Crescent Hill lots on easy terms.

THE BEACH & MILLER LINE

Ship by your Home Company. It has successfully operated for the Home People in season and out of season for thirty years.

Steamer Crescent City leaves Crescent for Palatka, Jacksonville and way ports at 6:30 a.m., on Mondays, Wednesdays and Fridays.

E. T. CLARK, Traffic Manager. Jacksonville, Fla.

Crescent City Transfer Co's. Automobile and Boat Line.

Auto meets all trains at Crescent City Junction. Night trains by appointment.

S. M. LaBREE, Manager. Crescent City, Florida.

A. I. Spencer, Dentist.

Office at Residence on Prospect Street. Crescent City, Florida.

COLDS-GRIPPE-FEVERS

Cured quickly by taking Quick's Chill Tonic. Guaranteed by J. H. Haughton, 25c. Children love it.

Sour Scab Attacks Sweet Orange.

The sour scab seems to be adapting itself to new hosts. The latest addition to the citrus fruits attacked by the pest is the sweet orange which was thought to be immune.

English Walnuts.

The so called English walnut is almost exclusively the product of France, whence this country imports from 15,000,000 to 25,000,000 pounds

Card of Thanks.

To all who assisted in any way at the funeral of my beloved wife, I hereby tender my grateful appreciation.

LA GRIPPE AND FEVER CURED

Quick's Chill Tonic cured my husband of LaGrippe and Fever after the doctor's medicine and other remedies failed.

CRESCENT CITY NEWS

PERSONAL AND SOCIAL

Mrs. J. H. Mathis and Mrs. E. D. Louds visited Palatka on Tuesday.

Mrs. E. G. Sackett has been visiting her sister, Mrs. C. C. Slade in Palatka.

The Presbyterian Sunday school has made a remarkable growth. Last Sunday there were 54 children present, and the growth continues.

Edward Black of Tusla, Oklahoma, who came last week to attend the funeral of his sister, Mrs. C. O. Chamberlin, returned to his home in the west on Saturday.

L. N. Foy, a young man who fills the important position of teacher of languages in the Piedmont school at Waycross, Ga., spent the week end here as guest of his aunt, Mrs. Herlong.

Five new members were received into the fellowship of the Baptist church at the morning service last Sunday. During the six months of Rev. Mr. Bonsteel's pastorate the membership of the church has increased 50 per cent.

Rev. R. S. Burris drove over to Daytona Beach last week Thursday, having as passengers on the motor ride, Mrs. Burris, Mrs. C. L. Chamberlin, Mr. Edward Black and Mr. C. Oliver Chamberlin. They returned the following day.

Mr. and Mrs. Alfred Clay of Norfolk, Va., with their friend, Mrs. Courier, arrived this week, and the pretty Clay bungalow on South Prospect street is again open for the winter. All are pleased to see these people back.

Mr. and Mrs. Thos. J. Iles and Mrs. W. A. Russell are making a trip to Jacksonville this week, probably by motor car, as Mr. Iles has a Maxwell wonder car which he is very proud of and which he likes to run on long trips—says it beats the railroad.

The C. H. Preston store has just placed a show case cold storage plant in the front end of the store. In this cold storage is kept fruits and green vegetables and other perishables. It is a great scheme for keeping things fresh.

Mr. and Mrs. H. S. Springer arrived from their summer home in New Jersey last Friday and will remain here for the winter, as has been their custom for several years. They have a pleasant cottage on North Summit street.

Mr. and Mrs. Henry Hetuhinson, Jr., and their two little children of Palatka and Miss Donnelly of Nashua, were visitors in the city a few hours on Sunday, coming over from Palatka as guests of Tom Russell in his Maxwell motor.

Mr. and Mrs. George H. Herrick of Attleboro, Mass., were among the arrivals at Grove Hall this week. Mr. and Mrs. Herrick have been regular winter visitors to Crescent City for a number of years and their annual visits are a great pleasure to our people.

Contractor John Rafferty is getting along rapidly with the new Olympic theater, which now that it is up and enclosed all can see is a thing of beauty and will add greatly to the beauty of the street. It won't be long before the theater will be in commission.

Laurie Maull, a young man who has learned the telegraph business since the opening of the Western Union office here, has been appointed assistant operator at Palatka. He is going to make good; for he's a clean-cut young fellow, ambitious, and loaded with ability.

Edward Feibrich of New York is at Grove Hall for a stay of several weeks. Mr. Feibrich usually comes here each winter to meet his friends, the Messrs. Hogin, of Marion, Ind., with whom he spends a part of the winter here and a part at Weirsdale. Fine gentleman and has a host of friends here who welcome him.

