANY, Manufacturing Chemists, New York

FRIENDLY WARNING:
There is only one Pepto-Mangan and that is Gude's. Sold in bottles and packages as shown here. Sold by druggists everywhere.

WRIGLEY'S

How else can you get so much long-lasting benefit, so much real satisfaction for your sweet tooth at so small a price?

SPLIT IN CABINET AROUSSES COMMENT

Peek's Statement Intensifies Glass-Redfield Difference Over Industrial Board.

POLITICS HINTED AT

The outcome of the cabinet split over the "late" industrial board and the effect of the final abandonment of the plan devised to stabilize the industries of the country during the readjustment period were subjects of the keenest interest and speculation in official circles here today.

Will it be possible, it was asked, for Secretary Redfield of the Department of Commerce, who fathered the industrial board plan, to work longer in harmony with Secretary Glass of the Treasury Department, who has aided and abetted Director General Hines of the railroad in throwing a monkey wrench into the machinery of the board?

"The old guard dies, but never—reigns," was the comment of one member of Congress today in regard to the break.

G. N. Peek Makes Charges.

Fresh fuel was added to the fire last night when George N. Peek, chairman of the industrial board, which died last week, gave out a statement charging not only Director General Hines, but also Secretary Glass and the administration with a big A, with being responsible for the failure of the plan which had been worked out to stabilize industry here while the nation is changing from war to a peacetime basis.

Peek insisted that there was some political reason for the change in the attitude of the administration which had not been revealed.

Hardly had Mr. Peek's statement been received, which was issued as coming from a "private citizen," when Secretary Glass penned an answer, in which he charged that there was "hardly one accurate statement or sane deduction in all of Mr. Peek's intemperate screed."

Mr. Peek, in his statement, said that the public would demand an explanation of the wrecking, apparently on the obstinacy of a single individual, of a plan to make an immediate reduction in the cost of living of such an apparent national value.

"In theory the plan was approved almost unanimously by business men and associations, and by editorial and press comment the country over, in practice the plan has been proved by the order books of steel producers and the buying revival which immediately followed the announcement of steel prices, and ceased immediately upon the railroad administration's rejection of those prices," Mr. Peek continued.

Hits at Attorney General's Opinion

"It is inconceivable that the railroad administration's unsubstantiated objection alone was sufficient to justify the abandonment of a policy of such importance. Nor toward the end has the director general been alone in thwarting the purpose of the board. The Secretary of the Treasury has taken a stand in direct contradiction with his message to the President urging the creation of the board. The Attorney General has rendered an opinion that the plan of the board contravenes the Sherman act, but the facts assumed as the basis of that opinion are so inconsistent with the actual course of conduct of the board as to render the opinion inapplicable, yet it has been used as a basis for the abandonment of the board's plan.

"That the administration would commit itself against the public interest merely to support the ancient and discredited railroad slogan, 'the public be damned,' is unthinkable. Yet, after all, it is the administration, not the director general alone, who had power to abort the board.

"Thus, there is no question that the board was set up to do exactly what it has done, and was set up with the full knowledge and assent of the administration and was given God speed upon its way to Mr. Glass.

Hints at 1920 Politics.

"In the beginning, did the present opponents of the board fail to foresee the far-reaching results to be achieved and was the growing importance and power of the board's policy too powerful a political engine to leave outside the administration's arsenal and in the hands of a non-partisan board? Does the administration plan for 1920 a platform of state socialism which it now finds inconsistent with the results achieved by the board? Or, after all, am I giving too much credit for an acumen that does not exist and is what the board has encountered merely the machinations of the old railroad guard as represented by Messrs. Lovett and Vailaters and imposed on a too complacent director general, or on a director general too jealous of his own prerogatives to see beyond the confines of his little cordon?"

"The board cannot answer. It can only depart more in sorrow than in anger, and in great disappointment, from a lost opportunity to serve the country by a simple and sensible plan to reduce the cost of living and to return prosperity. In doing so it leaves a single message.

"The plan of the board was good. It is capable of accomplishing what it promised. The administration owes it to the nation to put that plan into immediate execution at the hands of some agency in which it can feel political confidence and sympathy."

Mr. Glass Makes Rejoinder.

After he had read the statement issued by Chairman Peek, Secretary of the Treasury Carter Glass gave out a statement in which he took sharp issue with Mr. Peek. Concerning the fixing of prices he said his view was that the board was "hopelessly committed to an unsound and dangerous policy." As to Mr. Peek's references to his attitude toward the board, he disposed of them with the declaration that the former had "persistently and consistently practiced deception in nearly every public statement he had made."

