

ORGANIZATION OF THE KILAUEA VOLCANO HOUSE COMPANY.

The Company Incorporates for \$50,000. Elects Officers and Adopts By-laws—List of Stock-holders.

Pursuant to notice, the subscribers to the stock of the Kilauea Volcano House Company met at the Chamber of Commerce at 2 o'clock p. m. March 18, for the purpose of organization.

The total number of shares subscribed, at \$25 each, is 1,500, of which 1,124 were represented at the meeting.

Articles of association incorporating the company with a capital stock of \$50,000, and the privilege of subsequent extension to \$500,000, were adopted.

The following gentlemen were elected officers for the coming year, viz:

- W. R. Castle, President. E. C. Macfarlane, Vice-President. L. A. Thurston, Secretary. F. J. Lowrie, Treasurer. Jno. Ema, Auditor.

The officers also constitute a Board of Directors of the company's business.

The company then adopted by-laws regulating the conduct of its business.

The subscribers to the stock to date are:

- L. A. Thurston, C. M. Cooke, Jona. Austin, W. W. Hall, T. W. Hobron, Cecil Brown, J. H. Hare, C. F. Peterson, M. Kechokolole, Bruce Cartwright, W. S. Terry, F. S. Lyman, W. H. Wright, Lewers & Cooke, F. A. Schaefer, Benson, Smith & Co., A. Rosa, Peter Lee, W. G. Irwin, J. F. Colburn, H. Waterhouse, J. B. Atherton, J. T. Waterhouse, Jr., F. M. Farwell, W. J. Forbes, J. H. Boyd, A. J. Cartwright, C. E. Richardson, E. S. Cunha, A. L. C. Atkinson, G. W. Macfarlane & Co., Paul Neumann, D. B. Smith, P. C. Jones, W. R. Castle, I. I. S. N. Co., Thomas May, Alex. Mackintosh, F. S. Lyman, Jr., Jono. H. Soper, Geo. Smithies, J. A. Boyd, T. G. Thrum, J. P. Sisson, A. W. Carter, Wilder's S. Co., Union Feed Co., B. F. Dillingham, W. C. Achi, A. W. Richardson.

The large number of subscribers and their representative character shows the very general interest which is being taken in the enterprise, and insures the requisite moral and financial backing to make it a success.

The amount already subscribed is sufficient to buy the existing plant and erect the proposed new buildings. Plans and specifications of the new buildings are about completed, and their erection will be immediately pushed forward.

Stock to the amount of \$12,500 is still open for subscription, the receipts from which will be used in laying out drives, equipping a stable and otherwise carrying out the plans stated in the prospectus.

ROBT. EMMET THE MARTYR.

Mr. J. D. Pope's lecture on the life of Robert Emmet at the Y. M. C. A. hall Wednesday night did not draw a very large audience, owing undoubtedly to the many attractions that were held at the same time. However, quite a fair representation was present to hear the young orator from the Antipodes. From beginning to end Mr. Pope held his audience in wrapt attention.

A few minutes before 8 o'clock, Mrs. Ernestine Gray appeared and rendered a selection on the piano, her efforts being applauded. Mr. Pope after a few moments of breathless silence, commenced his lecture by reciting a few lines of, "Breathes there the man with soul so dead," etc. He then went on describing the struggles which the Irish people have carried on for ages to give them liberty, and the country independence.

Many noble and heroic men have devoted their lives for their country's emancipation from the bonds of tyranny, and to give her a place among the nations; but their efforts are yet uncrowned and their country still struggling for freedom.

He gave a short biography of Robert Emmet, outlining his youth and patriotic devotion to his country's cause. He described his unsuccessful plot, which failed through the infidelity of men he trusted, costing him his life. He told how Emmet appeared before the court in 1803 to plead the charge against him for treason; but his crime was loving his country overmuch.

Mr. Pope then delivered in a most impressive manner "Emmet's Speech Before Being Condemned to Death," and received frequent merited applause.

He also sang, "The Dear Little Shamrock" in such a manner as to inspire his audience with patriotic feelings. Mrs. Gray gave two other selections on the piano, which were well played. Mr. Pope then announced that he will continue his lecture at the Y. M. C. A. hall on Friday evening. The lecture is indeed worth hearing, Mr. Pope being a fluent and entertaining speaker. A large audience ought to be present on Friday evening. Mr. Pope concluded by singing in a spirited manner, "The Land for the People."

Brain workers, and all who have to stand the severe mental strain consequent on intellectual employment, find Clements' Tonic invaluable. HOLLISTER & Co. are the Agents for the Islands.

ATHLETIC DAY.

A Large Assemblage—Great Interest Taken—The Winners.

