

DADDY'S EVENING FAIRY TALE

By MARY GRAHAM BONNER

MRS. BROWN BEAR.

"I'm Mrs. Brown Bear from Europe," said the brown bear.

"Well, indeed, is Europe a nice little town?" asked one of the grizzlies.

"It isn't a little town, it's a big country, and in fact it's more than that."

"Gracious," said the Grizzly. "That's a lot for it to be."

"Yes, it's a continent, I believe. Anyway, it's made up of lots of countries."

"Something like a family," said the Grizzly.

"Now I am puzzled," said the brown bear.

"Well," said the Grizzly, "I mean it is something like a family because in a family there are usually lots of children. Do you see? Don't you think I'm smart?"

"Oh, very smart," laughed Mrs. Brown Bear. "Very smart indeed, woof, woof, very smart indeed."

"Had you lots of land to walk over, and good hunting grounds?" asked the Grizzly. "Plenty of nice berries to eat?"

"Oh, we had everything where we were. We liked it and so we lived there."

"Why did you come to the zoo?" asked the Grizzly.

"Brought here, my dear fellow. But you know I've been here quite a time now. Oh yes, I've been a zoo animal a long, long time. I'm an old inhabitant."

"What? Woof woof? What?" asked the Grizzly.

"I mean I have lived here a long time. An old inhabitant is a person who lives in a town a long time. So when a bear lives in a zoo a long time I think it is perfectly right and perfectly just to call that bear an old inhabitant."

"It sounds quite just," said the Grizzly.

"Well," he continued after a moment, "tell me of the place you used to live in, Europe, you called it. Yes, I know you have been here a long time, but I know about it here, and I would be interested to know, if you live any differently here from the way you did in Europe."

"Do you know you look like a regular brown bear from this land?"

"Ah, no," said Mrs. Brown Bear. "Europe was my home. By the way, have you ever been abroad?"

"Abroad, where?" asked the Grizzly, much puzzled. "Do you mean to ask me if I have ever been abroad at night?"

"Oh, no," said Mrs. Brown Bear. "I mean in Europe. When I speak of abroad I mean abroad—off—on the other side of the ocean."

"No," said the Grizzly. "I've never been there."

"Well, it's my home," said Mrs. Brown Bear, "but I like it here. And

It seems that there can be no doubt that the cliff dwellers were exterminated by their more savage and warlike neighbors, the men being killed and the women being adopted into the tribe of the conquerors, though in some cases migrations may have become necessary as a result of drought or pressure from outside tribes.

Great Care Taken of Silk.

Silk is the most costly of all fibers, and in the raw state represents a value so great as to be guarded in its transportation like a shipment of bullion. It is shipped from coast to coast in special, solid express trains, under strong guard, the shipments ranging in value from \$5,000,000 to \$25,000,000.

Fruits of Old.

Many of the fruits and vegetables now eaten in England were almost unknown to our forefathers. Not until Henry VIII's time were raspberries or strawberries or cherries grown in England, and we do not read of the turnip, cauliflower and quince being cultivated before the sixteenth century.

Welsh Coal.

Welsh coal wasn't used outside of Wales a century ago. The first shipment bought for London cost \$1 a ton and was sold for \$4.50.

How To Keep Young

Noted Physician and Writer Says We Should Live From 90 to 105 Years of Age

Dr. Josiah Oldfield of London, known internationally as a physician and a writer, has published a prescription for keeping old age at bay.

According to him, it is not a question of an operation, but a daily diet which includes dandelion leaves, fowls' eggs, grapes, lettuce, cow's milk, water-cress, honey and salads (uncooked).

"Old age," he says, "is largely caused by deposit in the blood vessels and cells of the body of waste matter. So by adopting a part fruitarian diet a man, however old, may become young again, because every cell in the body will be replaced by new young cells."

Doctor Oldfield argues that normal persons, rightly fed, should live from ninety to one hundred and five years of age.

AS THE DAY BREAKS

I pray you what is asleep?
The lily pads, and ruffles and the reeds;
No longer inward do the waters creep.
No longer outwardly their force recedes.
The windowed Night, in blackness wide
and deep,
Resumes her weeds.

I pray you, what's awake?
A host of stars, the long, long Milky
way,
That stretches out, a glistening silver
flake,
All glorious beneath the moon's cold
ray,
And myriad reflections on the lake
Where star-gleams lay.

I pray you, what's astir?
Why, naught but rustling leaves, dry,
sere and brown;
The East's broad gates are yet a dusky
blue,
And star-gems twinkle in fair Luna's
crown,
And minor chords of wailing winds that
were
Die slowly down.

I pray you what's o'clock?
Nay, who shall answer that but gray-
stoled dawn?
See how from out the shadows looms your
rock,
Like some great figure on a canvas
drawn;
And heard you not the crowing of the
cock?
The night is gone. —Ernest McGaffey.

Ducks and Birds Can Fly From Surface of the Water

Canvas-back and red-head ducks, which are very quick of movement, after deep diving are capable of taking flight immediately upon coming to the surface of the water. They do not spring directly upward into the air, but fly at first at an angle until they reach the desired elevation. Surface-feeding wild fowl, like the black duck, pintail and teal, fly directly upward from the surface of the water if the emergency demands it.

"Not at all," said Mrs. Brown Bear. "I mean that I have had several different sets of children but not because one of the sets or two of the sets broke or because the children broke. Such a thing didn't happen."

"No, indeed, it didn't happen. But I like it here so much that I like to have the little ones enjoy it, too. If I didn't like it I wouldn't welcome them here, for I care for little bear cubs and wouldn't have them anywhere if it wasn't nice."

"I see," said the Grizzly. "Well, you're a good zoo bear for you like it and attend to your business and look after your children and are a great addition to the zoo."

"Thank you," said Mrs. Brown Bear. "Woof, woof, growl, growl, you pay me a great compliment, and I thank you for it. woof, woof, growl, growl."

The Need of Courage.

Courage in its most practical form is not the daring that takes great risks, but the patience that endures little trials without complaint, the hopefulness which is always looking for the bright side, the pluck which works on faithfully, even though it does not see the result of its labors. There is hardly a day so quiet and uneventful that we do not need courage to make it a success.—Girls' Companion.
