

THE NEW-YORK TRIBUNE

Published every morning, at No. 30 Ann Street, New-York, and delivered to City Subscribers for \$10.00 per annum, in advance, and the paper is not sent out of the city for less than \$12.00 per annum, in advance. Single Copies Two Cents.

THE TRIBUNE

The Gazetteer of the State of New-York, together with General Statistics, &c. &c. (Vol. 1200, pp. 473) J. D. Smith.

This Gazetteer is got up in a plain way, but it is excellent in matter and abundant in information. A brief description of every Town as well as County, River, Lake, &c. in the State, is given, including the ascertained population of each Town and Ward. Every Village and Post-Office are also noted. Property, Production, &c. &c. are also carefully quoted, with all the detailed Statistics of the late Census, as well as the more general Statistics. This valuable work should at once be placed in every School District Library in the State.

THE COMPLETE WORKS OF CHARLES DICKENS, No. XXIII. ("Barnaby Rudge")

ENCYCLOPEDIA AMERICANA, No. XVIII. ("Copyright") and "SEA TALES," by the Author of "The Spy," No. XVIII. ("The Two Admirals") have just been issued by G. L. Curry & Co. 155 Broadway.

THE DICTIONARY OF ARTS, MANUFACTURES, &c. No. VI. has just been issued by D. Appleton, 200 Broadway.

THE WORKS OF FRANCIS BACON, Lord Chancellor of England, with his Life by Basil Montagu, No. XXVIII.

THE WORKS OF WALTER SCOTT, Miscellaneous, Prose and Poetical, No. XIX., and

THE FRENCH REVOLUTION, No. LIII. have just been issued by I. Post, 33 Bowery.

"The Progress and Results of Emancipation in the West Indies," by John Jay, has just been issued by Wiley & Putnam, 161 Broadway.

"The Municipal Gazetteer (Anti-Assessment) No. 13, has just been issued.

The body of John Canfield was found in the Canal, at Rochester, a few days since. In his pocket was a bottle containing about half a pint of whiskey. He was last seen some three months since near the Canal in a state of intoxication.

B. O. Wilmont, a young man, was drowned in the Scissors River, near Circleville, O. while fishing. He was in a small skin which was carried over a dam.

A Frenchman named G. J. Gaines, committed suicide at his boarding house, No. 7 Warren street, by taking laudanum on Sunday evening last.

The Grand Jury of Charleston, S. C., present the frog shops of that city as a nuisance.

HORRIBLE!—A most exceedingly occurrence took place in Grand Blanc last week: A promising son of Mr. Henry Leroy, formerly of this village, was, we are informed, nearly *decayed alive* by a snake. The boy, we understand, is about five years old, and is mangled and deformed in a most shocking manner—one side of the head with the eye and ear having been literally *eaten off*, and his body lacerated and bruised very badly in other places. He was alive yesterday, and it was thought would recover. (Flint (Michigan) Gazette.

MYSTERIOUS!—A half barrel which had been standing for some months under a shed adjoining the warehouse now occupied by Mr. Elbert, in this city, was opened yesterday, and found to contain the body and bones of a human being, apparently the body of a man. There was some pork packed upon the top of the barrel. The barrel stood with a number of others, which were there when Mr. Elbert took possession of the warehouse this spring. He is now endeavoring to identify the body.

Another question is—Where will the first Association be located? We answer that it should be located within ten or twenty miles of a large city, which would offer a good market for all its lighter products, such as fruits, vegetables, poultry, &c., the cultivation and care of which are so attractive, particularly for Children. An Association, in a new and thinly settled region, would probably fail or meet with great difficulties. If the Organization of the Association were intrusted to us, we should wish it situated in the neighborhood of New-York or Philadelphia.

