United States Navy “Blazes Away” $1,000,000 Annually in Target Practice

American Gunners Are Tested Twice Each Year Under Conditions Representing Those of Battle.

In April and September the various Navy gun crews, after completing the United States Navy’s annual test at the Washington navy yard, are put through the most difficult tests ever given them. The United States Navy is not alone in this respect between the two hemispheres, but it alone gives regular tests to its gun crews and makes them go into battle conditions. In the United States the gun crews are divided into two groups, and they are taken back to the Washington navy yard, where every gun is put through a series of tests that are as nearly as possible like those that would be met with in battle.

The gun crews are divided into two groups, and they are taken back to the Washington navy yard, where every gun is put through a series of tests that are as nearly as possible like those that would be met with in battle. As a result of these tests, the crews are divided into two groups, and they are taken back to the Washington navy yard, where every gun is put through a series of tests that are as nearly as possible like those that would be met with in battle.
