COMMERCIAL.

HONOLULU, OCTOBER 24, 1876.

We have received from the office of the Collector at Charleston, in San Francisco, a copy of the new regulations issued by the United States Treasury Department, applying to the entry of free goods under the new treaty, with a request to publish the same for general information. It will be well for shippers to preserve a copy for reference, as these regulations will be strictly carried out, and a compliance with them will prevent much annoyance to them as well as to officers of the customs.

We hear this week the arrival of three vessels from San Francisco, laden in part with sugar and rice, which has been consigned from the consignment to another firm entirely under the treaty. While we think that it was unwise to withhold such a provision, understood to be contrary to former usage, it will add to the gains of the owners of the produce in question. The Alice of Sept. 20, gives the following amount of sugar and rice, the returned here, and we appear in commerce:

	Sugar		Rice	
	Bbls.	Value.	Bbls.	Value.
B. C. Warner	2,077,100	$77,566	1,000	$7,000
American Lloyds	837,333	41,740	2,000	12,122
Mary D. Roberts	837,333	37,870	1,000	7,967
Total	3,777,433	$157,176	4,000	$27,089

Many of the remaining last years is found for a transhipment to Sydney, N. S. W., per the first opportunity by the Hawaiian Trading Company to Australasia, however, only some 3000 barrels, as were on hand subsequent to September 6th were shipped from Sydney, per the Hawaiian Queen on the 20th. This is hard work for the Hawaiian Trading Company to get back and afterwards re-imported, but nothing else who were interested, out of their depth. While the owners will thus be benefitted to the extent of about $10,000, it seems singular that the Government allow goods to be landed here free of duty, and going to go to other parties and generously permit these goods to have been withdrawn for consumption immediately after the promulgation of the Treaty. It is not quite clear that the Government of the Queen adopted such a course, while professing our foreign commerce any more than the one we have suggested. The fruits of the Treaty are beginning to manifest themselves, favorably thus far, as regards the trade of this port, though it can hardly be expected that the full development will first be known on the 1st day of the 1st month of the 1st year of the 1st century of the 1st millennium.

The treaty has already imparted a spur to the commerce between this port and San Francisco, and we shall be much mistaken if the figures for 1877 do not show it to have increased to twenty pounds. This increase will cover the whole list of free goods, especially machinery, lumber, building materials, provisions, and raw materials for clothing, for all of which there is an increasing demand.

The barque Canoma, since our last issue, has been hauled into the Custom House wharf, and is discharging her cargo of 1,200 tons of coal. The Canoma is a fine vessel, and her cargo will be distributed to the trade in small lots, thus affording a good opportunity for the purchase of coal for steamers and other purposes.

The whaling bark Three Brothers, from the Arctic hunting ground of the season of unprecedented whalers, which have been destroyed by the ice, and which will probably be wholly destroyed by it.

Commercial advices from San Francisco show the sugar market to be firm, while rice has declined. Coffee, teas and molasses remain at previous quotations.

Departures have been the bk S. C. Wells for San Francisco, Honolulu for 3 months, the Pioneer for Tahiti and the schooner C. R. Ward and bk Sonoma for the Gilbert Islands.

The brig North Star leaves to-day for San Francisco, with 1,200 tons coal from her in ballast trim.

Barks D. C. Murray and M. B. Roberts are loading for San Francisco, and will leave in a few days with full cargoes, to be followed by the American Lloyds next week.

MARRIED.

HOLT—TOD—In this City October 21st, by the Reverend W. Ellis, Mr Christian Holtz to Miss Mary Tod of San Francisco.

NOTES OF THE WEEK.

☞ There will be a Temperance Lecture at the Lyceum by President Pratt of Oahu College, on Friday evening the 27th inst. at 7½ o'clock, under the auspices of the Good Templars.

☞ In about two weeks, as may be seen by reference to Mr. Barlow's advertisements, there will be sold a number of lots of land belonging to the estate of Mr. Everett, comprising some valuable lands on Maui, Molokai and this island, and several town lots. The opportunity is a good one for those having money to invest.

The Australian Blondin.—By the last steamer from the Colonies this artist on the tight rope came up, and proposes to give an exhibition soon,—on Saturday next if possible—of his marvelous skill in balancing, walking the tight rope, cooking omelets on the same airy foundation, etc. As this will be the first exhibition of this kind here we predict for him a successful engagement.