We are asked also what sum a person will have to subscribe to become a member. To establish an Association of four or five hundred persons a capital of \$100,000 will be necessary, which would be \$100 for each member. We do not wish to undertake any thing unless we have sufficient capital to guarantee success. A small Association of forty families, or about two hundred persons, could be commenced with a far less sum. In such an Association great economies could be introduced, and it could be made very profitable for the members, but industry could not be rendered attractive, as the number is too small. We wish to encourage upon the larger scale,—that is, with four hundred persons.

If the persons who compose the Association furnish all the capital, they will have to pay upon an average \$1000 each, as \$100,000 are required for the whole. If, however, capitalists or persons who did not wish to enter the Association at once, could be induced to take, say, one half of the Stock as an investment, those who entered the Association could do so by furnishing \$500. This sum would not be lost, it must be remembered. If a person wished to leave, he could do so, and he would receive his money back by instalments.

If the Stockholders preferred buying the land necessary for the Association (about 1500 acres) on credit, they could commence with a good deal less than \$400,000. We believe that if four hundred persons will combine, who will take each \$500 worth of Stock, that an Association can be established. We should like those who wish to take part in the important undertaking of founding the first one to inform us of the same, and state what amount of capital they can furnish, their trades, or professions, &c. We do not wish this information immediately; we wish first to explain the practical Organization of Association, so that those who are interested in the subject may understand the exact nature of the system, and the advantages which it promises.

We must request correspondents to pay their postage; it will be but a small expense to them, while it would be a heavy one to us.

The last number of the *London Phoenix* (devoted to the cause of Association) contains a powerful written article upon Secularism and party Spirit. We regret that we have not space enough to reprint the superior article which appears in this highly conducted paper. They are of a strict scientific character, and we must confine ourselves to the practical part of Association, or to such theoretical subjects as are necessary to combat prejudices. We give below one paragraph of the article in question.

"Diversity of Doctrine, then, depends upon the diversity of character and education, for the truth of God is ONE in His Creation and His Holy Word. This oneness of the Word, however, and the Works of God, is infinite in its infinite varieties; and microscopic minds delight to dwell in parts, and feel

NEW-YORK TRIBUNE

BY GREELEY & McELRATH. OFFICE NO. 30 ANN-STREET. FOUR DOLLARS A YEAR. VOL. II. NO. 28. NEW-YORK, THURSDAY MORNING, MAY 12, 1842. WHOLE NO. 310.

ASSOCIATION; Or, Principles of a True Organization of Society.

The editorship of this column is distinct from that of *The Tribune*. Address letters, post paid, to A. BELLEMAN.

We have received a letter from J. N. BELLEMAN, Esq. of Walpole, N. H., relating to a joint-stock store or mercantile firm established by Farmers and Mechanics. We will give an extract from it in a day or two.

To Correspondents. We are daily in the receipt of letters from the country, inquiring the progress which our Doctrine is making,—when we hope to be able to commence the organization of a first Association, where it will be located, &c. &c. If those who write us do not receive an answer by letter, we trust that they will excuse us, as our time is completely absorbed. Not only have we to prepare the articles for *The Tribune*, but also others for Reviews, the columns of which have been opened to us. The Reviews for which we are writing are—*The Democratic Review*, *The Boston Quarterly Review*, and *The Dial*. (We will take occasion to say to the Editor of *The Dial* that we shall send him an article in time for the next number; the subject will be—Means of a final reconciliation between Religion and Science.)

We keep a record of the names of the persons who write to us, together with a memorandum of the propositions which they make. They will be informed of any movement which takes place.

We will endeavor to answer some of the leading questions which are addressed to us. Before so doing, however, we will glance at what we have done thus far. Since we have obtained the columns in *The Tribune*, which have afforded us the means of spreading our principles widely before the public, we have progressed with a rapidity which we were far from anticipating. From present appearances, we hope and trust that we may be able to organize—during the coming Summer and Winter—a Stock Company, and commence operations next Spring. Strenuous efforts are making by the Disciples of Association in France and England to spread the great Social principles discovered by FOURIER before Europe, and to bring about a practical realization of them there. This Country offers, in its enterprise and in the intelligence of the Working Classes, great facilities for carrying out promptly the noble Doctrine of Association, and let us be aided by a noble emulation not to be behind in the great work.

