Now you can take calomel without the slightest objection. One Calotab on the tongue at bedtime with a swallow of water, that's all. No taste, no danger, no griping, no nausea, no salts. Next morning your liver is clean, your system purified and you are feeling like a two-year-old—with a hearty appetite for breakfast. Eat what you please,—no danger. Calotabs are so delightful that your druggist will refund the price if you are not delighted with them. Sold only in original sealed packages, price thirty-five cents. ## LABOR SHORTAGE SERIOUSLY FELT ON COUNTY ROADS

The roadmaster of Escambia county, in an interview regarding the condition of the roads, admits frankly that they are in bad shape at present, and explains that this is due chiefly to the recent heavy rains and the extreme shortage of labor. Formerly, he stated, it has been the practice to work the convicts on the roads; but now the convicted men are paying their fines, which they seem well able to do, instead of going to jail, and it is practically impossible to hire men.

This statement goes to emphasize the seriousness of the present labor shortage, and to prove that any man who needs employment and is able and willing to work can be well accommodated.

## Diamond SQUEEGEE TREAD Tires

Why their treads are black and their sides are red

Color cuts no figure in making the treads of Diamonds. For a tire tread must resist the mauling of rough and stony roads—the grind of macadam and brick.

When the toughest, most grizzly rubber that could possibly be made for Diamond Treads was made, it just naturally CAME BLACK! Black it will be always unless a tougher rubber is discovered.

But the sides of Diamonds are made red purposely—because Diamond Red Rubber admirably resists side wear, and those red sides make Diamonds distinctive—beautiful.

Watch those red-walled Diamonds—they're rolling up 5,000 to 8,000 miles for our customers as often as any other tires, and they COST YOU LESS than most other tires.