"The industrial board," Mr. Glass said, "after conference with the steel interests, but against the express protest of the representative of the railroad administration, approved a scale of prices below which, the industrial board announced, the public should not expect to buy during the year. The attempt thus made to fix minimum prices for the public seemed to me wholly indefensible and contrary to fundamental principles of economics, of public policy and of the law. Surely the healthy restoration of industrial life and activity is not to be found in the perpetuation and exaggeration, months after the cessation of hostilities, of the artificial conditions which in war time were tolerated as necessary evils."

University Degree for Queen.

BRUSSELS, April 20 (Correspondence of the Associated Press).—Queen Elizabeth of Belgium has been nominated doctor of medicine by the University of Liege, in recognition of her work as nurse throughout the war. The rector of the university handed the diploma to the queen and read an address from the faculty in her honor.

First Derby at Epsom Since War.

LONDON, April 25 (Correspondence of the Associated Press).—This year's derby at Epsom, the first since before the war, is expected to bring out one of the largest crowds in the history of the famous race. The picturesque procession of coaches, brakes and donkey carts of the old days, from London to Epsom is expected to give way this time to a long line of speeding automobiles.

TEN DESTROYERS NAMED FOR NOTED AMERICANS

Naval Heroes of the Past and Former Secretaries of Navy Are Honored.

Names have been selected for ten additional torpedo boat destroyers now under construction. The Hovey is named for Ensign Charles Emerson Hovey, killed in the Philippines; the Long, for the late Secretary of the Navy John Davis Long; the Broome, for Lieut. Col. John Lloyd Broome, who served in the Mexican and civil wars, and the Alden, for Rear Admiral James Alden, who also saw service in those wars. These vessels are building at the Cramps plant, at Philadelphia.

The Gilmer is named for former Secretary of the Navy Thomas Walker Gilmer, and the Fox for former Assistant Secretary of the Navy Gustavus Vasa Fox. These craft are under construction at the New York shipbuilding plant, at Camden, N. J. The Aulick, building at Quincy, Mass., is named for Commodore John H. Aulick, who saw service in the war of 1812. The S. P. Lee is named for Rear Admiral Samuel Lee, who served in the civil war; the Nicholas, for Maj. Samuel Nicholas, who was head of the marines in the revolutionary war, and the Young, for Capt. John Young, who was lost at sea in 1781. The Lee, Nicholas, and Young are building at the Bethlehem plant at San Francisco.

OHIO IS TO FACE UNIQUE PROHIBITION SITUATION

Will Have "Dry" Constitution After May 27, But Has No Statutes to Enforce It.

COLUMBUS, Ohio, May 10.—Just what is going to happen to the liquor traffic in Ohio after May 27, when the prohibition amendment to the state constitution, adopted last autumn, becomes effective, is a problem that is bothering state and local officials.

The state faces the situation of having a "dry" constitution, but no statutes to enforce it. The general assembly enacted enforcement measures, but they must run the gauntlet of a referendum next November before they can become operative, and should the voters disapprove of them, there will be no particular authority by which to enforce prohibition, it is said. Anti-Saloon League officials say they have not given up hope of obtaining some legislation that will be effective May 27.

The Ohio State Rule Association, the "wet" organization, is planning its campaign to defeat the enforcement bills next November.

QUEEN OF THE SCOUTS ENDS 21-MONTH TOUR

Cruiser Chester First of American Warships to Enter German Port After Armistice.

NEW YORK, May 12.—The scout cruiser Chester, the first American man-of-war to enter a German port after the armistice was signed, and the ship that carried to Murnansk, Russia, a detachment of 300 American engineers to aid the allied troops in combating the spread of bolshevism, has arrived in the home port of New York after completing a detail of foreign duty extending over more than twenty-one months.

The Chester, termed by her officers and men "the queen of the scouts,"

brought home a record of having steamed more than 70,000 miles in foreign waters before the armistice was signed.

Convoyed 426; Lost 1.

During her tour of duty she convoyed 426 ships with the loss of but one—the tanker Forfar, which was torpedoed and sunk December 3, 1917, near Falmouth, England.

The Chester had perhaps its narrowest escape on September 5, 1917, when lookouts discovered a submarine a few feet away. The crew let go several depth charges at the spot where the submarine was last seen.

The enemy ship reappeared about 100 yards distant, too near to admit of the Chester's guns being brought into play. As the scout swung to get into position for another attempt to ram the U-boat it let go a torpedo, which hit but did not explode.