Our past articles in *The Tribune* have been *Practical, Introductory and Speculative*. We have not yet entered upon an explanation of the practical Organization of Association. This we are now prepared to do, and shall commence it to-morrow or next day. All information which may be desired, will be given in full as we progress in the practical description. We will, however, answer some of the principal questions which are put to us. The first is—When will an Association be formed? This, we cannot answer ourselves. As soon as we shall have explained the practical Organization of Association, so that the system may be fully understood, we shall then organize a Stock Company, and receive proposals for subscriptions to the Stock. It will require two or three months to lay before the public a clear idea of the practical Organization, and enable those who wish to take part in the Association to understand the kind of an enterprise in which they will embark. We hope that the cause will find friends and advocates enough to lead to the taking of the Stock during the coming Fall and Winter, so as to commence operations next Spring.

Another question is—Where will the first Association be located? We answer that it should be located within ten or twenty miles of a large city, which would offer a good market for all its lighter products, such as fruits, vegetables, poultry, &c., the cultivation and care of which are so attractive, particularly for Children. An Association, in a new and thinly settled region, would probably fail or meet with great difficulties. If the Organization of the Association were intrusted to us, we should wish it situated in the neighborhood of New-York or Philadelphia.

We are asked also what sum a person will have to subscribe to become a member. To establish an Association of four or five hundred persons a capital of \$100,000 will be necessary, which would be \$100 for each member. We do not wish to undertake any thing unless we have sufficient capital to guarantee success. A small Association of forty families, or about two hundred persons, could be commenced with a far less sum. In such an Association great economies could be introduced, and it could be made very profitable for the members, but industry could not be rendered attractive, as the number is too small. We wish to encourage upon the larger scale,—that is, with four hundred persons.

If the persons who compose the Association furnish all the capital, they will have to pay upon an average \$1000 each, as \$100,000 are required for the whole. If, however, capitalists or persons who did not wish to enter the Association at once, could be induced to take, say, one half of the Stock as an investment, those who entered the Association could do so by furnishing \$500. This sum would not be lost, it must be remembered. If a person wished to leave, he could do so, and he would receive his money back by instalments.

If the Stockholders preferred buying the land necessary for the Association (about 1500 acres) on credit, they could commence with a good deal less than \$400,000. We believe that if four hundred persons will combine, who will take each \$500 worth of Stock, that an Association can be established. We should like those who wish to take part in the important undertaking of founding the first one to inform us of the same, and state what amount of capital they can furnish, their trades, or professions, &c. We do not wish this information immediately; we wish first to explain the practical Organization of Association, so that those who are interested in the subject may understand the exact nature of the system, and the advantages which it promises.

We must request correspondents to pay their postage; it will be but a small expense to them, while it would be a heavy one to us.

The last number of the *London Phoenix* (devoted to the cause of Association) contains a powerful written article upon Secularism and party Spirit. We regret that we have not space enough to reprint the superior article which appears in this highly conducted paper. They are of a strict scientific character, and we must confine ourselves to the practical part of Association, or to such theoretical subjects as are necessary to combat prejudices. We give below one paragraph of the article in question.

"Diversity of Doctrine, then, depends upon the diversity of character and education, for the truth of God is ONE in His Creation and His Holy Word. This oneness of the Word, however, and the Works of God, is infinite in its infinite varieties; and microscopic minds delight to dwell in parts, and feel

afraid of looking into universals. Every nation, every tribe, every family look at you itself as if it were the most important thing in the whole world; and in these times of Protestant dissent, and infidelity, and private judgment, every individual looks upon himself as a unique, every individual looks upon his own feelings and passions as the standard of all truth and justice, and in the midst of this selfishness and individuality, the great ones of the Earth in hideous conflict with each other, weighing through the microscopic drops of time and space in which they live, pressing upon one another in their separate career.—Talking of 'respectability, and rank, and fortune,' as if any of them were superior to virtue, or the microscopic monsters that devour each other in the world of filthy water! But let us turn, and lift our eyes from Hell to Heaven!"

