#### COUNTY COMMISSIONERS NAME COMMITTEE TO DRAFT RESOLUTIONS—REPORT TRUSTIES ESCAPED.

The death of A. M. McMillan, former clerk of the court of record, will be memorialized by the county in a set of resolutions which will be drafted by a special committee from the board of commissioners and adopted at a regular meeting Tuesday morning. Commissioners Soderlund, Hardy and Gandy were appointed to serve on the committee at a special meeting held yesterday to consider road business.

A radical departure in the conduct of the meeting was effected when a motion was carried to have the synopsis of the minutes of every meeting read before adjournment. Commissioner Soderlund offered an amendment to this, making a proviso that the clerk immediately after the close of the meeting furnish every commissioner with a copy of the minutes of the meeting. An aye vote was given by Mr. Soderlund and a nay vote by Commissioner McCurdy. Other members of the board did not vote on the question.

### Shipping Notes

The American steamer Wasco, with a cargo of cross-ties from Pascagoula, Miss., for New York, came into port yesterday for bunker coal and was docked at the Muscogee wharf for several hours. She went to sea late in the afternoon notwithstanding the stormy weather and rough seas.

The American schooner Lucy Evelyn, with a cargo of lumber loaded here at the G. F. & A. docks for Santa Cruz, cleared for that port today, though until a late hour she had not proceeded to sea on account of the gale which was blowing from the southwest most of the afternoon.

The schooner barge Geo. T. Lock, with a cargo of coal for Cuba, in tow of the Alkin Towboat Co. tug, Leroy, cleared yesterday afternoon late. This is the second barge load of coal to leave this port this week for Cuba. It is understood that a number of others are to follow.

The motor boat Adeline, Capt. John Griffith, owner, was sold yesterday by order of the U. S. district court, to the highest bidder for cash. The craft was bought in by its owner for \$135. This was the second sale of the boat under an attachment and it is understood the proceeding was merely one of legal form.

### SAVANNAH TO COMMEMORATE HISTORIC TRIP

Savannah, Ga., Mar. 8.—The centennial anniversary of trans-Atlantic steam navigation will be celebrated here on May 22, the date when the Savannah, the first ship to cross the Atlantic propelled by steam and the forerunner of the great ocean greyhounds of today, sailed from this port for Liverpool on her historic voyage. The Savannah was built at New York city and was launched on August 22, 1818. She was mastered by the two Rogers—Captain Moses Rogers being the commander, and Captain Stevens Rogers, the sailing master. The vessel left New York city March 28, 1819, and arrived in this city for the first time on April 12, 1819.

On May 22, 1819, the trip across the Atlantic was started from this port. Everything went well until June 17, when the vessel was stopped by the British cutter Kite, whose commander thought the Savannah was on fire and stopped her to assist in fighting the flames.

The vessel was stopped outside Liverpool by an English sloop of war, whose commander wished the American vessel to display the British colors above its own. Captain Rogers refused and threatened the British officer with a boiling water bath if he did not leave the ship. He immediately left.

The Savannah docked in Liverpool on June 20, after completing the voyage in 29 days and 11 hours. The engines were used only eighteen days on the trip.

The entrance of the Savannah under full steam caused excitement in Liverpool and while the vessel remained in port it was the center of interest. The Savannah then proceeded to Stockholm and on September 18, arrived at St. Petersburg, (now Petrograd), where she was inspected by the American and foreign ministers and the nobility.

The ship left St. Petersburg on September 29, 1819, and arrived in Savannah on November 30, after an absence of 192 days. This was the first and last trip of the Savannah across the Atlantic. Afterward her engines were removed and she was used as a sailing vessel between New York and Savannah. She was wrecked off Long Island in 1821.

## Better Safe Than Sorry

PASTEURIZED MILK is absolutely harmless. It is a heating process that destroys every harmful germ, leaving the natural taste, and making it just as nourishing and wholesome as ever. Pasteurized milk is certified milk—milk that you can feed to infants, to convalescents, with the positive assurance that it is as pure as distilled water. Experience has shown that cow's milk is the best for strength and tissue building purposes, but it must be as clean and as pure as possible, hence pasteurization—hence our milk.
