National Cane Shredder

Mr. John A. Scott, Manager of the Hilo Sugar Company gives the following wonderful record of the working of the NATIONAL CANE SHREDDER, which was erected by their works at the commencement of the crop just harvested:

"During the past week the Hilo Sugar Company's mill exceeded any of its former records by closing the 125 hours grinding with an output of 300 1/2 tons. This is fully 10 per cent. more than the best work of former years.

"The three roller mill being 26 in. by 54 in. and the two roller mill 30 in. by 60 in. The first mill doing this amount of work in an efficient manner and with great ease, compared with work on whole cane, owing to thorough preparation of the cane by the National Cane Shredder, recently erected by the Company. And by its use the extraction has been increased from 3 per cent. to 5 per cent. on all kinds of cane, and in some cases 80 per cent. has been reached; the average being 75 to 78 per cent., according to quality.

"I continue to find the megass from shredded cane better fuel than from whole cane. The shredder has been working day and night for seven months and has given me entire satisfaction, having shredded during that time about seventy thousand tons of cane, and a large part of it being hard ratoons.

"The shredder and engine require very little care or attention." Plans and specifications of these shredders may be seen at the office of Wm. G. Irwin & Co. L'd.

National Iron Works QUEEN STREET, Between Alakea and Richard Streets.
