 Rates: \$2.50 to \$3.00 per day. \$14.00 to \$17.50 per week. MRS. D. L. DUNHAM, Prop. (A woman of years experience in this business).

THE FLORIDA ROOSTER

A great deal has been said about getting rid of the roosters. Should the Florida poultryman follow the example in Missouri or New York?
 At the State Agricultural College, at the Short Course in January, Dr. N. W. Sanborn, extension poultry husbandman for Florida, said:
 "If you owned a horse for which you had no further use would you continue to keep him and pay for his feed? When the poultry breeding season is over, and

you will be thru with the need of fertile eggs, dispose of every male that will never be needed again. It is not usual to keep the same male for over one year. Unless of great breeding value he should be sold or eaten. You cannot afford to produce fertile eggs thru the summer months. The spotted egg is commonly the fertile egg, and when you take to market infertile eggs they will be worth more money. Kill, or yard apart from the hens, the rooster, and produce better quality eggs for eating."

COTTEN YIELD
BE A MILLION
BALES SHORT

AGRICULTURAL DEPARTMENT'S ESTIMATE PLACES CROP THIS YEAR AT ABOUT 10,986,000 BALES.

Washington, July 2.—A cotton crop about 1,000,000 bales smaller than last year's was forecast for this year by the department of agriculture in estimating prospective production at 10,986,000 bales.
 Acreage this year shows a cut of 8.7 per cent from last year's, the decrease being 3,247,000 acres, the total being 33,960,000. The agitation for a reduction in acreage which the department of agriculture says occurred in every cotton growing state, the scarcity and high prices of labor and unfavorable planting weather caused the heavy decrease.
 The propaganda for reduction of acreage affected principally the larger growers, according to the department, but most of the small proprietors and tenant farmers maintained or even increased their plantings this year. Many other farmers who had not

RESERVE BANKS
ISSUE SAVINGS
CERTIFICATES

TODAY THESE SECURITIES WILL BE OBTAINABLE IN \$100 AND \$1,000 DENOMINATIONS

Savings certificates in denominations of \$100 and \$1,000 will be issued by the treasury department Thursday for purchase and investment. Gov. Welborn of the Federal Reserve bank announced today.
 War savings stamps of denominations of \$5 are convertible into these securities, which bear the same rate of interest as savings stamps, 4 per cent, compounded quarterly.
 Widespread and continued saving and investment in \$5 stamps throughout the country has caused insistent demand for government securities which would combine the safety and profit of saving stamps with the convenience in handling and registration. The new securities have been issued in response to that demand and to provide a medium for investment of funds of fraternal societies, unions and other civic social and religious organizations which signified a desire to invest their funds in these government savings securities.
 One hundred dollar certificates are convertible into \$1,000 certificates. The limit of investment of \$1,000 for each individual which is a feature of the savings stamps issue has been retained.

grown cotton for years planted it this season hoping to receive the high prices prevailing at planting time.
 Most sections report the crop late and as a scarcity of labor. Boll weevils are reported very active in a large portion of the belt.
 In a statement of the cotton report the department said:
 The heavy cut of 8.7 per cent in the area devoted to cotton this year has resulted from the scarcity and high price of labor, unfavorable weather for planting and abandonment of fields in many sections because of inability to get the plant worked out of the grass, coupled with an agitation in every cotton state for reduction in the acreage.
 The propaganda for reduction of acreage affected principally the larger planters, but most of the small proprietor and tenant farmers who had disposed of their 1918 crop at a high price maintained or even increased their plantings. Many other farmers who had not grown cotton for years, planted it this season hoping to receive the high prices prevailing at planting time.
 In portions of Texas, Oklahoma and along the northern border of cotton production, wheat was planted last fall because of the government guaranteed price. In the sea island sections of Georgia and Florida there was a heavy reduction in acreage planted to cotton because of boll weevil ravages as in the case also in the newly infested sections of Georgia and South Carolina, considerable cotton already planted having been plowed up and planted to other crops.
 There is general complaint in most sections of lateness, too much rain, grassy fields and a scarcity of labor. Because of the mild winter of 1918 and the wet season to date, weevils are reported as very active in Southern and Eastern Texas, Arkansas, Louisiana, Mississippi, Alabama, Florida, and a large portion of Georgia and southern part of South Carolina.

TWO YOUNGSTERS CHARGED WITH TRAIN RIDING RELEASED

Arthur Woodall and Emile Harper, of Dothan, Ala., faced a charge of train riding in the court of record yesterday. The boys told a straight forward tale of their rattle-tail to return home after failing to get work in Pensacola and of their subsequent arrest by the constable at Molino, and were given their freedom after Judge Jones had lectured officers on the practice of arresting children.

Mosquito Bites
 Just as soon as you feel the effect of the Malarial Germs after being bitten by Malaria Mosquitoes, it is advisable to take GROVE'S TASTELESS chill TONIC to destroy the Germs and remove the Impurities. Pleasant to take. 50c per bottle.—Adv.