A very large number of people gathered at the new baseball grounds Tuesday afternoon to witness the first field sports given by the Honolulu Athletic Association. Little enthusiasm was felt till the pole vaulting came on. "Bamboo," Fred Haley, succeeded in taking the first medal, also winning arousing applause. In putting the shot, some dissatisfaction was expressed at the manner of measuring. In throwing the shot some of the participants in that game threw it to the side of a straight line from the point where the tape was placed, thus giving, as was claimed, the thrower an advantage of several inches in the diagonal measurement. Otherwise no dissatisfaction was expressed, and with the exception of the exercises lasting too long, the afternoon passed very successfully and pleasantly. The winners of the different medals with the accomplishments are as follows:

100 Yard Race—In the first heat, W. F. Kaue came in first, time 11 seconds; R. Dushalsky second. In the second heat, J. L. Torbert, first, time 10 3/5 seconds; G. Rosa, second. Final: Torbert, 10 1/2 seconds, winning 1st prize; Rosa, 2d prize.

Putting the Shot—Edward Haia, 32 ft. 3 in., winning 1st prize; John Lane, 32 ft. 1 1/2 in., 2d prize.

Running Broad Jump—V. Fernandez, 17 ft. 3 1/2 in., 1st prize; Geo. Rosa, 17 ft. 3 in., 2d prize.

Pole Vault—Fred Haley, 9 ft., 1st prize; K. du Roi, 8 ft. 11 in. less, 2d prize.

Running Hop, Step, Jump—Geo. Rosa, 37 ft. 2 1/2 in., 1st prize; T. P. Cummins, 36 ft. 8 in., 2d prize.

Running High Jump—Antone, 5 ft. 2 1/2 in., 1st prize; Hiel Kapu, same distance, 2d prize.

Throwing the Hammer—Edward Haia, 71 ft., 1st prize; James Spencer, 69 ft. 6 in., 2d prize.

120 Yards Hurdle Race—Antone, 19 1/2 seconds, 1st prize; W. F. Kaue, 19 4/5 seconds, 2d prize.

Juvenile Race, 100 Yards—William Reed, 12 4/5 seconds, won the prize.

Native Sons of Hawaii.

This organization had a double observance of Tuesday, one, the celebration of the birthday of Kamehameha III, the other the birthday of Hon. J. A. Cummins, the one most instrumental in the establishment or organization of the society known as the Native Sons of Hawaii.

In the forenoon a literary programme was carried out; Mr. J. K. Kaula, in the absence of Mr. S. K. Kane made the address in commemoration of Kamehameha III, telling how that king divided land among the natives and otherwise aiding them in obtaining some independence. Mr. W. S. Wond addressed those assembled upon the occasion of Hon. J. A. Cummins' birthday, telling what he had done for the organization of the society. Mr. S. Mahelona acted as chairman for the occasion.

A beautiful gold headed cane was presented to Mr. Cummins by the society; on the end of the cane was engraved J. A. C., on the side was Presented to J. A. Cummins by the Native Sons of Hawaii, March 17th. The motto of the organization was explained by the Vice-President, setting forth their objects and intentions. In the evening a ball was given at their hall, which proved a very delightful affair. The hall was tastefully decorated, and the music was furnished by members of Prof. H. Berger's band.

Both at noon and in the evening a lunch was served that really surpasses the name of lunch; it was prepared by Mr. Mariano Camacho, steward of the British Club, and was delicious enough to tempt the appetite of the daintiest.

Plantation Labor.

The S. F. Bulletin of March 7th says: "The Hawaiian Charge d'Affaires to the Court of St James is authority for the statement that the planters of Hawaii are considering the importation of coolie labor from India. The law now shuts out the Chinese and the experiment with the Japanese seems to be virtually at an end. The Scandinavians who went there under contract found the climate and conditions unfavorable. The Portuguese were rather more in their element, but contract labor on plantations holds out little inducement to any white people. Labor hunting among the islands of the South Pacific has fallen into disrepute as little better than piracy or slave-trading. The East Indian coolie is perhaps the least objectionable of Asiatics, and he is, at least, of Aryan stock, with some capability of assimilation. Why has it never occurred to some of our colored people to try Hawaii? The climate and work would be just to their liking."

A WITTY ACKNOWLEDGMENT.—A laughable little story is told of a woman on the witness-stand in a French court. She was asked her age, and answered that she was thirty years old. "But," said the magistrate, did you not tell me you were thirty when you appeared before me two years ago?" "I think it very likely," she replied, smilingly acknowledging her falsehood and not at all abashed. "I am not one of those women who say one thing to-day and another thing to-morrow.—Youth's Companion.