The Scourge.—Advices from Savannah, place the daily interments from yellow fever, at twenty-two. Much suffering is reported among the poor people, both white and black, while the epidemic appears spreading and unusually fatal in its effects. Two or three cases have appeared in New York City, causing considerable excitement in the vicinities of the scourge.

Conchological.—A valuable addition has recently been made to the National Museum in Allstadt Hale, by a collection of shells and corals made by Mr. J. E. Chamberlain among the Gilbert and Marshall islands. The collection, which is so arranged as to be displayed to the greatest advantage, contains many rare and beautiful specimens. One piece of white coral is worthy of special notice from its unusual size and delicacy. It is a saucer-shaped, and measures over three feet in diameter resting on a central column like a mushroom.

Drought.—Since early Summer there has been but little rain in this district, and the drought is beginning to be severely felt. The pastures in the region of the city are dried up, and many cattle are dying in consequence. Streets are inches deep with a fine powder which the slightest breeze diffuses through the atmosphere, and which an ordinary trade wind sends in dense clouds across the harbor, and out to sea. If we do not have rain soon the Water-works will have to "shut up shop." Perhaps a few vollays from the battery on Punch Bowl would wake up the Clerk of the weather and cause him to open the flood-gates of heaven.

A Fine Map.—We have recently had the pleasure of inspecting a fine map of the Princeville Plantation, made by the engineer Mons. P. A. de Laneu from his own surveys. It is about 36 inches by 60, and gives the topographs of the estate in the most perfect manner, showing the rivers, brooks, side hills, bottom lands, mountains, cascades, woods, swamps, and courses of proposed and possible water canals for irrigation. The quality of the soil in the various parts of the estate is carefully noted, as well as the estimated cost of the different water-courses and the amount of land they will irrigate. The survey has occupied several months, at a cost of about $800, but has resulted in information, worth to the owners many times that sum. The area of the estate, which was never before definitely known, is ascertained to be about 11,000 acres. We would suggest to the Government that they could not get a more suitable man than Mons. de Laneu for one of the commission to be appointed under the law to develope the resources of the Kingdom.

Cuba Libre.—Eight years of cruel war has Cuba suffered, and still the determination of the Spanish Government to conquer the rebels, and of the Cuban patriots not to be conquered, is as strong apparently as ever. Eight years of bloodshed, of battles, of captives, of confiscations, of accusations, of treason trials by court-martial, executions, burnings of plantations and general devastation, have marked the course of the revolution. Spain continues her fruitless efforts at subduing a people determined to be free, and sends her increasing quotas of soldiers to be slain by the Cuban machetes, the yellow fever, or to desert to the enemy. Recently thirty thousand Spanish troops were appropriated for food for the Cuban climate and Cuban arms, and General Campos demands ten thousand more as a condition to his acceptance of the position of Governor-General of the island. Did any one ever hear of any portion of the large detachments sent to Cuba from Spain as having been sent back again? And yet the sacrifices continue to be offered!—*San Francisco Bulletin.*

Another Large Land Sale.—The extensive tract in Kau, Hawaii, known as the Kapapala Ranch, was last week sold by Mr. Wm. H. Reed, of Hilo, to Mr. C. R. Bishop and others of this city, for the sum of $75,000. The purchase includes the two extensive lands known as Kapapala and Keahua extending along the above a distance of perhaps ten miles from Punaluu eastward, thence up towards the summit of Mauna Loa, embracing an area of 200,000 acres, more or less. A portion of this land, lying at an elevation of 2,000 feet, and four or six miles from the shore, is supposed to be adapted for cane growing. We have ridden over it, both on the upper and lower roads, three times during the past four years, and were struck with its richness as a pasture land. There are supposed to be ten thousand head of cattle on it, with many thousand sheep and goats, all which are covered by the purchase. It is thought that portions of this tract may be turned into sugar plantations, especially along the upper road, where taro and sugar-cane may be found growing, and where the soil is very rich. There are no streams of water on the land, though numerous springs abound, and the pastures are always green and fresh from frequent showers. We doubt not that capital and industry judiciously expended will, in a few years, make this a very productive district.

Salmon Ova.—By the steamer Zealandia a small shipment of salmon eggs (30,000) were received by Mr. A. W. Bush from California. There being no ice here it was impossible to divide them around among the different islands of the group, so a part were sent to Kaneohe, a part to Ewa, and the remainder were kept at the Hotel, which latter are already beginning to hatch. Mr. Bush is successful—as we trust he may be—his efforts to introduce this most delicious of fish to this country, he will deserve to be ranked among our public benefactors. The Zealandia also took on a large number of salmon eggs for the Australian Colonies.