Messrs. D. S. and C. A. Hogin, father and son, of Marion, Ind., regular winter visitors at Grove Hall, arrived last week. They will remain a short time here, then go to Weirsdale for a time, returning to Crescent City later in the winter to remain until spring. People here are always pleased to see the Hogins.

The Ladies' Aid Society of the Presbyterian church will give a "Silver Tea" and an apron sale at Grove Hall on Friday evening, the 17th inst.—one week from tonight. This is a purely social affair to which all the people of the place are cordially invited; the ladies want to raise a little money and they are preparing to give you something worth while for your little contribution to the success of the evening.

Col. and Mrs. George H. Libbey of Portland, Maine, arrived last week and will spend the winter with Mrs. Frank Gautier. It is three years since Col. and Mrs. Libbey visited here last and their old friends are especially delighted to greet them again. Col. Libbey own a block of land fronting on Lake Crescent, just north of M. H. White's home and in years gone by he used to have one of the finest gardens in the State.

Telegrams like the following from Philadelphia, dated Dec. 3rd, appearing in trade journals like The Packer, don't do the Florida orange market any special good: "California oranges \$3 to \$3.75; Florida oranges \$1. to \$1.25; California oranges showed fair quality and condition, but Florida fruit was irregular in quality, some being rather green and otherwise undesirable. Very few real fancy Florida oranges and grapefruit were seen on the market." Perhaps some day Florida growers will combine on holding their fruit until such time as it is in condition for enjoyable eating.

Mrs. Cornelia Lyon and daughter, Miss Eva Lyon, have left their summer home on Grosse Ile, in the Detroit river and will spend the balance of the month and till after the holidays in Detroit, when they will leave that city and come to Crescent City to open their beautiful winter home for the season.

Tomorrow afternoon the ladies of the Order of Eastern Star lodge here will hold a bazaar and candy sale in the Horton store room, formerly used as the telephone and telegraph building, to which they ask the attendance and patronage of the people. The ladies will have a stock of many pretty things suitable for Christmas gifts, besides some candy that will be too good to keep. Tomorrow this bazaar will be held.

L. L. Newsome of La Gloria, Cuba, who has been here for some ten days, on a visit to his sister and many old friends, expects to leave for home in a day or two. Mr. Newsome expressed himself as greatly surprised and pleased at the improvements made and growth of Crescent City since the time of his last visit here, some ten years ago. One has but to reflect on what the place was ten years ago in the light of the present to see that Crescent City has made a fine growth in these ten years.

Popular Young Lady Married.

Miss Jessie Harrison Burton, daughter of Maj. and Mrs. J. L. Burton of this place, and well-known as the Putnam county agent of the Girls' Gardening and Canning Clubs, was united in marriage on Wednesday afternoon to Mr. Herman Dane Collette of Palatka.

The News is not informed as to the details of the wedding, except that the ceremony was performed by Rev. R. Shull Burris, pastor of the Presbyterian church. It is presumed, however, in the absence of announcements, together with the well-known wishes of the bride to shun display, that the wedding was a simple, quiet affair, and that the vows were pronounced at the Burton home, with none but the family and a few intimate friends present.

The happy couple left the same afternoon for Summer Haven, where the Burtons have a cottage. They will remain there until Sunday when they will return to Palatka to make their home.

It is understood that Mrs. Collette will not give up her work for the school board, certainly not until after the close of the present school year. A young lady of rare accomplishments and talented beyond the average teacher, the bride has won distinction not only in the county but throughout the state as one of the most proficient and enthusiastic workers in home economics demonstration. She was born and reared in this place and the best wishes of all our people will follow her through life.

Mr. Collette is a civil service man in the postoffice at Palatka and has a fine reputation for honor and gentlemanly deportment. He is a native of Georgia.

Farmers' Short Course of Interest to Fruit Growers.

Fruit growers generally and citrus growers in particular will gain considerable valuable information by attending the Farmers' Short Course at the University of Florida January 11 to 21. Prof. W. L. Floyd of the College of Agriculture will have charge of the horticultural work for the short course students. Courses in plant propagation will be given in which the growers will be shown the best methods of propagating the various kinds of fruits. Demonstrations will be given in budding, cutting, graftage and various other methods of propagation.

Classes will be organized also in citrus culture in which the most suitable soils for citrus groves will be discussed together with preparation of land, planting, cultivation, fertilization, selecting of varieties and the use of cover crops. Citrus harvesting and marketing problems will be taken up.

