SARDINE PACKERS STRIKE.

Hundreds of Men, Women and Children Make a Protest. Eastport, Me., Oct. 3.—The entire male force of sardine factory employees of Eastport, with the exception of J. D. Young's factory, which will not reduce wages until next Thursday, left their work yesterday and refuse to return unless the old prices are allowed.

This the manufacturers refuse and say they will close for the season if the men do not return at once. The female help are powerless, as without the men the factories cannot run and fish cannot be put up. There are several hundred women and children affected.

PROTEST TURNED DOWN

South Washington Site for Garbage Crematory Approved.

ATTORNEYS THUS ADVISED

Commissioners Decide That Objectors to the Plant Have a Proper Remedy in Court—Collector Davis Renews Request for Appointment of a Deputy—Modern Morgue Wanted.

The position of the District Commissioners in respect to the protest filed by the South West Citizens' Association against the issuance of a permit for the construction of a crematory at the foot of South Capitol street is clear. In their judgment, there will be no nuisance created by the proposed establishment, but should it prove to be such, the proper remedy of the objectors is in the court.

In a letter addressed yesterday to Messrs. Davidge and Totten, attorneys for the protesting association, the Commissioners said:

"Referring to the application of Mr. Joshua N. Warfield, contractor for the removal of garbage, for a permit to erect a building or plant for the cremation of garbage and dead animals, near the corner of South Capitol and S streets, the Commissioners have, after mature reflection, reached the conclusion that they have no legal right to refuse the permit.

"This conclusion was arrived at only after a careful personal investigation of the different systems for the cremation of garbage and dead animals, and plants in operation in several of the large cities, with a view to determine the question whether such a business can be conducted without nuisance injurious to health or the comfortable enjoyment of property, and have satisfied themselves that it can be done.

THE SITE APPROVED.

"In approving the site for a garbage crematory at South Capitol and S streets, we have done so upon the belief that it is a suitable location and one that will result in the least harm to property owners and the public generally. One of the objectionable features of garbage disposal complained of consists in the procession of carts in the vicinity of a depot or crematory. This nuisance would be unavoidable in any locality.

"The apprehensions of the South West Citizens' Association that the proposed crematory will constitute a nuisance harmful to their interests are not well founded in the judgment of the Commissioners. If, however, they prove to be, then these apprehensions will have their proper remedy in the courts, and the action of the Commissioners in approving the site will not in anywise interfere with that remedy."

The communication was signed by President Ross.

In his estimates for the current year Collector Davis renews his recommendation of previous years for the appointment of a deputy collector.

The business of his office, the collector says, has increased to the point where an assistant is imperative for the proper dispatch of routine work.

INSTITUTES A COMPARISON.

In support of his request the collector cites as a fact that in every city of importance, and in the District of Columbia, Washington, the collector of taxes is provided with a deputy.

The recommendation made by Col. Davis embodied in the last appropriation bill, and for a time it looked as though there was a prospect of its success.

The House eliminated it, however, and the effort to have it restored in the Senate was futile.

There seems to be no reason to doubt that both these recommendations will be embodied in the Commissioners' estimates.

The same argument made last year in favor of both propositions will be re-embodied with additional facts before the next Congress.

Dr. C. M. Hammett, District coroner, who was at the District building yesterday to hand in his annual estimates for the expenses of his office for the year 1897, is very earnest in his advocacy of the construction of a new morgue.

RENEWS HIS SUGGESTIONS.

The doctor this year renewed his recommendation for an appropriation of \$12,000 for the purchase of a site and for erecting the building.

According to Inspector Brady's report made a year ago upon the Baltimore institution, a suitable building cost \$12,000, and in his estimate Coroner Hammett allows \$5,000 for a site and \$2,000 for equipment, the remainder being the construction fund.

The coroner pleads that the morgue should be modern and comfortable. It should be provided, he says, with a jury room, furnished, an office, furnished, a dissecting room, with improved apparatus for the performance of autopsies, a well-supplied laboratory and two or more refrigerators for the reception of bodies when first brought to the institution.

"The necessity for such a provision," said Dr. Hammett, "was never better illustrated than by a recent occurrence. A body was taken to the morgue, and after the usual formal had been observed, it was buried, the condition of the corpse being such as to render delay impossible. Two days later a telegram was received from a friend of the deceased person, asking that the body be held for orders.

"With a modern morgue at command, the body would have been kept at usual identification, a course impossible under the circumstances."

Dr. Hammett is of the opinion that the present morgue is a disgrace to the city.

ADVANCE IN SALARIES.

District Assessor Trimble, in his estimates for next year's appropriations, will, it is understood, suggest an increase in the salaries of his official force, recommending the following advances:

Assistant from \$1,800 to \$2,000; second assistant, from \$1,600 to \$1,800; one clerk, from \$1,400 to \$1,600; three clerks, from \$1,200 to \$1,400; license clerk, from \$1,200 to \$1,400; one other clerk in same service, also to \$1,400, and three to \$1,000 each.

It has been stated that the assessor will not ask for an increase in clerical force, or, if any, the additions recommended will be few for temporary service.

Mr. A. E. Kettle, the owner of Congress Heights, was before the Commissioners today, looking after the interests of his subdivision, and attended the opening of bids for the new school building.

The last Congress made an appropriation of \$9,000 for the schoolhouse, and in addition, passed two other bills for the Heights, one for a bridge at S and Capitol streets, and the other for the incorporation of a trolley railway company.

When built, the bridge will connect Congress Heights with Washington city, and, Mr. Kettle says, will be an improvement of great value.

Bids were opened by the Commissioners yesterday for the construction of a four room school building at Congress Heights.

The bidders were: John H. Howlett, \$9,750; Arthur G. Humphrey, \$10,495; Fuss & Butler, \$11,490; Pavarini & Thomas, \$9,999; D. F. Mookabee, \$9,589; Greer, E. Cabell, \$7,600; George W. L. Larkins, \$9,300; and C. Thomas & Son, \$10,456.

It is probable that the time for completion of the building will be extended to the first of November, as the bids were made prior to the opening of the bids. It was represented that the time given in the specifications was not sufficient.

Capt. George J. Fleeger, first assistant engineer Commissioner, returned to the city yesterday, after a month's vacation.

OFFICIAL CHANGES. Changes have been made in the sewer department official roll as follows: The resignation of A. W. Edens, rodman, has been accepted to take effect October