After the armistice the Chester took part in the "reception" to the surrendered German fleet, then went to Copenhagen, Denmark, where Prince Axel, crown prince of Denmark, was entertained on board. December 31 she left Copenhagen for Samsø, Germany, reaching that port shortly after 4 p.m. the same day—the first American ship to enter a German port since

diplomatic relations were broken. The final duty abroad was the trip from Harwich, England, to Murnansk, up to and across the arctic circle, through the Arctic ocean and around the northern tip of Norway. That "home-bound" pennant was then raised, the Chester touching at Brest to pick up a detachment of homecoming troops. Her commander is Capt. A. G. Howe.

CAN YOU DIGEST YOUR FOOD?

If you can't digest food you get no nutriment from it. Shredded Wheat is the whole wheat made digestible by steam-cooking, shredding and baking. Many thrive on it who cannot digest anything else. A breakfast of Shredded Wheat causes a feeling of comfortable satisfaction, supplying all the nutriment needed for a half day's work.

DETHOL

GERMICIDE, DISINFECTANT INSECTICIDE, DEODORIZER

Stands for more than a name. It is a guarantee of quality—of its high power and positive results, because of its scientific qualities.

Get a can of Dethol today—you'll be glad you did.

Solve the Moth Problem Absolutely with DETHOL

The protection of woolen garments, furs, sweaters, blankets, portieres, draperies, fine rugs, carpets, etc., against destruction by moths presents a problem to most people every spring and summer.

DETHOL absolutely solves this moth problem in a safe, sure, easy and inexpensive way.

Department, dry goods, furniture and clothing stores, garment manufacturers, jobbing houses, hotels, restaurants and churches find DETHOL indispensable for this purpose.

Spray the articles to be protected with DETHOL and hang them in the clothes closet or wardrobe, and once or twice during the summer spray them again while so hanging, to positively protect the articles. Rugs and carpets may be sprayed and allowed to remain on the floor or in piles, as in the case of stores.

Bed Bugs Haven't a Chance With DETHOL

Roaches and kindred insects in the home, store, workshop or in public buildings are a nuisance, a menace to health, destroyers of merchandise in stockrooms and are carriers of dirt and disease.

DETHOL when sprayed on infested places draws these pests from their hiding and kills them instantly—while you look. An occasional spraying with DETHOL thereafter will keep your premises entirely rid of roaches, ants and other insects—also rats and mice.

DETHOL is inexpensive because of its absolute effectiveness and being vapor-sprayed.

Rid Your Place of Ants and Roaches With DETHOL

very little is necessary to do the work. Why be bothered any longer with these pests when DETHOL will instantly kill, not only the insect, but its eggs? DETHOL does not rust the bed springs, stain the mattress nor hurt the bed or linens. It is easily sprayed everywhere in the bedroom, in all cracks where bed bugs live. It will not stain the wallpaper, and because of this feature you can positively rid your homes of these worrisome insects.

Every one dreads mosquitoes, they not only make life uncomfortable, but are an acknowledged source of

DETHOL Positively Kills Mosquitoes

disease—deadly diseases have been traced directly to the mosquito.

DETHOL will instantly kill mosquitoes. When breeding places are sprayed frequently with DETHOL it will kill the larva (eggs) and this prevents their spreading.

A sprayer full of DETHOL at hand will work wonders, because in a few seconds the place can be vapor-sprayed and these pests destroyed immediately.

The cost of DETHOL is nothing when compared with the comfort you enjoy and the good you will do in the prevention of disease.

Every drop of DETHOL does its work quickly, surely, safely, cleanly and inexpensively. DETHOL will not stain or injure the finest fabric or wallpaper. Spray it everywhere with perfect confidence. DETHOL has been tested by science and in practical use in thousands of homes, stores, institutions, hospitals, hotels, restaurants, offices, office buildings and factories, and makes friends everywhere.

Richmond, Va., Dec. 6, 1918.
Fawcett Company,
11 North Eighth Street,
Richmond, Va.:
Gentlemen—Having subjected your Dethol to a series of thorough tests, I have the utmost confidence in its value as an insecticide and bactericide.
Dethol is a highly efficient disinfectant, having a phenol content of ten and is therefore, to be recommended as a prophylactic in residences, public buildings and all places where personal contact favors a dissemination of germ diseases.
During the present influenza epidemic its use is to be recommended, not only on account of its direct value as a germicide, but also because of its efficacy in destroying insect carriers of disease.
Very truly,
(Signed) S. H. SHEIB, M. D.