Growers will be shown preserved specimens illustrating the most important insect and fungous enemies of the industry. Many insects and specimens of trees showing the work of enemies are preserved by the Experiment Station and the State Plant Board. These will be available to the short course students. The courses will also include lectures by members of the Experiment Station and State Plant Board Staffs.

Kinds of fruit other than citrus will be taken up under the course in deciduous and sub-tropical fruits. This will include a study of growing peaches, pears, persimmons, grapes, pecans, guavas, avocados, mangoes and others. The varieties of each of these which are best adapted to the state, planting, cultivation, diseases and insect enemies will be discussed.

Classes in general farming, stock raising, dairying, grain farming and soils will also be organized.—Agricultural News Service.

English Walnuts.

The so called English walnut is almost exclusively the product of France, whence this country imports from 15,000,000 to 25,000,000 pounds

Citrus Trees Should Be Planted in December.

The best time to plant citrus trees is in December. At this time the trees are as nearly dormant as they will be and consequently a better stand can be had. W. L. Floyd, professor of horticulture in the University of Florida College of Agriculture, advises that the land which is to be planted to the citrus grove should have been cultivated a year or two in some field crop. New land usually contains enough roots and sprouts to interfere with the growth and cultivation of the young trees.

The land should be as well prepared as for a field crop. Plow the weeds and grass under and work the land down with a disk and spike tooth harrow. The trees should be from one to two years old on two to four-year-old stock.

Set the trees just as deep as they stood in the nursery. Prune off all broken roots and make the hole large enough that roots may be placed in without bending. Fill the earth in around the roots and press firmly. The tops should be cut back to about 24 inches from the ground. This is the first step toward the low headed tree which is best for Florida conditions. If there are any long branches trim to about three buds.—Agricultural News Service.

PROOF COINS.

They Are Always Struck From New and Specially Prepared Dies. Proof coins have been struck at the Philadelphia mint for many years, but at no other mint, to be sold to collectors. A premium of about 10 per cent is charged when a lot includes coins of all denominations. For minor proof sets, however, when ordered separately, a little more than double the face value is charged.

The coins are struck from new and specially prepared dies on planchets previously burished, a hand press instead of the regular steam press being used. When there is a smooth field around the raised portion of a coin the burnishing gives the surface a lasting brilliancy that is very attractive.

Our silver coins still have such a field, but the gold coins, particularly the \$5 and \$2.50 pieces, and the minor coins no longer present this desirable feature. In fact, outside of the lines being a little finer, proofs of these coins differ little in appearance from pieces struck for regular circulation.

The incised inscriptions on the gold coins do not harmonize with the field as did the old raised inscriptions, while on the minor coins the field is not smooth, and the nickel has really no field, an excess of lettering disfiguring what is not monopolized by the Indian head and the buffalo. The \$20 and \$10 pieces present artistic designs, but proofs of these coins are far from being as attractive as were those of the old designs.—Pittsburgh Press.

A LEDGE AND A MINE.

How a Learned Lawyer Was Taught to Distinguish Between Them. Let not distinguished counsel from any eastern or western bar plume themselves upon their fancied superiority to their frontier brethren. The litigation which attends upon rich mineral discoveries often tempts the keenest intellects to the forums of the frontier, and an imported counsel is, in his ignorance of local customs and local nomenclature, liable to make a bad break.

A distinguished New England lawyer who was imported by a Boston capitalist to take charge of a big mining suit delivered himself of a lengthy philippic against a witness who had testified that a mine was in a certain locality and who a year before had testified that it was in another locality a quarter of a mile distant. "Did he lie then, or is he lying now?" said the imported lawyer.

"The learned counsel from afar," answered his opponent, "is an apt illustration of the proverb that a little learning—and in his case such a very little—is a dangerous thing. He confuses a mine with a ledge. The locality of a ledge cannot, of course, be changed, but the locality of a mine, which is the work upon a ledge, may be, as in this case, placed at one point today and in six months may be at another point a quarter of a mile or more away."—Case and Comment.

Not the First.

Pat was servant of a farmer, and in his charge was a donkey, which was kept to amuse his employer's children. The donkey was following the farmer's wife round the yard one day, and the farmer, turning to Pat, said: "I think that donkey is taking a liking to my wife."

"Och," said Pat, "sure, and it's not the first donkey that's took a liking to her, sir."—Exchange.

Laughter Aids Digestion.

Laughter is one of the most healthful exertions; it is of great help to digestion. A still more effectual help is a dose of Chamberlain's Tablets. If you should be troubled with indigestion give them a trial. They only cost a quarter. Obtainable

Pirates.

"Father, are all the pirates dead?" "No, my son. They now run the coat checking privileges at the hotels and restaurants."—Town Topics.
