

THERE is not the shadow of a doubt about the future of Colmar Manor. It is irrevocably linked with the assured future of Washington. That is not a prophecy—it is a plain statement of a plain fact.

COLMAR MANOR ADDITION

Directly in the Path of Washington's Expansion

View looking toward Washington showing boulevard and trolley line.

LOTS \$59

\$5 Down
\$1 a Week
With a

NOTE—There are in this beautiful tract a few lots which, by reason of their extreme desirability and exceptional location, we are compelled to price at higher figures. Should you select any of these lots, proportionate terms and conditions will apply.

Six Months' Subscription to THE WASHINGTON TIMES

The ideal location of these lots, but half an hour from the Capitol, less than four and a half miles from the center of the city, directly on the Baltimore-Washington Boulevard, the greatest artery of traffic to the National Capital; directly on a trolley line, with water, gas and electricity already brought to the property—all these combine to offer an irresistible opportunity at any price. Combined with the ridiculous low price and phenomenal easy terms they give you your one great opportunity to cash in on the growth of Washington. But you must act quickly.

FREE AUTO SERVICE FROM OUR OFFICE

—They are going fast. Call, write or phone and we will make an appointment to take you directly to Colmar Manor without expense. You incur no obligation whatever in making this inspection trip. The matter of buying is left entirely to your own good judgment.

FIND GRAFT TRAIL IN AERO INQUIRY

The report of the Senate Military Affairs Committee on the aircraft program and the publication of sensational evidence before the committee is preparatory to the big smash which is expected to come this week with the report of the investigation conducted by Charles E. Hughes.

Find Graft Trail.
A trail of graft runs through the aircraft production program from the beginning to the present time.

Sabotage, proved and certain, coupled with criminal acts in production of aircraft, negligence and incompetency that can only be arrested by the strong arm of the law. Profiteering, extravagance, and criminal waste of materials of almost inestimable value to the speeding-up of aircraft production and its consequent effect upon the strength and effectiveness of our troops in the battle line.

Favoritism and high pay for supervision of work by persons incompetent for the task.

Inspection that was a farce and nothing short of contributory to murder in giving the stamp of approval at the factory to machines that would prove man-killers when tried out on the flying fields.

A singular grouping of men of Teutonic blood or extraction in important positions in aircraft production plants, and the rotation of skilled workmen of the same class from one aircraft plant to another.

Hughes May Be Silent.

It is possible that the Hughes report may be silent on the last subject, because the mere fact that such men are associated in one way or another with the aircraft production program proves nothing, but it has attracted the attention of other investigators, and has been a source of misgiving about achievements.

The finest spruce logs, singled out for aircraft production and brought at great trouble and expense out of the forests, have torn the machinery of sawmills to pieces and caused serious delay because great iron spikes had been driven into the trees and concealed as to defy the usual forms of inspection.

In one instance, a finished combat machine—a Bristol fighter—rolled out of the factory and ready for a test, suddenly burst into flames and was destroyed. This inexplicable occurrence was attributed to sabotage.

So many faults and defects developed in the construction of the Bristol fighter—not all due to admitted errors in modification of design—that the type was abandoned after orders for production in quantity had been given at a large expense to the Government.

GOMPERS TO FIGHT SOCIALIST PEACE

NEW YORK, Aug. 26.—Samuel Gompers, president of the American Federation of Labor, is on his way to Europe, according to announcement made public here today.

He will oppose radical elements and Socialists in Europe who are trying to force an immediate compromise peace with Germany.

He will endeavor to swing them to a complete endorsement of the Wilson war aims.

PATRIOTISM THEME IN MANY PULPITS

Patriotism was the theme of most of the sermons delivered in Washington churches yesterday.

"Through the force of the American army God is going to see to it that the world is saved for humanity and democracy," said the Rev. Dr. Isaac Ward, of the First Presbyterian Church of Boston, covering the ears of thousands at the Ellipse vesper services.

"God is the author of democracy," he continued. "He calls all men alike. God is democracy. He is calling to the nations of the earth to win against Germany in this great conflict. The Teuton is headed for the scrap heap. You can kill an American, but you can't whip him. Germany is now a piece of scrapped brass, forgetting God and forgotten by Him."

Dr. Ward preached at 11 o'clock yesterday at the New York Avenue Presbyterian Church on "The Gospel Mission of Prayer," declaring it to be the means of direct communication between the Christian and God.

The Rev. Dr. Henry Allen Tupper, of the First Presbyterian Church, took as the subject of his sermon "The Winning Warfare." He showed the progress of Christianity and showed its triumph over other faiths and its power to overcome evil in the world.

At a lecture last night, Dr. Tupper told of his experiences in Turkey and Constantinople, describing the Turkish capital and some of the traits of the Turkish people.

At the All-Corners' Bible Class, Church of the Covenant, yesterday morning, Charles S. Hamlin, of the Federal Reserve Board, spoke on "Some Precepts of the Bible."

TO DRAFT ITALIANS HERE

An Italian-American treaty similar to the British-American draft convention, signed today, provides for the reciprocal drafting of Italians in America.

A new treaty signed by Secretary Lansing and Japanese Ambassador Ishii extends the United States-Japan arbitration treaty.

\$75,000 FIRE IN WAR PLANT

MEDFORD, Mass., Aug. 26.—Fire, believed to be of incendiary origin, in the plant of the W. C. Miles Wood Finishing Company, early today, caused a loss estimated at \$75,000. The plant was used for storage by the Medford Woolen Company, which is working on war contracts.

Your country needs every penny; teach your children to buy War Savings Stamps.
