**Special  
"X" Chassis**

with SUPER-PERFORMANCE built in! Engineered, re-tested, and proved by Zenith to provide better performance even in tough reception locations.

**Picture  
Lock Circuit**

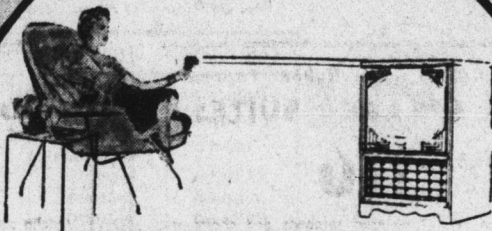

A Zenith-engineered advance that provides steadier "wobble-free" pictures in problem reception areas because the picture is "locked" in place on your screen!

**Twice The  
Picture Power**

Zenith's famed CINE-BEAM picture tube reflects ALL the light out of the tube to give you double picture power. This, plus Zenith's own CINE-LENS picture glass, means you get a picture that's sharper, clearer, more REALISTIC!

**ROOM-TO-ROOM MOBILITY**

Just roll it from room to room! Designed for true room-to-room adaptability—the jet cylinders on either side are indented to form comfortable carrying handles. And a special handsome base with easy-roll 3-inch casters is available at slight extra cost.

**NOW ON DISPLAY**

**FLASH-MATIC TUNING! by Zenith**

A flash of magic light from across the room turns set on... off... changes channels... and you remain in your easy chair. NO WIRES, NO CORDS! ALSO SHUTS OFF SOUND WHILE PICTURE REMAINS ON THE SCREEN!

**Zenith "Years Ahead" Engineering Gives  
You More Features, Super Performance!**

Notice how the new compact styling takes advantage of Zenith's new engineering. New picture tube gives a bigger picture, yet is actually shorter so that cabinet completely encloses tube with no ugly bulge sticking out of the back! And cylinders along the sides of the cabinet house the new Jet tuning controls. Cylinder on right contains antenna, so there is no need for unsightly rabbits' ears. Cylinder on left houses power line cord when not in use.