Review of the New-York Market.

Prepared for the New-York Tribune, mainly from the Shipping and Commercial Lists.

ASHES.—Potash continues active and in demand, and the sales for the past three days are estimated to exceed 1250 tons at 30c.

COFFEE.—Southern Java is scarce and wanted—Sales of 5000 lbs. at 24c, and 1000 lbs. Cuba White at 26c.

COGNAC.—The market is dull, but prices have not advanced. Sales of 1000 cases at 10c, and 500 cases at 11c.

GRAIN.—Wheat is in demand, and the market is active. Sales of 1000 bushels at 1.10, and 500 bushels at 1.12.

IRON.—The market is dull, and prices are low. Sales of 1000 tons at 10c, and 500 tons at 11c.

MEAT.—Pork is in demand, and the market is active. Sales of 1000 barrels at 10c, and 500 barrels at 11c.

WHEAT.—The market is dull, and prices are low. Sales of 1000 bushels at 1.10, and 500 bushels at 1.12.

YORK.—The market is dull, and prices are low. Sales of 1000 tons at 10c, and 500 tons at 11c.

WHEAT.—The market is dull, and prices are low. Sales of 1000 bushels at 1.10, and 500 bushels at 1.12.

YORK.—The market is dull, and prices are low. Sales of 1000 tons at 10c, and 500 tons at 11c.

WHEAT.—The market is dull, and prices are low. Sales of 1000 bushels at 1.10, and 500 bushels at 1.12.

YORK.—The market is dull, and prices are low. Sales of 1000 tons at 10c, and 500 tons at 11c.

WHEAT.—The market is dull, and prices are low. Sales of 1000 bushels at 1.10, and 500 bushels at 1.12.

YORK.—The market is dull, and prices are low. Sales of 1000 tons at 10c, and 500 tons at 11c.

WHEAT.—The market is dull, and prices are low. Sales of 1000 bushels at 1.10, and 500 bushels at 1.12.

YORK.—The market is dull, and prices are low. Sales of 1000 tons at 10c, and 500 tons at 11c.

WHEAT.—The market is dull, and prices are low. Sales of 1000 bushels at 1.10, and 500 bushels at 1.12.

YORK.—The market is dull, and prices are low. Sales of 1000 tons at 10c, and 500 tons at 11c.

WHEAT.—The market is dull, and prices are low. Sales of 1000 bushels at 1.10, and 500 bushels at 1.12.

YORK.—The market is dull, and prices are low. Sales of 1000 tons at 10c, and 500 tons at 11c.

WHEAT.—The market is dull, and prices are low. Sales of 1000 bushels at 1.10, and 500 bushels at 1.12.

YORK.—The market is dull, and prices are low. Sales of 1000 tons at 10c, and 500 tons at 11c.

WHEAT.—The market is dull, and prices are low. Sales of 1000 bushels at 1.10, and 500 bushels at 1.12.

YORK.—The market is dull, and prices are low. Sales of 1000 tons at 10c, and 500 tons at 11c.

WHEAT.—The market is dull, and prices are low. Sales of 1000 bushels at 1.10, and 500 bushels at 1.12.

YORK.—The market is dull, and prices are low. Sales of 1000 tons at 10c, and 500 tons at 11c.

WHEAT.—The market is dull, and prices are low. Sales of 1000 bushels at 1.10, and 500 bushels at 1.12.

YORK.—The market is dull, and prices are low. Sales of 1000 tons at 10c, and 500 tons at 11c.

REAL ESTATE

TO LET.—The large 4 story Store No. 75 Duane-st. A first rate for any and all purposes. Inquire at 75, or 100 Duane-st.

TO LET.—A workshop with a superlative light—rent low. Inquire of J. Locke in rear of No. 100 Duane-st.
