Home and Foreign Losses Compared

Stated in the Annual Report of the National Board of Fire Underwriters.

Comparison of the fire losses in this country was almost as low as the previous year, according to the report for the reduction of the fire losses. It is stated that the reports from all parts of the United States and Canada for 1913 showed a decrease in the number of fires and an increase in the amount of property lost in fires. The decrease in the number of fires was due to the reduction in the use of wood as a fuel and the improvement in the construction of buildings. The increase in the amount of property lost was due to the increase in the value of property in the cities and the rapid growth of cities.

The report also states that the decrease in the number of fires was due to the improvement in the construction of buildings and the reduction in the use of wood as a fuel. The increase in the amount of property lost was due to the increase in the value of property in the cities and the rapid growth of cities. The report also states that the decrease in the number of fires was due to the improvement in the construction of buildings and the reduction in the use of wood as a fuel. The increase in the amount of property lost was due to the increase in the value of property in the cities and the rapid growth of cities.
