Mayor Predicts \$30,000,000 Raise In 1918 Budget

His Estimate Is Based on Possibility of Direct State Tax

City's Expenses Up

Mitchell, Urging Support of Emerson Bill, Gives Facts to Legislators

An increase of \$30,000,000 in the New York City budget for 1918 over this year's \$212,000,000 one was predicted yesterday by Mayor Mitchell.

The city would need at least \$10,000,000 more for its own expenses in 1918, the Mayor said, in view of the higher cost of conducting the city government and interest charges for sinking fund and interest accounts.

Such a tax, he declared, would probably yield about \$22,000,000, which would go far toward meeting the estimated state deficit of \$28,000,000.

Referring to the future municipal budget, he said: "An estimate of the unavoidable increase in the New York City budget for 1918 indicates that the total increase will aggregate about \$10,000,000 over any direct state tax."

Senator Sage Explains \$347,500 Appropriations Voted in a Single Day

Albany, April 26.—Appropriations have been voted at such a liberal rate that the Senate Finance Committee felt called upon to-day to explain the reason was \$347,500 in one batch of bills reported favorably for improving canals, creeks, bridges, fish hatcheries and other local fixtures.

In explaining the \$347,500 worth of bills reported to-day, however, the Finance Committee said it did not take into consideration approximately \$115,000 in other "improvement" bills, which are likely to be passed.
