## HYGIENE IN SCHOOLS

The fourth international congress on school hygiene, which meets in Buffalo August 25 to 30, will prove one of the most important gatherings of the summer. The organization committee, which is making the plans for the congress, is working on broad lines.

Contending that school hygiene is important, not only to the child, but to the school, the home and the community as well, the committee is seeking the co-operation of the educators, hygienists, physicians and delegates from every city, town and state in the country. No comprehensive and effective campaign for the extension of modern methods in school hygiene can be carried on without the backing of the people, so it is the endeavor to secure this backing. With the community backing, efficient medical hygiene and sanitary supervision will result in the schools of the nation.

The results that will follow, and which are the aim of the work to be accomplished at the congress, are these:

For the child: Increased comfort, greater happiness, larger school room success, more safety and greater certainty of future

If only the good die young the life insurance companies would find some dandy risks in some of the species of manhood in preambulating around in this neck-o'-the woods.

# Califene

Califene, like a good-natured girl, makes hosts of friends wherever introduced.

First you meet her in the store where her Chaperon puts her through various fancy paces to show you what she can do.

In your own house she is just as willing to make the tastiest, crispest pastries you ever ate, if you'll follow the simple directions in the Califene Cook book.

Take Califene home with you, or telephone and the grocer's boy will be proud to bring her; she's the sort that makes people enjoy life.

Califene cooks without butter, and that's economy.