Water! Fire!—The reservoir in the valley has of late been nearly empty day and night, and yet every drop of water that can be diverted from the stream is turned into it. If a fire should occur at the present time, (which God forbid) our fire-engines would be almost useless on account of the limited supply of water, and half of the city might be swept away by the flames. We trust that it may not be necessary to deprive our citizens of the full amount of water to which they may be entitled, but every needless or extravagant use of the water should be avoided, such as filling taro patches from the pipes, as is the case on Nuuanu Avenue nearly opposite Major Dickson's residence, where every night the water is rushing into the taro patch with as much noise as if from a two-inch pipe.

Political Facts.—The elections which are being held to-day will, no doubt, give a great impetus to political figuring. There are one or two facts, however, which those who enter upon that fascinating employment would do well to bear in mind. The Democrats carried Indiana in the last October election corresponding to the one now in progress. They elected Hendricks by a majority in round numbers of 1,100. But in the Presidential election immediately following Indiana gave Grant a majority of 22,000. It will thus be seen that October portends are not always reliable for the Democrats. There is also an erroneous notion afloat as to the Democratic majority in New York. Tilden was not elected Governor of that State in 1874 by 50,000 majority. The vote was: Tilden, 417,391; Dix, 366,674; Temperance candidate, 11,788. The Democratic majority therefore was only 38,929, instead of 50,000, as currently asserted. A similar state of facts is to be noticed at the last election in 1875. The Democratic vote on that occasion was 380,251; Republican, 373,401; Temperance, 11,289—figures which establish the fact that the real Democratic majority was only 3,707. That is the majority which the Republicans have to overcome this time. As they polled 445,301 votes for Dix for Governor in 1872, they have an immense reserve to fall back upon—not less than 70,000 votes at the very lowest computation. The Temperance vote will be generally with them on a Presidential election, but the paper Democrats may distance their strength somewhat. All new-fangled notions are unsupported by all the Democrats, for the latter always vote the regular ticket when the proper time arrives.—*Bulletin.*

Late Foreign News.

The election for state officers in Ohio, Indiana and West Virginia, took place Oct. 10, and from the meagre accounts received it is probable that the Republicans carried Ohio by about 2,000 majority, while the Democrats have carried Indiana by about 1000 majority—both very close votes.

The black worm or caterpillar that often devastates oat crops, has begun operations earlier than usual this year, and some fields are already completely stripped of their leaves, standing as bare as in midwinter.

The details of the Bulgarian atrocities are creating in England strong hostility to the Turks. It is now apparent that the British Government misjudged the extent of the Turkish barbarities, owing, in part, to its blind distrust of the newspaper reports. It is not too late to admonish the Turks, but their recent victories are likely to make them intolerably heedless.

Mlle. Nilsson is meeting with an enthusiastic reception in her native land. Crowded pleasure trains are run to all the towns where she sings, and at Stockholm it was found necessary to open the doors of the Cathedral, there being no concert room sufficiently large. At the request of the King of Sweden she has consented to appear as "Marguerite" in the Royal Theatre at Stockholm.

New York, September 29th.—General Newton announces that the reef at Hallett's Point has been swept away and says: From 150 feet distant from the shore line to the line of buoys, the bottom ranges from 8 feet of depth at low water, to 20 feet outside the line of buoys. There is not less than 20 feet of depth at low water. The divers have been examining the reef and report a thorough break up.

Savannah suffers from yellow fever as if it were a plague. A member of a relief association thus describes their work: We are feeding 15,000 people and nursing about 7,000. The supplies of provisions and money sent us have enabled us to meet immediate waste, but we shall need all the aid you can give us for the next month or so, until frost, to keep people from absolutely rotting in their houses, or on the streets.

New York, September 30th.—Fifty thousand pounds worth of American eagles were withdrawn from the Bank of England yesterday, for shipment to New York.

ROBERT REIGS.

612-4t Honolulu, October 3d, 1876.

Notice.

BE IT KNOWN THAT MY HUSBAND, WM. BROWN, a blacksmith, at Koloa, Kauai, has neglected me and our children for the past two years and a half; during this time he has lived with another woman, and denied that I was his wife. For this reason I have a right to credit in his name from Hawaii to Kauai. Moreover he has injured me by dragging my good name before the public, knowing that I am a loving wife.