TO SHOOT UNDER WATER.

Something New and Important in Naval Warfare.

NEW HAVEN, Feb. 23.—C. S. Bushnell of this city, Vice-President of the Ericsson Coast Defense Company, which has the old Destroyer taken out of Brooklyn for repairs says: "We are fitting up the vessel for the purpose of testing a gun that will fire under water. Now, with the heavy nettings which the big war vessels have for the protection of themselves against torpedoes, the ordinary projectiles are almost useless. But with the gun that is to be tested on the Destroyer we can make projectiles penetrate any of the nettings that are in use.

"We are to use a 16-inch gun. That which we are to experiment with is being constructed, and is about half done. It is to be about thirty five feet in length. The projectile is to be twenty-five long, and to throw it a charge of twenty-five pounds of powder will be used. The shell will contain from 300 to 400 pounds of nitro-glycerine, enough to blow up any vessel afloat if struck right.

"The muzzle of the gun will protrude ten feet under water, and the projectile will be carried from 750 to 1,000 feet beyond the muzzle of the gun before firing. We intend to try the gun for the first time at Newport next July, having obtained from Congress an appropriation for making the tests.

"With a few such vessels as the Destroyer will be when equipped with our gun, the armed fleets of the world could be swept out of existence. I believe this invention will revolutionize the naval gunnery throughout the world. One of our shells can be sent right through the netting and into the side of a vessel where a torpedo could not penetrate.

"For the price that one of our big ships will cost, we could build and arm five smaller ships which would be able to sink the best navy afloat."

RIGOLETTO.

The curtain arose a little late upon the opera Rigoletto Wednesday evening, owing to the audience being tardy in gathering. Not so large an audience was present as should have greeted the presentation of Rigoletto for the production was well given. The outline of the plot as given in the programme was a little misleading at first, but was soon made clear by their acting.

Gilda, daughter of Rigoletto, has if possible outdone her efforts on previous occasions, her voice ringing sweetly and clearly, especially in the parting scenes with her father and the Duke. The latter, Mr. Stanini, sang more clearly than on Saturday evening, proving himself an irresistible wooer of Rigoletto's daughter, Gilda, unknown to her father. The carrying off of Gilda was not perhaps as realistic as it might have been, but the sorrow, even madness, of Rigoletto, when he realized that it was his daughter and not Ceprano's wife he had helped the Duke's followers to steal, was touchingly acted. None the less affecting was the restoration of Gilda to her father; the singing during this scene can hardly be improved. Rigoletto, enraged at the deceit practiced upon him, with hardly a friend, sought revenge, which in the last act resulted so sadly for him. His voice and acting fully portrayed his perhaps justly revengeful spirit. Gilda, Madalina, the Duke and Sparafucolo did their utmost to merit the applause so enthusiastically given, and well did they deserve it.

Large Pumping Plant.

The Risdon Iron Works of San Francisco have been awarded the contract for the new pumping plant at Lake Merced for the Spring Valley Water Works.

There will be two complete sets of compound fly wheel pumping engines of a combined capacity of eight million gallons per day delivered to a height of 300 feet. The engines to be fitted with Corliss valve gears.

The boiler plant will consist of three Heine safety boilers of 200 horse-power each. The whole plant to be erected and under steam in 140 days from signing of contract. There is also included in the above order about three miles of 30-inch pipe.

Messrs. Faye & Co. of Mana reports their pumping plant which was furnished by the Risdon Works as doing splendid work; the quantity of water delivered has been doubled, while the lift has been increased from forty to seventy-five feet, and the coal consumption is no greater than formerly used by the centrifugal pump.

The S. F. Call of March 5th has the following: On Tuesday afternoon Admiral Brown of the Charleston presented to Consul-General David A. McKinley of the Hawaiian Islands the insignia of Knight Commander of the Royal Order of Kala-kaua, and a letter of thanks forwarded to him by Queen Liliuokalani, for his devotion and services to the late King.

To those who need a pleasant Tonic for any kind of debility, we can recommend Clements' as the best. For sale by HOLLISTER & Co.

THE BEST WINDMILL KNOWN! LASTS THE LONGEST AND DOES THE MOST WORK!

The Mill erected on my farm does all that has been claimed for it. This machine in a brisk breeze will discharge 16000 gallons per hour, raising it in the present location, 27 feet. JAMES CAMPBELL. DAVENPORT, CALIF., March 3, 1889.

