BRIEF MENTION.

The Kimberly Diamond District, South America, exported more than £200,000 worth of cut and uncut stones during January.

Tremesvar, in Eastern Austria, a city of 32,000 people, is said to be the only town in the world lighted exclusively by electricity.

Among the 1200 laws regulating the French press is one centuries old, which threatens the proof-reader with death for even one blunder.

Savage dogs that kill their masters are condemned to a curious form of death in Japan. They are shut up in a box with a little food and are thrown into the sea.

President Garfield's two sons, who are visiting Col. Rockwell, called on President Cleveland recently. It is the first time they have entered the White House since September, 1881.

Since the present Czar of Russia came to the throne all the cannon required for the Russian fleet have been manufactured at home. Under preceding czars they have been purcased in Germany.

Gibraltar is thus mentioned in all Spanish official documents: "Our most loyal and noble City of Gibraltar, in the Campo of Gibraltar, City of Gibraltar being in the temporary occupation of the British."

Since the time of the Dutch occupation, 250 years ago, the whole west coast of Formosa has undergone great change. The harbors are sifting up, and the coast is gradually undergoing a movement of upheaval. Earthquakes have largely assisted in effecting this change.

Prince Bismarck in accepting the deeds of the Schouhausen estate, said that he would henceforth call himself Bismarck auf Schouhausen—a more complex combination of consonants than is offered by "Prinz," but a name that will more endear him to the German people.

A Boston swell, Henry Ligourney, who is about thirty years old, has an income of nearly $60,000 a year, a house on Beacon street, and has for some years been partial to the society of professional sports and theatrical celebities, has married one of the coryhees in the ballet of "Jalma."

One of the messengers employed in the French ministry of the interior was admitted to the civil service in 1859. He has therefore seen the rise and fall of no less than thirty-six ministers during his service of twenty-six years, equal on an average to one minister and a quarter per year.

The same firm which made the large south window in Westminster Hall in 1847 is now restoring it since its late destruction by dynamite. It represents arms of the kings and queens of reigning houses of England since the time of the conquest, and is the finest display of heraldry in stained glass to be found in the kingdom.

A bushel of fun was had at a St. Paul saloon April 1 by means of a rather cruel and practical April-fool's day joke. Some grim joker nailed a $20 gold piece to the floor and by means of a battery concealed behind the bar a thin wire was attached. Then the spot was soaked in water and whoever attempted to pick up the bonanza was treated to a terrific shock. The air of that place was blue with profanity all day.

The enormous wealth of the Orleans Princess is chiefly derived from Louis Phillipe's mother, who, in consequence of the death of her brother, the Prince de Lamballe, became sole heiress of her father, the Duke of Penthievre, the richest subject of France. He died in 1793. His daughter had, two days before his death, been divorced from her worthless husband, who was thus debarred from touching her property.

RUSSIA'S WAR ABILITY.

The Vast Forces She Can Throw Into Herat in a Short Time.

St James' Gazette.

The ability of the czar to push us has been questioned. It is said that he is far too weak in Central Asia for such an attempt; that in point of fact we are the stronger of the two, and that he knows it. We are pursuaded that there is error here which it is foolish to indulge. No authority whatever is or can be advanced for the statement that Russia is unprepared for an incursion in great force. For the contrary opinion there is the authority of not one or two, but all the most experienced and highly placed soldiers in India. Some time ago these men warned the government that there was a reason to believe a movement was on foot in Central Asia which might carry a Russian army to Herat and beyond before many months were past. Responsible British officers, men who had mapped out the routes and measured them, came to the following conclusion, that, even supposing Russia had to watch the German and Austrian frontiers with 900,000 troops of all arms, she could spare as many as 200,000 men for operations in the direction of India. Russia can, in seventy-seven days after issuing the orders, put about 23,000 men on Herat, with a reserve of like strength which could arrive in from forty to fifty days afterwards, with 12,000 more possibly available within twenty days of Herat. She can, in from seventy to one hundred days also after the order has been given, put about 13,000 men into Cabul, with a similar strength in reserve and her communications all strongly held. She can in ninety days put 7,000 men into Chitral and 4,000 men on the Cashmere frontier.

A CHILD!

My little son, now seven years old, broke out when a babe three weeks old with what the doctors called eczema, beginning on the head and gradually spreading over his whole body. He was treated for five years or more by various physicians without relief, and the little boy's health was completely broken down. About a year ago I was induced to use on him Swift's Specific, and two bottles cured him sound and well, and there has been no sign of a return of the disease. F. O. HOLMES.
Talbotton, Ga., Sept. 12, 1884.

Poisoned by a Nurse.

Some eight years ago I was inoculated with poison by a nurse who infected my babe with blood taint. The little child lingered along until it was about two years old, when its little life was yielded up to the fearful poison. For six long years I have suffered untold misery. I was covered with sores and ulcers from head to foot, and in my great extremity I prayed to die. No language can express my feelings of woe during those long six years. I had the best medical treatment. Several physicians successively treated me, but all to no purpose. The Mercury and Potash seemed to add fuel to the awful flame which was devouring me. About three months ago I was advised to try Swift's [illegible] and felt how it would again revive [illegible] in my breast; We did so, [illegible] but alas! alas! we we had spent so much for medical treatment that we were too poor to buy it. Oh! the agony of that moment! Health and happiness within your reach, but too poor to grasp it. I applied, however, to those who were able and willing to help me, and I have taken Swift's Specific, and am now sound and well once more. Swift's Specific is the best blood purifier in the world, and the greatest blessing of the age.
Greenville, Ala., Sept. 4, MRS. T. W. LEE.

A Druggist for 25 Years.

AUBURN, ALA., Sept. 8, 1884.—I am an old pharmacist, and have had to do largely with blood diseases for over twenty-five years. I have dealt in all kinds of blood purifiers, and do not hesitate to say that Swift's Specific is the best and has given more general satisfaction than any other I have ever handled. Swift's Specific is an excellent tonic, and as an antidote for malaria has no superior. Many ladies are using it as a tonic for general debility, and find it the most satisfactory one ever used. I have been dealing in Swift's Specific for five years or more, and am satisfied that I do not place too high an estimate upon its merits. G. W. DIXON.

Prescribed by Physicians.

I have prescribed Swift's Specific in many cases of Blood Poison and as a general tonic, and it has made cures after all other remedies had failed. R. M. STRICKLAND, M. D.,
