ZELICCA GROTTO TO HOLD CEREMONIAL

Plans are being made for a big ceremonial by the officers of the Mystic Order of Veiled Prophets of the Enchanted Realm. This is the first ceremonial to be held this year and already a large class of Neophytes are in waiting to cross the hot sands of the Grotto's mystic desert and to look for the first time upon the veiled imps of the order. Monarch J. C. Clark announces that

a business meeting for balloting on petitions and the transaction of other business will be held at the Temple on the 21st inst., and the big ceremonial will be held on Wednesday the 28th inst. Prophet J. A. Lyle is chairman of the Banquet Committee for the big occasion and promises a rare treat in the way of "eats."

GREEKS CELEBRATE EASTER FESTIVITIES

Beginning their celebration of Easter

the Greeks in the city held patriotic exercises at the Orthodox Greek church, West Wright-st., last night and a big meeting of this race will be held today at the W. O. W. hall. At the meeting today a feast will be held. This celebration is one of the most notable of the holidays of the Greeks and is observed by all Orthodox members of the race. Only a few friends were invited to attend the banquet held today.

Seamless Porcelain Refrigerators

The illustration shows our new styles of One-Piece Seamless Porcelain Side Icing Refrigerators. Porcelain is beyond question the most sanitary of all Refrigerator linings. It is white and smooth with a lustrous surface so that it can be easily cleaned. It will not chip or crack, and with the rounded corners, absolutely seamless, it is very easy to keep clean. The outer case of these Refrigerators is constructed entirely of the best selected Wisconsin Black Ash, a tough, fibrous wood which will not check or crack. The linings are made of heavy gauge steel covered with porcelain fused on at a very high temperature and with ordinary care, will last a lifetime. The trimmings are heavy brass, nickel-plated, adding not only to the appearance of the Refrigerator, but insuring tight-fitting doors so essential to the saving of ice.

After Whooping Cough—What?

This is No. 4 of a series of advertisements, prepared by a competent physician, explaining how certain diseases which attack the air passages—such as Pneumonia, Influenza, Whooping Cough, Measles or even a long continued Cold—often leave these organs in an inflamed, congested state, thus affording a favorable foothold for invading germs. And how Vick's VapoRub may be of value in this condition.

Whooping cough is the "meanest" disease that childhood is heir to. While rarely fatal in itself, except to children under two years of age, still it hangs on so long—the coughing paroxysms are so violent, preventing proper sleep and digestion—that when the disease does disappear it leaves the child weakened and run down. In addition the violent coughing rakes and strains the air passages and after recovery this irritation frequently remains.

During this period of convalescence the child should be most carefully watched until full strength is restored and the air passages regain their normal tone. A prominent authority even goes so far as to say—"There is more criminal neglect in connection with whooping cough than with any other disease."

While the disease is active, Vick's VapoRub usually helps to lessen the violence of the coughing, but it is during convalescence that Vick's is most valuable. Because Vick's acts locally by stimulation thru the skin to draw out the inflammation, attract the blood away from the congested spots and relieve the cough. In addition the medicinal ingredients of Vicks are vaporized by the body heat. These vapors are breathed in all night long, thus bringing the medication to bear directly upon the inflamed areas.

Vicks should be rubbed in over the throat and chest until the skin is red—then spread on thickly and covered with hot flannel cloths. Leave the clothing loose around the neck and the bed clothes arranged in the form of a funnel so the vapors arising may be freely inhaled. If the cough is annoying swallow a small bit the size of a pea. Children's digestions are delicate—easily disturbed by too much "dosing." Vicks, therefore, is particularly recommended, since it is externally applied and so can be used often and freely without the slightest harmful effects.

Samples to new users will be sent free on request to the Vick Chemical Company, 234 Broad Street, Greensboro, N. C.