The 27-ft Geared Windmill gives most excellent satisfaction, it drives the following machinery:

Three trundles for cleaning castings; one pump, 4 1/2 cylinder, 8 in stroke, raises water 58 feet high; three emery wheels, one emery brush wheel, one circular saw, 12 in.; one wood lathe, one upright drill, one drilling lathe for stern castings. The Mill takes care of itself perfectly; in a heavy gale the wheel folding out of the wind when the gust strikes it and coming back promptly as the force of the wind subsides. GEO. H. TAY & Co.

The universal popularity of Ayer's Hair Vigor is the most convincing proof of its value as a Dressing for the Hair.

When the hair becomes thin, faded, or prematurely gray, this preparation restores all its former color, fullness, and texture. It cures itching humors of the scalp, dandruff, and keeps the hair from falling out, and cures unsightly and troublesome humors of the scalp. Ladies desirous of having an abundance of soft, silky tresses, and gentlemen who wish to preserve their youthful appearance to an advanced age, would do well to furnish their tablets with Ayer's Hair Vigor.

PREPARED BY DR. J. C. AYER & CO., Lowell, Mass., U.S.A. Sold by Druggists and Perfumers.

HOLLISTER & CO., Distributing Agents. 1341-1y

Barry's Tricopherous

Established 1801. Infallible for renewing, invigorating and beautifying the hair, removing scurf, dandruff, and all affections of the scalp, and curing eruptions of the skin, diseases of the glands, mucus and integuments, and relieving stings, cuts, bruises, sprains, etc. The affinity between the membrane which constitute the skin and the hair which draws its sustenance from this triple envelope is very close. All diseases of the hair originate in the skin of the head. If the pores of the scalp are clogged, or if the blood and other fluids do not circulate freely through the small vessels which feed the roots with moisture and impart life to the fibres, the result is scurf, dandruff, shedding of the hair, grayness, dryness and hardness of the follicles, and entire baldness, as the case may be. Stimulate the skin so healthful action with Barry's Tricopherous, and the torpid vessels, recovering their activity, will annihilate the disease. In all affections of the skin and of the substrata of muscles and integuments the process and the effect are the same. It is upon the skin, the muscular fibre, and the glands that Barry's Tricopherous has its specific action, and in all affections and injuries of these organs it is a sovereign remedy. Beware of Counterfeits.

From the Greatest Living Prince, Donna, Madame Adelaide, Paris, Nov. 18, 1838. Messrs. BARCLAY & Co., New York.

Dear Sirs:—I take pleasure in announcing to you that Barry's Tricopherous is one of the few articles always to be found on my dressing case. In my conception it is one of the best of toilet waters, and for the hair it is not only delicate, but refreshing and invigorating. I recommend it without reserve. Caroline Patterson

A New Cooking Stove!

Messrs. KING BROS., have been appointed Agents for the

JEWEL GRAND GASOLINE COOKING STOVES

Which they are now offering for sale.

The following are a few of the merits of the Stove:

It requires no Chimney, there being no smoke to carry off. It does not blacken the cooking utensils. By the simple turning of a screw and the application of a match the Stove is ready for use.

Water can be boiled in five minutes from the time the fire is started. Any kind of cooking can be done on this Stove, that can be done on any other.

The expense of fuel is reduced to between ten and fifteen cents per day, and in some cases to much less. No cutting of wood or bother about coal with this Stove.

The fuel comes in casks like kerosene oil, and a year's supply can be easily stored in a very small space.

The best refined Gasoline is the fuel used, with which there is no more danger than with kerosene oil.

For people who do their own cooking this Stove can not be beaten, and we venture to say that after they have gotten over the prejudice of the use of Gasoline, that they will not give the Stove up for a wood and coal stove under any consideration.

There are at present six of these Stoves in successful operation on the island of Kauai and one in Honolulu, the owners of which will gladly furnish information to those wishing to know more about the Stove.

For further particulars apply to

KING BROS., Hotel Street, Honolulu. 1352-3m P. O. Box No. 63.

RUPTURE

It is a fact that Dr. Pierce's Magnetic Elastic Truss is the only successful one ever invented; has no iron hoops or steel springs about it, and being elastic, can be worn with ease and comfort Night and Day. It is a perfect restorative for the aged, and cures a Truss, and it is stamped for Frampland No. 1. Radically cured Trusses (the only successful one ever invented) has no iron hoops or steel springs about it, and being elastic, can be worn with ease and comfort Night and Day. It is a perfect restorative for the aged, and cures a Truss, and it is stamped for Frampland No. 1. REMEMBER Dr. Pierce's Magnetic Elastic Truss contains 2000 grains of the most valuable medicine, and is the only one of the kind. Beware of inferior imitations. Address: Dr. J. C. Ayer & Co., Lowell, Mass., U.S.A. MAGNETIC ELASTIC TRUSS COMPANY, 705 Broadway St., San Francisco, Cal.
