The history of the Baker case shows that the tone of "society" in England is very low. It shows that even the influence of the Queen is powerless to save society from the self-inflicted shame of being a lawless society.

The Tribune has been grossly and deliberately misrepresented in regard to the proposed increase in the water-supply by two or three malicious city journals.

The scheme proposed by a number of gentlemen was to procure from the city the right to construct and operate new water-works.

A difference of opinion seems to exist in England on the question, "What is a gentleman?" Mr. Smalley is the author of a caustic letter on the subject of Col. Valon's Baker's triumphant return to the bosom of the London society.

The Tribune has proposed that capitalists advance the funds to enable the city to construct the necessary works, and accept as a consideration therefor a rental equivalent to interest on the same amount of bonds.
